1: INTRODUCTION

Transactional Analysis is:

- A theory of personality
- A philosophy of equality and reciprocity in human relations
- A therapeutic methodology

Healthy human relationships are characterised by an attitude of *I'm OK You're OK* with both self and other being respected as having worth, value and dignity. Transactional Analysis maintains that people have the ability to change self limiting ways of being in the world. The therapeutic method therefore examines both intrapsychic and interpersonal dynamics and supports the development of awareness, the capacity for intimacy, and release of spontaneity and the importance of the therapeutic relationship as the medium for change

The Transactional Analysis programme as taught by the Manchester Institute for Psychotherapy (MIP) covers the major Schools of Transactional Analysis – the Classical approach of Eric Berne, the Redecision approach, the Cathexis approach, the Integrative approach and the Relational Approach.

The fundamental aim, which directs the course structure and guides content, is to provide students with a thorough theoretical and practical understanding of classical and contemporary Transactional Analysis Psychotherapy to enable them to become competent exponents and practitioners in Adult Psychotherapy. In order to achieve this aim the course has been designed to provide an integrated specialised education that will develop skills of independent and co-operative learning, and satisfy the MIP requirements in personal clinical competence.

Psychotherapy education can be considered integrated when the four components of theory, clinical practice, clinical supervision and personal development are in accord and constitute an integrated system of teaching and learning. Therefore running throughout the course, both alongside and interwoven with the academic requirements, are explicit parallel clinical obligations which must be met in order to achieve the award of Certificate in Transactional Analysis Psychotherapy with Clinical Speciality – and the Diploma on Transactional Analysis Psychotherapy.

The Manchester Institute for Psychotherapy is at the growing edge of developments in the wider community of Transactional Analysis through its collaboration with the United Kingdom Association of Transactional Analysis and the European Association of Transactional Analysis all training is offered for the educational benefit of the trainees.

2: DEFINITION OF PSYCHOTHERAPY

Psychotherapy

- is concerned with the human being as a whole, i.e., his/her body, mind and soul, in the context of a concrete life situation and at a given stage in the development of his life history, and integrates its psychological methods and techniques into a holistic therapeutic model, or plan of treatment, in the light of which the process may be reflected continually.

Purpose and objectives

Transactional Analysis Psychotherapy is practised:

- to understand, change resolve or alleviate conditions of suffering,
- to promote self-knowledge and experience of self, so as to enable the individual or groups of persons to make better use of his/her, personal life energy as well as his/her potential.
- to broaden the field of knowledge regarding the human being as a whole, community life and the mutual influence of people on each other as well as the relationship of the influence between them and their environment (processes which lead to and reinforce suffering and illness, and those that promote health).

Often these three levels of interest tend to overlap. What is always involved is the raising of awareness and insight to permit assessment of their impact, and where possible, to make use of them.

The psychotherapist's role will always include the ethical objective to promote the existential potential of the individual as well as of society/culture, and to foster a dynamic balance between self-determination and adaptability.

The course processes and content need to reflect the essential aims of the purposes of psychotherapy outlined above.

3: THE POSITION OF PSYCHOTHERAPY TODAY

An Independent Discipline

1. The course makes the assumption that psychotherapy is a field in its own right: it accepts the contributions of the different basic sciences and integrates these in to its own concepts.
2. The origins of psychotherapy are interdisciplinary with its roots in a variety of fields that have contributed to its development. Transactional Analysis for example has its roots in Psychoanalysis, the Ego Psychology of Federn (1952), Gestalt psychotherapy, Existentialism, Humanism, Field Theory, Constructivism and Developmental Psychology.
3. A fundamental focus of rationale for this course is that Psychotherapy is an independent field of activity and while it should continue to seek enrichment from all possible sources, the contributions of other field of science must be integrated into its own perspectives and concepts.

3.1 A Scientific Discipline

1. Essentially psychotherapy is defined by the relationship between the patient or client, and the psychotherapist, and by work on unconscious/unaware material. Effectiveness and assessment of effectiveness is therefore closely linked to what the therapist experiences during the therapy, which in turn depends on his/her personality, intuitive understanding, empathy with the situation, theoretical base and ability to communicate. This subjective experiencing is an important healing element in the therapeutic process.
2. Transactional Analysis Psychotherapy is a scientifically based approach to human inquiry (a science of persons) in so far as it maintains the “ideals of critical self-reflective inquiry and openness to public scrutiny” (Reason, 1994). However, the epistemological bases of Transactional Analysis Psychotherapy contrasts with the positivist world view that separates science from everyday life, knower from known, researcher from subject, self from other, mind from body, masculine from feminine.

3.2 Academic Rationale Including Programme Philosophy

The philosophy outlined below applies to the study of Transactional Analysis during each of the four years of training with MIP.

The programme philosophy is contained in the following four sections.

1. The basic assumptions of the theoretical model adopted for the programme:
 - A) A theory of personality
 - B) A theory of communication
 - C) A theory of life plan
2. The basic assumptions about the nature of the psychotherapy process – theory of psychotherapy.
3. The epistemological bases adopted by the programme.
4. A statement of values arising from the above.

3.2.1 Basic Assumptions of the Theoretical Model

TA Theory of Personality – Ego States

1. The mind is a living, active, self-organising system which receives, recalls and processes information.
2. The mind is a complex psychic organ which has three primary ways of processing – identification processes, data processing and regressive processes. These are known colloquially as Parent, Adult and Child Ego States.
3. Ego State analysis is used to identify patterns of interpersonal relationship and intrapsychic process.
4. Ego State analysis is an important instrument for the identification of Transference phenomena.

TA Theory of Communication

1. Transactional Analysis theory defines and differentiates various modes of communication and provides a method for understanding effective and ineffective communications.
2. Transactional Analysis examines covert communications.
3. Personal distress arises out of archaic and inappropriate systems of communication.

A Theory of Life Plan – Life Script

1. The infant-caregiver relationship is the primary relationship in which a child

organises its life script, i.e. beliefs about self, others and the world. Life script is influential in all subsequent relationships and recreates and reinforces itself in order to maintain the status quo and resist change. Other schools of psychotherapy refer to this process as repetition compulsion, fixed Gestalt etc.

- 2 People have a desire for growth, self actualisation, and satisfying relationships. At the same time there is a tendency towards regression and the maintenance of familiar internal and interpersonal structures.
- 3 Life Script is perceived to be a child's creative adjustment, that is, a child's way of making sense and structure of their world. It helps the therapist to understand both the content and process of the client's functioning and informs therapeutic intervention.

3.2.2 Theory of Psychotherapy

3.2.2.1 Basic assumptions about the nature of the psychotherapy process

1. Goal of Therapy.

In Transactional Analysis the ultimate goal of psychotherapy is seen as script cure. Transactional Analysis supports people to become autonomous and to choose healthy ways of being in the world. Autonomy is characterised by the capacity for spontaneity, awareness and intimacy.

- 2 The Role of the Therapist

Eric Berne, the founder of Transactional Analysis believed that a person could influence their future by changing the past in the present. It is the therapist's task to foster co-operation and mutuality by modelling a consistent attitude of *I'm OK, You're OK* with the client. This is facilitated by the use of contracts which, delineate and protect each person's rights and responsibilities. The therapist communicates psychological information in a language that is clear and understandable.

- 3 Styles and Modalities of Transactional Analysis

Transactional Analysis has a variety of styles and modalities and is practised with individuals, groups, couples, families and with children. It is increasingly applied in educational and organisational settings. It is widely used by human resource professionals seeking ways to manage the process of change. The styles in each modality will use a variety of techniques, which can be subsumed within one or more of the five main Transactional Analysis Approaches.

- 4 Techniques

TA is "an ever-expanding system of related techniques designed to help people understand their feelings and behaviours" (Woollams & Brown 1978). Whilst technical competence is essential, the techniques of Transactional Analysis are nevertheless secondary to the quality of the therapeutic relationship. Transactional Analysis, as taught at the Manchester Institute for Psychotherapy, believes the therapeutic relationship is the major agent of change. Contemporary psychotherapy

research supports this position.

The quality of the therapeutic relationship is a core factor in effecting therapeutic change and is facilitated by a consistently caring attitude that leads to the creation of a mutually reciprocal experience (mutual empowerment). In the use of the self the psychotherapist particularly emphasises openness, non-defensiveness, respect, and an attitude of understanding. The psychotherapist and client join together in dialogue to re-order the client's rational experience and change unhelpful beliefs about self, others and the world (reorganise the intrapsychic structure).

Therapeutic techniques which manipulate, reject or demean the client do not honour the subjective experience of the client. Techniques should develop from within the therapeutic relationship.

The therapist facilitates insight and where appropriate, the safe expression of emotion. Emotional literacy is an important goal of Transactional Analysis psychotherapy.

3.2.3 The Epistemological Basis of the Programme

Transactional Analysis is "a humanistic/existential psychotherapy by virtue of its primary emphasis on human freedom and autonomy" (Clarkson 1992)

1. Existentialism

Human beings are engaged consciously or unconsciously in endlessly remaking or discovering themselves. Transactional Analysis focuses on a persons' existence, relationships with others, hopes and despair, joys and suffering as directly and immediately experienced. A way of living that is not based on the truth of oneself in the world is inauthentic and self deceiving and leads to feelings of dread, shame, guilt and anxiety. Transactional Analysis confronts in-authenticity and challenges the client to organise a more meaningful existence.

2 Humanism

Transactional Analysis maintains an essentially optimistic attitude about the human potential, however it is cognisant of a negative side of human nature and the potential for destruction within the human shadow, "every human being seems to have a small fascist in his head" (Berne 1972).

3 Constructivism

Human knowledge (making meaning) is essentially socially constructed so that Transactional Analysis will give attention to the impact on the client of relational history, cultural norms, issues of gender, race, etc.

4 Developmental Psychology

Developmental Psychology maintains that out of the early infant-caregiver relationship the child develops its beliefs about self, others and the world which

influences all subsequent relationships. Developmental Psychology underpins the Transactional Analysis notion of Life Script.

3.2.4 Statement of Values

The statement of values set out below are integral to the philosophy of the teaching and practice of the training staff and are organised within the three fundamental assumptions of Transactional Analysis.

People are Born OK – Taking the position *I'm OK, you're OK* is the minimum requirement for good psychotherapy and enduring emotional and social well being.

1. A person's right to be different is supported by the epistemological basis of the programme and is fundamental to the theory of Transactional Analysis.
2. The programme will challenge and confront structural/historical inequality e.g. racism, sexism, ageism, classism.
3. Course members will be facilitated to challenge abuse of power among their peers, from their tutors, or the theoretical assumptions of the training programme.
4. Humanism and Constructivism support the belief that personal growth and change is possible and that it requires intrapsychic, interpersonal and socio-political awareness in order to deconstruct and reconstruct knowledge and understanding.
5. The programme staff will provide support for students who are members of both visible and invisible minorities e.g. students who are dyslexic, hard of hearing, etc.

People in emotional difficulties are nevertheless full, intelligent human beings.
They are capable of understanding their own and others problems.

1. The learning environment created by the programme will seek to maximise opportunity for students to share their thinking, experiences and perspectives in a way that encourages creative personal and professional development.

All emotional difficulties are curable given adequate knowledge and the proper approach. The difficulty psychotherapists have in providing healing with the more damaged personality is due to a lack of understanding, knowledge and resources, rather than incurability.

Clarkson, P. (1992). *"TA in Psychotherapy"*. Routledge.

Woollams, S & Brown, M. (1978). Transactional Analysis. Huron Valley Institute Press.

3.3 Health & Disease

The programme will enable students to understand health as the ability to maintain an *I'm OK You're OK* position with regard to self and others. It will raise consciousness of the many ways in which life script interferes with our capacity for healthy relating and results in varying degrees of social and occupational functioning and personal distress. Personal growth and development is a continual focus of the training during which students and staff will have the opportunity to experience and reflect on the quality of their relationships one with another. This is complemented by a student's ongoing personal therapy which is a fundamental requirement of the training programme.

The relational/developmental focus of the programme emphasises both technical competence and the importance of the therapeutic relationship and requires course members to commit themselves to:

- Increasing awareness
- Listening to self and others
- Becoming responsible
- Making informed choices
- Engaging in and assessing risks
- Being open to feedback
- Identifying own needs
- Monitoring tendencies to justify, explain or defend
- Recognising social, cultural and political sources of 'personal distress.
- In summary, the goals of Transactional Analysis psychotherapy are to enhance a person's capacity for spontaneity, awareness and intimacy, via satisfying experiences and relationships.

From the Transactional Analysis perspective, an individual cannot achieve autonomy in isolation. Three types of basic hungers (survival needs) are described – Structure, Stimulation and Recognition – which emphasise the interdependence of the individual on its environment.

Environmental factors can prove a major source of distress disempowerment and alienation. This is particularly manifested by inequality of opportunity. The programme will address in both general and specific ways inequality based on nationality, race, gender, sexual orientation, age disability, class, political or religious belief.

Assumptions about the validity and effectiveness of Transactional Analysis will be challenged by contemporary research and reflected in the literature content of the programme.

Matters of professional ethics and clinical practice are an important feature of the programme in view of professional registration following graduation.

3.4 Overall Aims of the Programme

3.4.1

The general aim of the Diploma in Transactional Analysis Psychotherapy with Clinical Speciality is to provide students with sufficient theoretical and practical exposure to modern views of Transactional Analysis psychotherapy to enable them to become competent exponents and practitioners in Adult Psychotherapy.

Fundamental to sound clinical practice is a training that combines theoretical understanding, as a way of conceptualising clinical issues. Therefore the aim of the academic focus of the course will be to introduce students to contemporary theoretical paradigms and, to enable them to develop ways of reflecting upon and conceptualising clinical issues. In particular the programme will encourage an understanding of the value and role that research can contribute to Transactional Analysis Psychotherapy.

The programme has been designed to provide an integrated specialised education that will (a) develop skills of independent and co-operative learning appropriate to the preparation of a Research Project (b) satisfy the clinical requirements of the Manchester Institute for Psychotherapy, and the requirements for professional registration as a Transactional Analyst with The European Association for Transactional Analysis and with the United Kingdom Council for Psychotherapy and UKCP Registration as an Integrative Psychotherapist.

3.4.2

A major aim of Psychotherapy education is to integrate the following four components: theory, clinical practice, clinical supervision, personal development/therapy are in accord and constitute an integrated system of teaching:

1. integrative model and are reflected at the theoretical and practical level.
2. when these four components of education are presented as interrelated; understanding of the different areas and their interrelationship will be subject to critical scrutiny and research.
3. when the personal growth of the student is in accord with the developing requirements of psychotherapy education and accompanies the practice of supervised psychotherapeutic activity.

3.4.3 The specific aims will be described under the following headings:

Theoretical aims of the course
Personal Development
Supervision
Practice

(i) Theoretical aims of the course

Theory provides a coherent framework for the different aspects of the training programme. Theory affects the goals of psychotherapy and provides guidance and direction for therapeutic intervention. Theory influences diagnosis and prognosis and the experience gained in the application of theory affects both its own further development and suggests areas of exploration for research.

Metatheory – General Foundations of Transactional Analysis Psychotherapy.

What is my perception of the world? -	Epistemology.
What is the nature of the human being? -	Anthropology.
What 'should I' or 'should I not do' ? -	Ethics.
Traditional science v new paradigm science -	Theory of Science.
Groups, culture, socio-political, economic-	Sociology.

(ii) Aims of Personal Development

Personal development permeates the whole of the modular programme and students will be required to obtain appropriate additional sources of personal development in the form of personal therapy (Transactional Analysis) on an ongoing basis and for the duration of the programme. It is ethical and necessary for the therapist to be exposed to the form of therapy they intend to practice and to experience its effect on themselves. The United Kingdom Council for Psychotherapy requires that psychotherapists undergo personal therapy of the frequency and duration similar to that they intend offering to clients.

In each of the four years of the Programme a student must undergo regular weekly personal therapy which should include both group and individual psychotherapy. The therapy must be with a UKCP registered Transactional Analyst and consist of 40 hours per year minimum.

(iii) Aims of Supervision

Clinical training supervision is an important and ongoing component of the modular programme and begins in the third year of training where each module will provide an opportunity for live supervision in large and small groups. In addition appropriate sources of qualified supervision (Transactional Analysis) will be identified for on going client supervision.

Supervision includes specific teaching functions:

- to accompany the learning process of the student.
- to stimulate the integration of personal development, knowledge and skills.

- to evaluate the interaction between the student therapist and their client.

(iv) Aims of Clinical Practice

Supervised clinical practice among peers will be an ongoing feature of the course, enabling the development of therapeutic skills and competencies and increasing students' ability to engage in self-assessment.

In addition students will be required to engage in clinical practice with clients using the Transactional Analysis approach. Students will need to demonstrate how they intend to meet this requirement before the commencement of the course.

(v) Student Participation in Group Process

Each weekend between 2-4 hours is spent in group process. The purpose of group process is for the students to understand their role in the life of the group and to experience and become aware of the impact of the group and members of the group on their own script processes. The learning experience is experiential and as such is an important part of the students overall learning and development as a TA Psychotherapist. It is an integral part of the entire weekend and as such must be attended.

3.4.4 In addition to the above the course will:

1. Develop awareness of the ethical context of psychotherapy and of issues which require particular attention and clarification, for example, use and abuse of the power differential within the therapeutic relationship, confidentiality, contracting, anti-oppressive practice.
2. Provide opportunities for students to develop their understanding and practice of psychotherapy within their main sphere of professional practice e.g., medicine, psychiatric nursing, social work, private practice.
3. Identify ways in which students may educate and assist their organisations to increase awareness of the nature and scope of the therapist's role and function.
4. Provide students with the opportunity to identify their psychotherapy and related training needs and to negotiate ways of meeting these. The teaching/learning methods used on the course are designed to encourage active involvement in the learning processes.
5. Provide a critical introduction to and an opportunity for ongoing critical evaluation of the relevance and efficacy of alternative psychotherapies and counselling, and Integrative Transactional Analysis psychotherapy in particular.
6. Special emphasis will be given to encouraging the adoption and use of research attitudes and methods in the accumulation and utilisation of information throughout the course and in particular the research project which has to be completed.

- 7 Seek to create a learning environment in which course members are encouraged to share their thinking and feelings openly, respecting both similarities and differences. Such a learning environment is facilitated by the humanistic-existential and constructivist basis of Transactional Analysis psychotherapy.
- 8 To undertake a Research Methods in Psychotherapy module and produce a research project.
- 9 To provide tutorial support in the preparation of the Research Project and preparation for UKCP registration.

4. GENERIC LEARNING OUTCOMES

4.1 Learning and Stage Related Outcomes

YEAR 1

On completion of the preparatory year students should be able to evaluate and synthesise the following:

Theory

1. Understand the core concepts of Transactional Analysis
2. Show some understanding of the inter-relatedness of Transactional Analysis theories

Personal Development

1. Apply Transactional Analysis to understand own script.

YEAR 2

On completion of this year students should be able to evaluate and synthesise:

Theory

1. They have some familiarity of the academic concerns of their chosen discipline and to present written work in a manner consistent with conventions of modern scholarly writing (citation, bibliography a clear understanding of plagiarism etc.).
2. They are competent in handling advanced critical, methodological and theoretical models relevant to the problems and issues addressed in the taught component.
3. They are able to express in a critical manner their understanding of their chosen discipline.
4. They are able to evidence a certain independence of thought with regard to the taught programme.

Personal Development

1. An ability to relate significant aspects of Transactional Analysis theory to their own personal development.
2. Critically reflect on the therapeutic process and on own functioning in order to develop practice.

- 3 Develop a capacity for self-monitoring
- 4 Demonstrates a satisfactory level of awareness of ethical requirements and standard of professional practice

Clinical Practice

1. There is some ability to formulate a persons problem/s in terms of Transactional Analysis theory.
- 2 There is a developing awareness of ethical considerations and the student has begun to recognise their strengths and the limits of their competence.
- 3 Students will be able to deliver the ten clinical competencies devised by MIP following their full endorsement.
4. The clinical endorsement will be completed by December of the 2nd year of the 4 year training.
5. By passing the clinical endorsement this indicates that the trainee has been endorsed by the Manchester Institute for Psychotherapy as competent to begin their clinical life as a trainee psychotherapist under supervision.

YEAR 3

On completion of this year students should be able to evaluate and produce professionally relevant syntheses of the following:

Theory

1. They are conversant with the academic concerns of their chosen discipline and the problems and issues addressed in the taught component and are fully conversant with the conventions of scholarly writing.
- 2 They are competent in handling advanced critical, methodological and theoretical models relevant to the problems and issues addressed in the taught component.
- 3 They are able to review the competencies gained already in the light of competencies gained in the current year.
4. They have acquired the ability to evaluate the competing critical, methodological and theoretical models which they have encountered in the taught programme.
5. They can evidence independence of thought with regard to the taught programme such that they can formulate a coherent and realisable research project

6. They have competence to undertake a research project.

Personal Development

1. There is a development of personal insight to make a mature assessment of their personal history and current functional and dysfunctional behaviour.

Clinical Teaching Supervision

- Assess clients suitability for psychotherapy
- Establish and work with the therapeutic relationship
- Critically reflect on the therapeutic process and on own functioning in order to develop practice
- Identify, clarify, assess and manage a range of clinical problems
- Make effective use of supervision
- Demonstrates a capacity for autonomy in their professional practice
- Develop a capacity for self monitoring
- Demonstrates a satisfactory level of awareness of ethical requirements and standard of professional practice
- Ability to work proactive and co-operatively with others to formulate solutions to ethical problems

Clinical Practice

In addition to the competencies acquired at previous stages course members will now be able to:

1. Reflect and comment on the quality of contact between themselves and their clients
2. Demonstrate effectiveness in terms of clarity, precision, timing and effectiveness of interventions

Year 3 Mental Health Module

1. A three day mental health workshop is required of all students.

YEAR 4

On completion of Year 4 students should be able to demonstrate through their research project that:

1. They are familiar with the critical, methodological and theoretical literature associated with their field of enquiry
2. They are able to provide an argued alternative to the received literature associated with the nominated field of enquiry
3. They have a thorough grounding in appropriate research methodologies and the academic concerns associated with their chosen field of enquiry
4. They can collect data and analyse it according to accepted methods of analysis
5. They are able to evaluate critically available models of analysis
6. They can propose, where appropriate alternative (or hypothetical) models of analysis
7. They can evaluate the outcomes of inductive and/or deductive analysis with regard to the material under consideration
8. They can sustain from evidence submitted, a reasoned argument and draw consistent and coherent conclusions
9. They can cite the outcomes/conclusions of a research project
10. They are able to reflect in a mature fashion upon the outcomes/conclusions of the enquiry, and can be self-critical in assessing the contributions from their own research.

Clinical Teaching Supervision

Students should be able to demonstrate the following abilities:

1. Therapeutic Skills

- 1.1 Assess clients' suitability for psychotherapy
- 1.2 Formulate and apply appropriate therapeutic Interventions
- 1.3 Establish and work with the therapeutic relationship
- 1.4 Manage the termination of therapy, planned and premature endings

2. Reflective Practice

- 2.1 Critically reflect on the therapeutic process and on own functioning in order to develop practice

3. Management of Clinical Practice

- 3.1 Identify, clarify, assess and manage a range of clinical problems
- 3.2 Make effective use of supervision

4. Communication & Presentation

- 4.1 Engage confidentially in communication with professional e.g., therapists, doctors, social workers.

5. Context of Professional Practice

- 5.1 Capacity for adaptation and innovation in response to complex and unpredictable or specialised area of work.

6. Responsibility

- 6.1 Demonstrates a capacity for autonomy in their professional practice
- 6.2 A capacity for self monitoring
- 6.3 Demonstrates a satisfactory level of awareness of ethical requirements and standard of professional practice
- 6.4 Ability to work proactive and co-operatively with others to formulate solutions to ethical problems
- 6.5 Capacity to tolerate the ambiguity and uncertainty that often accompanies ethical dilemmas

Competent clinical practice together with the ability to use supervision effectively must be evidenced in the formally assessed research project. In particular the course member will need to demonstrate:

- A high level of intuition (range, flexibility and creativity) in their work as a therapist
- An ability to anticipate the general direction of the therapy

4.2 Teaching and Learning Related to 4.1

4.2.1 Teaching/Learning Aims

The aims of the teaching/learning methods used on the programme will be consistent with the overall aim of the course thus:

The framework for this course will reflect the overall aim of providing a specialised integrated education, including theory, personal development, clinical supervision and clinical practice. To enable such a framework to work effectively modules are arranged over ten weekends of each training year.

NB. Clinical supervision does not take place in Year 1.

Each day will provide for an integrated day which reflects the module framework:

- Group Feedback with regards to their Interna/External experience
- Theory
- Supervised practice in large group
- Peer practice in small groups

Within this framework the following aims are identified:

1. To facilitate structured and informal learning. Obviously there will be considerable overlap as, for example, theory will permeate the whole day and cannot be contained within its own specific time slot. Similarly personal development will occur during the theory time as well as being the specific focus of group process.
2. To raise awareness of the interrelatedness between process, content and outcome.
3. To develop trust in the process of learning by increasing awareness of self and other, self in dialogue with peers and staff, self in dialogue with the theory.
4. To challenge and support self and others in the adventure of learning.
5. To develop a learning environment that balances support and challenge.
6. To provide a teaching/learning model consistent with the epistemological basis described in the programme philosophy namely, Constructivism, Existentialism, Field Theory, Developmental Psychology and Humanism.

4.2.2 Teaching/learning strategies

The teaching/learning strategies used in the Programme are intended to reflect basic features of the Programme Philosophy, Aims and Values.

Students are encouraged to explore their own developmental/relational history to understand the influence this has had on their subsequent beliefs about self, others and the world

The teaching and clinical training will enable students to develop self awareness, emotional literacy and the capacity to engage in relationships with peers and staff with both spontaneity and authenticity. This will be achieved in several ways including:

- Facilitating insight into how students life scripts are maintained through the various defence mechanisms.
- Developing awareness of the significance of transference phenomena relevant to life script, including projective identification and counter transference.
- Critical evaluation of the role of hypnotic induction as a vehicle for transference.
- An exploration of students intrapsychic and interpersonal functioning through the analysis of Ego States.
- Recognition of the difference between content and process in human relating.
- Awareness of external sources and effects of oppression on self and others.
- Awareness of internal sources and effect of oppression on self and others, i.e. the internalisation of external oppression and vice versa
- Willingness to be confronted and to own responsibility for ones own oppressive attitudes and behaviour.
- The commitment to be open to experiential learning and willingness to examine cherished theoretical concepts.
- Willingness to adopt alternative frameworks for understanding the client.
- Developing an attitude to knowledge which recognises its tentative transient nature.
- Willingness to acknowledge resistance to change, the inevitability of change and the conflict between them.
- Acknowledgement of personal and professional limitations in terms of ethical and professional practice.

The teaching/learning strategies and the processes of learning (including the integrated day) will enable students to appreciate own and others frames of reference.

The teaching learning methods will facilitate learning in the four major components of the specialised integrated teaching.

- 1 Theory
- 2 Supervision
- 3 Clinical Practice
- 4 Personal Development

The training will provide for an exploration of content (theories, methods, issues, problems etc.) and process.

The training will provide opportunities for course members to practice and develop technical skills (techniques, strategies of intervention) – Doing and group process skills – Being.

Critical feedback from peers and staff will be an essential feature of the training

During the integrated day, course members will identify and agree individual learning objectives. There will also be an evaluation of the Personal Learning Journal.

5: ADMISSIONS POLICIES AND PROCEDURES

5.1 The Manchester Institute for Psychotherapy Admissions Policy

The Manchester Institute for Psychotherapy (MIP) is open to all.

Entry to the four year training course is stated in our brochure, together with an APL policy.

Selection Procedure

- 1, Complete the application form for the psychotherapy training and send it to the Training Director.
2. The Director, together with another trainer, will assess the application form against the relevant criteria.
3. If the candidate meets the required criteria they will be invited to MIP for an interview.
4. Consideration will be given to the candidate's motivation and purpose for applying. The major objective of this selection process will be to judge their readiness for admission to the psychotherapy programme.
5. After discussion, a decision will be made with regards to the candidate's entry onto the psychotherapy training programme.
6. If successful, the candidate will receive both verbal and written confirmation.
7. If the candidate's application is declined, they will be notified in writing and feedback will be provided, if requested.
8. If the candidate decides to appeal against the decision, they will be asked to put their appeal in writing to the Training Director, stating their grounds for appeal.

Training Director's criteria for discussion at selection interview:

1. Any questions arising from the application form/CV.
2. Personal circumstances.
3. Professional experience.
4. Motivation and interest for the training.
5. Own experiences with psychotherapy process.
6. Psychotherapy courses and groups that they have attended, including relevant qualifications.
7. Self appraisal of own psychological health and resilience.
8. Ability to meet the financial costs of psychotherapy training, personal therapy and supervision.

9. Consideration of candidate's needs including any special education needs, sen reports or physical disability.
10. Eligibility for bursary.

5.2 Admissions Criteria APEL

Usual entry requirements as described and in addition:

5.2.1 A portfolio of work which would include:

- experience in counselling in a volunteer or other capacity;
- formal and information education;
- independent study. E.g. reading which relates to counselling / psychotherapy;
- other experiences which are relevant, e.g. receiving counselling /psychotherapy;
- references from an appropriate person; eg employer
- written form of compilation of the evidence of the above would be required.

5.2.2 In addition to the above an essay of 2,000 words on a counselling/therapy related topic.

5.2.3 The criteria against which this essay would be tested are:

- Issues in the title are addressed in a lucid, relevant, rigours and coherent way.
- The work is well structured, themes/ideas/issues are developed in a logical and consistent way.
- There is evidence of use of personal experience and views, reading of relevant literature, and of practical implications.
- Clear use is made of appropriate concepts to analyse own and others experience and to criticise and explore issues.
- There is awareness of the influence of own and others' values and beliefs on ideas and practice.
- Unsupported generalisation are to be avoided, and clear distinctions between evidence and opinion should be maintained.
- Further implications of the issues are indicated, which there may not be space to develop.
- The conclusion draws together the main arguments in a way which enables the reader to appreciate why these conclusions are reached. The conclusion may indicate relevant areas which have not been referred to (for lack of space) and it may include further issues or questions of which the writer has become aware.

5.2.4 If the candidate satisfies the above requirements then she/he may be admitted to the programme for Year 2, 3 or 4 at the discretion of the Director of MIP.

5.2.5 In the event of a candidate failing to achieve entry to the Programme, the course tutor would advise the candidate as to what courses of study and

experience would be appropriate to undertake prior to the next application.

5.2.6 Registration will be for at least a year and not normally only for Modules. This is due to the nature of the course in which processes, relationships and content need time to develop.

5.3 Equal Opportunities – MIP

The Manchester Institute for Psychotherapy recognises and values diversity and difference and, as a result, it is working actively to ensure that its services are non-discriminatory in nature.

The Manchester Institute for Psychotherapy recognises that it exists in a community, rich in diversity and difference. The Institute also recognises that direct and indirect discrimination exists in society, and the disadvantage that can adversely affect individuals and groups as a result. An obligation is therefore accepted at the Institute to ensure that services provided do not exclude or discriminate against individuals or groups on criteria other than suitability for psychotherapy or training.

The Manchester Institute for Psychotherapy is actively committed, within the resources at its disposal, to pursue a positive strategy that goes beyond an undertaking not to discriminate or oppress. The Institute recognises its sphere of influence and seeks to offer a positive contribution to the debate on therapy and equality. In order to combat discrimination and oppression, the Institute is working towards an increased awareness of the needs of oppressed and disadvantaged groups.

The Manchester Institute for Psychotherapy is opposed to any display of prejudice, either by word or conduct, by any member of the Institute. The culture surrounding addressing oppressive behaviour encourages the use of sensitive intervention except in those cases where behaviour is deemed to be totally unacceptable.

The aim of the policy is to ensure that no trainee, client, member of staff, trainer or any applicant for these positions receives less favourable treatment on grounds that cannot be shown to be justified.

The Full Equality Policy can be found at Appendix 48.

As proponents of TA, we will recognise that much of the early literature was written in the 1950's and 1960's at a time when there was little awareness of the impact of discriminatory language. Berne the founder of TA used many terms, which would be unacceptable if he were writing today.

It is of course impossible to study TA without becoming familiar with the writings of the founder and other authors of that era. We emphasise that TA has moved on since then and that MIP is committed to developing a TA community that embraces Equality of Opportunity and Diversity.

In line with this commitment, we note that much early TA literature used discriminatory labels and concepts. Such literature if used sensitively provides a valuable resource for training to explore and challenge discriminatory labels and concepts and move to best practice. Ref. UKATA Equality and Diversity documents

Further information on Equality of Opportunity and Diversity along with the relevant legislation can be obtained from:

Commission for Racial Change

info@networkforeurope.eu

Tel: 0151 237 3972

www.networkforeurope.eu

Reasonable Adjustments

Depending on specific circumstances reasonable adjustments could include:

The provision of information in alternative accessible formats (eg: Braille, large print, on audio recording)

The provision of an interpreter during training/counselling sessions. Additional costs arising from this would need to be charged across the customer base and not simply be passed on to the disabled person.

Free participation for support workers.

The provision of accessible venues (full physical access will be a legal requirement by 2004) or the use of suitable alternative venues.

The use of conference/meeting facilities with full access for disabled people – eg: wheelchair access, availability of loop induction, provision of interpreters, etc.

Discrimination i.e. explicit, institutional and indirect discrimination is unlawful with regards to race, gender and disability. The relevant legislation is: 1) The Race Relations Act 1976. 2) The Sex Discrimination Act 1975 amended 1999. 3) The Disability Discrimination Act 1995. (Further information can be accessed from the contacts list in the Addendum at the back of the Policy).

However more subtle forms of discrimination continue to affect many people. TA Practitioners are in a position of responsibility with regard to those with whom they work. It is expected that all relationships arising out of TA practice will develop on a professional, caring and non- discriminatory basis.

TA practitioners have a responsibility to recognise the reality of difference and of discrimination and prejudice in society and within the profession. Practitioners are responsible for addressing and challenging discrimination.

6: PROGRAMME STRUCTURE

6.1 Structural Rationale

The programme structure reflects the overall aim of providing an integrated specialised education in Transactional Analysis psychotherapy. The concept of an integrated specialised education in psychotherapy is evident in the Curriculum Contents and Requirements of Training Courses for member organisations of the United Kingdom Council for Psychotherapy and other national governing bodies in the field of psychotherapy in Europe.

The integrated specialised programme in Transactional Analysis psychotherapy is in a modular structure which provides a clear sense of progression, sequence and development that is in accord with the personal and professional development of a psychotherapist from relative beginner, through intermediate phases, to competent practitioner.

The course modules are of **two/three full days** duration to allow for in depth study with sufficient space between modules to allow for the assimilation of the experience content and process. 100% attendance is expected in order to complete the course.

Research modules are included in order to:

- evaluate psychotherapy practice and outcome
- recognise and encourage the links between research, clinical practice and the evolution of professional knowledge.

The structural framework indicates the sequential relationship between the modules and the MIP Parallel Clinical Obligations. It makes explicit the integration and coherence which is a fundamental aim of the Programme.

6.2 Integrative Relational Transactional Analysis 4 year Assessment Programme.

Year 1	Personal Therapy Attendance Assignment (2) Personal Learning Journal Personal development Profile	Min 40 sessions 100% 100% Coursework Pass Satisfactory Satisfactory
Year 2	Personal Therapy Attendance Assignment (2) Clinical Competencies Personal Learning Journal Personal development Profile	Min 40 sessions 100% 100% Coursework Pass Pass Satisfactory Satisfactory
Year 3	Personal therapy Attendance Assignments (1) Clinical Competencies Personal Learning Journal Personal development Profile	Min 40 sessions 100% 100% Coursework Pass Pass Satisfactory Satisfactory
Year 4	Personal Therapy Attendance Research-based Project Personal Learning Journal Personal development Profile Mini case study	Min 40 sessions 100% 100% Coursework Pass Pass Satisfactory Satisfactory

7. ASSESSMENT RATIONALE

The Assessment Modules and the sequence are designed to incorporate the range of learning experienced on the Programme and the complementary teaching and learning strategies. Some modules will be taught over two or three weekends and some modules are taught across three consecutive years.

The assessment criteria are intended to enable the students to be aware of the qualitative criteria which they need to address in the achievement of Learning Outcome's. The assessment criteria also allow a literal and numerical grade to be awarded above the threshold level of Learning Outcome achievement.

Modules are assessed by Essays, Personality Development Profile, Personal Learning Journal, Clinical Competencies, written Clinical Case Study and Research Project. Success in the assessment of a Module is the achievement of the Learning Outcome's associated with that Module. This combination of essay/written project and personal learning journal reflects the integrative nature of the Programme.

Course members must also undertake the parallel clinical obligations – personal psychotherapy, clinical practice and supervision.

All clinical evaluation assessments and course work must be in pass status and personal therapy, learning journals and profile must have met the minimum criteria in order that the student/trainee is able to advance to the next year. Clinical obligations must be vouched for by the personal therapist or supervisor.

7.1. *Assessment of Personal Development Profile (length 3,000 words)*

The purpose of the Personal Development Profile is to provide a record of a student's personal development over the year and to demonstrate a practical understanding of the importance of the personal development of therapist training and its impact within the therapeutic relationship.

The Personal Development Profile will be based on information written in the Course Learning Journal and should include reflections on the following themes:

The setting, reviewing and evaluating of specific personal development objectives.

Awareness of self in-relationship and the nature and quality of contact with:

- Self
- Peers
- Staff
- Clients
- Significant others

The level of participation and 'way of being' in all parts of the course, including Transactional Analysis Group Process.

The issues that have been figural in a student's personal work during the year.

The relationship between the student as a person and professional practice.

Possible future directions in personal work.

Two important criteria for assessing the Profile are that:

- The written work has demonstrated a genuine commitment to personal work.
- The written work has demonstrated an ability to reflect on personal development in terms of the themes outlined above.
- This will be graded as either, satisfactory or not-satisfactory.

7.2 Assessment of Personal Learning Journal

The purpose of the Personal Learning Journal is to:

- * reflect upon the course experience in terms of thoughts, feelings and behaviours.
- * set learning objectives and monitor how far these are being achieved, noting factors which are affecting the outcomes.
- * evaluate the development of attitudes, values, knowledge and skills.
- * explore ideas for making changes – both personal and professional changes.

A period of time (approximately 15 minutes 2pm -2.15pm) is set aside each day of a Module to complete the journal entry. Towards the end of each Module course members will each choose a review partner and have 15 minutes each to share significant aspects of the journal with a peer.

The journal is reflective rather than descriptive so the total experience of the Module is encompassed. Daily entries vary in length but a suggested minimum length is one side of A4 paper. It is important to simply write spontaneously. The intention is for the journal to be creative and that the flow of thought is not censored. Experiment with different forms of expression, written, pictorial, poetry, humour. The most important criteria for assessing the Personal Learning Journal are:

- A course member's willingness to expose him/herself spontaneously.
- The Journal reflects a genuine commitment to personal growth and development.
- This journal will be graded as satisfactory or unsatisfactory.

7.3. Self-Assessment is integrated throughout the course and the focus of specific structured work. Course members will complete a Self Assessment and a Peer Assessment at the end of each year. A detailed framework is provided for Self and Peer Assessments.

7.4 Research Project (10,000 words)

The trainee will need to demonstrate a basic understanding and knowledge of research methodologies and approaches with regard to psychotherapy practice to include the basic research techniques and application into the investigation and evaluation of psychotherapeutic interventions from assessment to the conclusion of treatment

This will incorporate an ability to critically review a piece of relevant published research (journal standard) and should demonstrate a competent translation into the practice of Integrative Relational Transactional Analysis concepts and methodology.

1. A basic understanding of different approaches to research to psychotherapy practice
2. A capacity to critically understand a research report in relevant clinical and professional journals
3. A capacity to evaluate the significance of research findings with respect to practice, and their practice
4. A working knowledge of research findings in relation to assessment for therapeutic intervention, and a capacity to critique these
5. A working knowledge of research findings regarding psychotherapy process and their implications for practice.

The student is encouraged to discuss the project with his/her supervisor.

7.5. Parallel Clinical Obligations

A student's Clinical Supervisor will be required to submit a brief annual report at the completion of each year.

Confirmation that a course member is meeting the additional requirements of the profession for personal therapy, clinical practice and clinical supervision will also need to be established via the Programme Tutor's Annual Report.

All methods of assessment will enable a course member to identify areas of strength, where he/she shows ability, skill, creativity etc., and give serious attention to any problem areas which require advice, support and direction.

WRITTEN ASSIGNMENT TUTOR FEEDBACK FORM
Transactional Analysis Psychotherapy Course with an Integrative Approach

Student's Name _____ **Date** _____

Marked By _____ **Grade** _____

1a. ORGANISATION & PLANNING

(There should be a structured plan for the work with an introduction, development, middle and conclusion and the work should address the essay title.

To be written in well-structured logical manner)

1b. STYLE & PRESENTATION

(Assignments should be presented using either Times New Roman or Arial font, size 12 and double spaced, with pages numbered and named.

To include a titled front page with the prescribed word count.

Expression is fluent with no spelling or grammatical errors)

2. ARGUMENT & APPLICATION OF THEORY TO PRACTICE

(Original and creative ideas should be developed and compared to other known theories, which are included and referenced, showing the application of theory to practice.

Self-awareness to be shown by demonstrating an understanding of their own process, with appropriate application of the theory in relation to themselves and others, and providing evidence of personal experience – in synthesis with theory, and recognition of the transferential processes)

continued over

3. THEORY & ANALYSIS

(Theory should be used to support the essay title. In addition, there should be practical links to the theory, therefore demonstrating a critical understanding of the subject.

The work should show critical evaluation of the subject with an appreciation of key theories and their limitations. The cultural and political context of theories etc. should be accounted for taking into consideration ethics and diversity. A recognition of power and privilege, and an awareness of influences, values and belief systems, with the distinction between opinions and evidence, should be illustrated)

4. RESEARCH AND REFERENCING

(Work should be referenced and include a Bibliography and Reference Section, using the Harvard Referencing System.

References could be to course handouts, books, articles and web items and all must be accurately referenced with the original author.

Direct and indirect quotations should be distinct and referenced appropriately, in order to avoid plagiarism)

<p>Grading Scale A. Excellent in most respects B. Very good in most respects C. Good in most respects D. Satisfactory in most respects U. Unsatisfactory - some aspects of the assignment need further work (see feedback sheet from marker)</p>					

GRADING SCALE FOR WRITTEN ASSIGNMENTS

Grade Descriptor	Criterion Grade	Numerical Grade	Cut off points between grades
Excellent in most respects	A	22	17.5
Very good in most respects	B	16	14.5
Good in most respects	C	13	12.5
Satisfactory in most respects	D	11	9.5
Unsatisfactory, needs further work	U	8	-

How to mark using grading scale:

1. Assign a relevant grade (A-D, and U) to each criterion on the Marking Criteria Sheet
2. Using the above table convert each alphabetical grade to a corresponding numerical grade
3. Add them up and divide by 4 to get the average number
4. Change the number back to a letter. This is the overall grade
5. The last vertical column gives you the cut-off points between grades

8: PROGRAMME MANAGEMENT AND ORGANISATION

8.1 Programme Management

As part of the process of monitoring and evaluating the Programme, the Primary Course Tutors are responsible for preparing a report to be copied to the Training Co-ordinator by July 31st each year. The Specialist Programme Report will contain:

Curriculum development and assessment (changes in content, delivery, teaching/learning strategies) as detailed on the lesson plans

Teaching/Learning Strategies (lesson plans)

Staff Resources -range of expertise, staff development, research (lesson plans)

Physical Resources – accommodation, equipment, Library (lesson plans)

External Moderators Report (highlighting main points raised by the External Examiner, action proposed, action taken if relevant)

Student Evaluation (main points raised in the annual evaluation session, informal feedback, student questionnaire, together with action taken)

Examples of good practice

Action Requirements (a list of the items requiring action to support and improve the quality and delivery of the Specialist Programme), within MIP.

8.2. Module Review

All students will be required to complete an anonymous course questionnaire in May and June. It is the responsibility of the Primary Course Tutor to collate this information, and any action points to be raised. The original questionnaires will then be passed to the Training Coordinator at MIP.

9: MODULE DESCRIPTION

9.1 Introduction to Modules

What follows is a broad outline and description of the modules for the Transactional Analysis Psychotherapy Training.

The Learning Outcomes and Indicative content of the modules have the following general aspects in common:

1. In the first phase the modules build on each other and are designed to provide a developmental and progressive process of learning.
2. Each module is specifically designed around core concepts of the conceptualisation of Transactional Analysis Psychotherapy.
3. Each module is geared towards enhancing students' personal and professional development.
4. Theory is linked with practice.
5. Modules aim to increase students' conceptual, critical and thinking capacities in relation to themselves and their work.
6. Students are encouraged to create an enquiring and objective appreciation of the profession of psychotherapy, its academic discipline and students own professional identities.
7. There is support for students to formulate an evolving and personally relevant view of Transactional Analysis Psychotherapy.

Research Modules

The research module is taught in the third year of training. The assessment hand in date is in the fourth year of training.

These general aims apply to the research module:

1. To familiarise students with a range of research methods and techniques which are currently and commonly used clinically to investigate and evaluate psychotherapeutic practice.
2. To use the seminars as an opportunity for exploring which methods are useful in researching particular problems.
3. To provide the opportunity for critical appraisal of existing research in the areas of psychotherapy and human relations through engagement with the existing literature including a critique of the core TA model.
4. To explore research as a collaborative process, researching with/for people, rather than on people.

1. To create a scientist-practitioner aspect to the training and study of Transactional Analysis which allows students to understand the relevance of research findings in human development, psychopathology, neuropathology, memory, diversities, ethics and legal issues.

2. **MIP TA – Training Programme Modules**

Training Modules: 4 year Course in Transactional Analysis (from an integrative perspective)

Modules -Year 1	Year 2	Year 3	Year 4
Introductions. The Fundamentals of TA. Completion of yearly contracts.	Contracts – What it is to be an ethical practitioner. Clinical Competencies.	Contracting and ethics. Using Supervision effectively.	Research progress, research feedback and social media presence – building an online presence
The philosophy of Integrative transactional analysis. Ego states – structural, functional and integrated adult.	Diagnosis and treatment planning and f vulnerable adults	Transference, Counter Transference, Projective Identification.	Contracting, supervision, clinical placement and evaluation.
TA and Defence Mechanisms - Contaminations and exclusions - Hungers	Integrative Psychotherapy Model Weekend 1	Intersubjectivity – the world between therapist/client.	Obsessive compulsive personality disorder
Transactional analysis/theory. The use of 3ps – Permission, Protection, Potency in psychotherapy.	Skills Practice and Mock Clinical Evaluation	Working with Child ego state.	Schizoid personality disorder
Script – script analysis and script maintenance.	Clinical Competencies Evaluation Weekend	Working with parent ego state.	Diagnosis & treatment of Narcissistic personality disorder.
TA and Defence Mechanisms – Rackets, Games and Game Analysis.	The Classical School	Personality adaptation model.	Diagnosis of Borderline personality disorder. 3 days
Introduction to Clinical Competencies weekend	The Redecision approach.	Research Module 3 days	Diagnosis of Historionic Paranoid personality disorder.
Neuro Biology, Human development model and comparative approaches to psychotherapy, Introduction to clinical competencies	The Cathexis approach	Mental Health Module 3 days	Treatment of Paranoid personality disorder
Child developmental model, introduction to clinical competencies	The Relational Approach	Formal case study explained and audio recording evaluation.	Treatment of Passive Aggressive & Anti- social personality disorder. 3 days
Diversity – gendered and culturally influenced Development. Clinical Competencies	The Integrative Psychotherapy Model – Weekend 2	Evaluation weekend.	Formal and Peer assessment
Evaluation – Formal/ peer assessment	Evaluation. Formal peer assessment	-	

Year 1 Weekend 1

Module Title:	Fundamentals of Transactional Analysis
Taught	1 weekend
Credit Level	7
Pre-requisite:	None
Co-requisite:	Parallel Clinical Obligations,

Context

This module will introduce students to the basic concepts of Transactional Analysis psychotherapy, theory and practice. It will present a variety of interrelated models and systems which describe personality development, intrapsychic functioning and interpersonal behaviour. It will acquaint students with the philosophical and ethical foundations of Transactional Analysis.

Learning Outcome

On completion of the module students will be able to:

1. Identify the basic concepts of Transactional Analysis.
2. Explore the centrality of the concept of contractual method to Integrative Transactional Analysis.

Indicative Content

- The philosophical foundations of Transactional Analysis.
- The national/international context of Transactional Analysis within The European Association for Transactional Analysis, The International Transactional Analysis Association and The United Kingdom Council for Psychotherapy.
- An overview of the history and development of Transactional Analysis.
- Basic concepts of Transactional Analysis
- Contractual method – theory, practice and philosophy.
- Ethics and Professional Practice - MIP/UKCP Code of Ethics

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including personal development, theory and clinical practice. The module is organised to provide for:

- Group feedback with regards to their Internal/External Experience
- Theory (Didactic and experiential)

The module provides 14 hours contact time with the module tutor.

Assessment

Entries in the Personal Learning Journal for the Modules: Fundamentals of Transactional Analysis, Ego States, Script Development and Maintenance and TA and Defence Mechanisms will enable Students to complete a Personal Development Profile **Appendix 16** (of a minimum 3,000 words) that will meet the Learning Outcomes.

Year 1 Weekend 2

Module Title:	The philosophy of Integrative Transactional Analysis, Ego States
Taught	1 weekend
Credit Level	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations,

Context

The theory presented in this module forms one of the cornerstones of Transactional Analysis and will provide students with the opportunity to relate theory to practice.

Learning Outcomes

On completion of the module students will be able to:

1. Critically evaluate Ego State theory
2. Identify the difference between overt and covert transactions

Indicative Content

- The historical/philosophical background to the theory of Ego States
- The model of the person
- Transactions and interpersonal process
- Functional Analysis
- Structural Analysis
- Integrative Transactional Analysis

- Ego State Options
- Ego grams
- Ego State pathology
- Ego State Treatment considerations

Learning and Teaching Strategy

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including both theory and personal development. The module is organised to provide for:

- Group feedback with regards to their Internal/External Experience
- Theory (Didactic and experiential)

Entries in the Personal Learning Journal which will accumulate in a formative way towards assessment of the Module on Transactional Analysis and Defence Mechanisms.

Assessment

Entries in the Personal Learning Journal for the Modules: Fundamentals of Transactional Analysis, Ego States, Script Development and Maintenance, TA and Defence Mechanisms will enable Students to complete a Personal Development Profile (of a minimum 3,000 words) that will meet the Learning Outcomes.

Year 1 Weekend 3

Module Title:	TA and Defence Mechanisms: Contaminations, exclusions and Hungers
Taught:	1 weekend
Credit level	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations, Clinical evaluations.

Context:

This module naturally follows on the previous module and focuses on the maintenance of the Script System through various defence mechanisms. These defence mechanisms are explored from a developmental-relational perspective.

Learning Outcomes

On completion of the module, students will be able to:

1. Explore the notion of defence mechanisms as 'creative adjustments'.
2. Critically assess the concept of resistance with reference to their own personal experience.

Indicative Content

- Strokes
- Contaminations
- Exclusions
- Hungers
- Time Structuring
- Passive behaviours
- Discounting
- Resistance
- Creative adjustment

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including personal development, theory and clinical practice. The module is organised to provide for:

- Group feedback with regards to their Internal/External Experience
- Theory (Didactic and Experiential)

Assessment

Entries in the Personal Learning Journal for the Modules: Fundamentals of Transactional Analysis, Ego States, Script Development and Maintenance TA and Defence Mechanisms will enable Students to complete a Personal Development Profile.

Year 1 Weekend 4

Module Title:	Transactional Analysis Theory and the Use of the 3Ps
Taught:	1 weekend
Credit level	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations, Clinical evaluations.

Context:

This module naturally follows on from the previous module and focusses on the 3Ps which of course are important when thinking of script. The 3Ps Potency, Permissions and Protection, are fundamental to any security and safety for clients.

Another P which may be important to consider in this context is the purpose of punishment within script development and the consequences of the above.

Learning Outcome:

On completion of the module students will be able to

1. Understand the notion of the 3Ps within the clinical framework and to understand them in terms of script development.
2. How to use each concept ie Permissions, Protection and Potency, within the therapeutic relationship in the service of cure.
3. To explore the importance of the concept of punishment within script development.

Indicative Content:

- * Creative adjustment
- * Script
- * Script enhancement
- * Redecisions
- * Defence mechanisms
- * Resistance
- * Child development
- * Strokes
- * Stroking profile
- * Transactions

Learning and Teaching Strategies:

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including personal development, theory, clinical supervision and clinical practice. The module is organised to provide for:

Group feedback with regards to their Internal/External Experience
Theory (Didactic and Experiential)

Entries in the Personal Learning Journal which will accumulate in a formative way towards assessment of the Module on Transactional Analysis and Defence Mechanisms.

Assessment

Entries in the Personal Learning Journal for the Modules: Fundamentals of Transactional Analysis, Ego States, Script Development and Maintenance TA and Defence Mechanisms will enable Students to complete a Personal Development Profile.

Reading list/resources

Bob Cooke You Tube Channel 2012

Year 1 Weekend 5

Module Title:	Script Analysis and Maintenance
Taught	1 weekend
Credit Level	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

Early Script decisions influence life style, personality and beliefs about self, others and the world. In this module students will develop an understanding of their own and others Script Systems enabling them to formulate initial diagnosis and 'treatment' plans.

Learning Outcome

On completion of the module students will be able to:

1. Critically evaluate the concept of Life Script.
2. Demonstrate their understanding of the intrapsychic and interpersonal theories

underpinning the Script System.

3. Identify the model of human change and how change can be facilitated.
4. Formulate an initial diagnosis and 'treatment' plan to facilitate change.

Indicative Content

- Script Development – Origins of Script.
- Script as a Decisional model.
- Cultural Scripting
- Script patterns and Greek Mythology.
- Steiner's Script types.
- The transmission of script – Script Matrix.
- Script maintenance.
- Counterscript (Drivers)
- Injunctions
- Script diagnosis and treatment planning.
- Mini – Script
- Frame of Reference.
- Life – Positions
- Time Structuring

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including personal development, theory, clinical supervision and clinical practice. The module is organised to provide for:

Group feedback with regards to their Internal/External Experience
Theory (Didactic and Experiential)

Entries in the Personal Learning Journal which will accumulate in a formative way towards assessment of the Module on Transactional Analysis and Defence Mechanisms.

Assessment

Entries in the Personal Learning Journal for the Modules: Fundamentals of Transactional Analysis, Ego States, Script Development and Maintenance TA and Defence Mechanisms will enable Students to complete a Personal Development Profile (of a minimum 3,000 words) that will meet the Learning Outcomes.

Year 1 Weekend 6

Module Title:	TA and Defence Mechanisms: Rackets, Games and Game Analysis
Taught:	1 weekend
Credit level	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations, Clinical evaluations.

Context:

This module naturally follows on the previous module and focuses on the maintenance of the Script System through various defence mechanisms. These defence mechanisms are explored from a developmental-relational perspective.

Learning Outcomes

On completion of the module, students will be able to:

1. Explore the notion of defence mechanisms as ‘creative adjustments’.
2. Critically assess the concept of resistance with reference to their own personal experience.

Indicative Content

- Racket System/Racket Analysis
- Strokes
- Games
- Drama Triangle
- Time Structuring
- Racket v Authentic feelings
- Passive behaviours

- Discounting
- Resistance
- Creative adjustment

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including personal development, theory and clinical practice. The module is organised to provide for:

- Group feedback with regards to their Internal/External Experience
- Theory (Didactic and Experiential)

Assessment

Entries in the Personal Learning Journal for the Modules: Fundamentals of Transactional Analysis, Ego States, Script Development and Maintenance TA and Defence Mechanisms will enable Students to complete a Personal Development Profile (3,000 words).

Book List

- * TA Today - Ian Stewart & Van Joinnes
- * Games People Play - Eric Berne 1964
- * Transactional Analysis - 100 Techniques - Mark Widdowson

Year 1 Weekend 7

Module Title:	Clinical Skills: Introduction to Clinical Competencies
Taught :	1 weekend
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co – requisite:	Parallel Clinical Obligations

Context.

Following group feedback the tutor will introduce the Clinical Skills weekend and teach what is meant by active listening, staying behind the client, paraphrasing, inquiry, attunement, staying in contact with the client and involvement.

In the afternoon there will be an introduction to the Clinical Competencies as outlined below:

Learning Outcomes:

On completion of the module, students will be able to:

1. Critically evaluate both their own practice and the practice of others with regards to client interaction.
2. Demonstrate their understanding of the skills required by a proficient psycho therapist

Indicative Content:

- Active listening and paraphrasing
- Open and closed questions
- Contractual methodology
- Inquiry, Attunement & Involvement
- Explanation of an effective therapy session

Learning and teaching strategies:

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External Experience
- Theory (didactic and experiential)

The module provides 14 hours contact time with the module tutor.

SKILLS COMPETENCY

Yr 1	Student Name:	
No.	Description	Pass
1	Listen actively / summarise / paraphrase.	Yes / No
2	Can establish bilateral mutual Contracts	Yes/ No
3	Can describe at least two clinical interventions made with clients in TA theoretical terms.	Yes / No
4	To demonstrate the ability to stay in contact with the client within the therapeutic relationship.	Yes / No
5	Can demonstrate Inquiry and Attunement	Yes / No
6	Ask open questions and not closed questions within the therapeutic session.	Yes / No
7	Treat clients with dignity, respect and integrity, i.e., come from, I ok – you ok position	Yes / No
8	Ability to listen, non-judgmentally and with openness.	Yes / No
9	Ability to facilitate the client, to talk openly and freely.	Yes / No
10	Demonstrates effective interventions using TA	Yes / No
11	To reflect on possible Transference issues and who they may be for the client.	Yes / No

	Clinical Competencies Pass/Refer Tutor signature: Date: Comments:	
	Student signature and comments Date	

Assessment: the student is deemed to have passed all eleven competencies outlines above by the tutor

Year 1 Weekend 8/9

Module Title: Neuro Biology, Human Development Model, Comparative approaches to psychotherapy core concepts. Introduction to clinical competencies

Taught: 2 weekends

Credit Level: 7

Pre-requisite: Previous Core Modules

Co-requisite: Parallel Clinical Obligations

Context

This module will focus on the significance of core concepts in developmental psychology that have particular relevance for psychotherapy in general and Transactional Analysis Psychotherapy in particular.

Learning Outcomes

On completion of the module students will be able to:

1. Identify key issues in their own developmental history.
2. Critically evaluate the application of a developmental perspective to the practice of Transactional Analysis Psychotherapy, as appropriate to the award being followed.
3. Critically evaluate the multi-dimensional nature of the therapeutic relationship

Indicative Content

- Core concepts from Object Relations theory.
- Core concepts from Psychoanalytical Self Psychology.
- Core concepts from the developmental theories, Transactional Analysis.
- Neuro Biology.
- Human development model.
- Child development model.
- Relevant findings from Infant Research.
- Attachment, separation, individuation.
- The model of the person.
- The development of identity.
- A model of human change and how this may be facilitated.
- The notion of the 'good enough' parent.
- Recognition hungers.
- Introduction to Clinical competencies

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including personal development, theory and clinical skills practice. The module is organised to provide for group process, theory, (didactic & experiential). The module overall provides 28 hours contact time with the module tutor.

In order to integrate theory with clinical practice a high degree of student effort is required: 40 hours personal psychotherapy, 20 hours self-directed study including course work preparation.

Assessment

Entries in the Personal Learning Journal for this module will, in conjunction with entries in the Personal Learning Journal for the Module on Research Methods will enable students to complete a Personal Development Profile that will meet the Learning Outcomes.

Clinical Competencies – MIP Programme 2016

Year 1 Weekend 9

Module Title:	Child Developmental Model and introduction to Clinical Competencies Continued (see previous weekend)
Taught	As above
Credit Level	As above
Pre-requisite	As above
Co-requisite	As above

Year 1 Weekend 10

Module Title:	Diversity
Taught:	1 weekend
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

In this module students will become familiar with direct and indirect discrimination and its and will relate practice to TA theory.

Learning Outcomes

On completion of the module students will be able to:

1. Identify the major influences regarding prejudice and discrimination.
2. Recognise societal influence on norms and values regarding diversity.
3. Identify their own experiences regarding diversity.

Indicative Content

- Societal and other influences on diversity
- Script issues – contamination and prejudice. Racism, sexism, disability, gender, sexuality, religion.
- Language affects and usage
The effects of discrimination on mental health
- MIP Equality policy
- UKCP Equality Policy
- A model of culturally and gendered influenced human development
- Clinical competencies

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group process
- Theory (didactic and experiential)
- Supervision

The module provides 14 hours contact time with the module tutor.

In order to integrate theory with clinical practice a high degree of student effort is required: 5 hours clinical supervision, 40 hours personal psychotherapy, 20 hours self-directed study including course work preparation.

Assessment

Assessment Weighting: 100% course work.

Course Work Assignment:

End of year written essay/project of a minimum 2,500 words and maximum 3,500 words

Year 1 Weekend 11.

Module Title:	Course Evaluation, Formal and Peer assessment.
Taught:	4 weekends over 4 years
Credit level:	7
Pre-requisite:	Previous Core Modules and full attendance
Co-requisite:	Parallel Clinical Obligations and full participation

Learning Outcomes:

On completion of the module students will be able to:

- Evaluate the course modules based on
Teaching and learning
Inclusiveness of language and teaching style
Appropriateness of language and teaching style
Resources up to date, clearly written.
Organisation and management
- Evaluate their own appropriateness within their environment
Their own ability to learn
Their own organisation and management of self
- Evaluate their peers ability to work as part of a group
- Evaluate their peers ability to contribute and participate to the overall group learning experience
- Share their own experience of group members.

Indicative Content:

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Interna/External Experience
- Theory (didactic and experiential)

YEAR 2 MODULES

Year 2 Weekend 1

Module Title:	Contracting and the ethical practitioner (supervision; assessment; placement; clinical skills and evaluation).
Taught:	1 weekend
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

In this module students will become familiar with a range of strategic interventions applicable to contracting with the client which will relate practice to theory.

Learning Outcomes

On completion of the module students will be able to:

1. Critically analyse the concept of the contractual method in relationship to ; ethics and supervision; assessment and clinical skills and evaluation
2. Critically evaluate the concept of the contractual method in relationship to ; ethics and supervision; assessment and clinical skills and evaluation

Indicative Content

- Contractual method and the ethical practitioner
- Placement and contracting
- Theory in ethics, supervision; assessment and clinical skills and evaluation
- Practice in ethics, supervision; assessment and clinical skills and evaluation
- Philosophy in ethics, supervision; assessment and clinical skills and evaluation
- MIP/UKCP Code of Ethics
- Effective use of supervision

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External Experience
- Theory (didactic and experiential)
- Supervised practice in large group

Assessment

End of year written essays of a minimum of 2,000 words per essay.

Resources:

Contracts in Counselling and Psychotherapy – Charlotte Sills – 2006 – Sage Publications

Year 2 Weekend 2

Module Title:	Diagnosis, Treating Planning and Safeguarding Vulnerable Adults
Taught:	1 weekend
Number of Credits	4
Credit Level	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

Transactional Analysis psychotherapy provides a distinct focus on change and cure. In this module students will be introduced to Transactional Analysis approaches to diagnosis and treatment planning. Referral procedures, drug treatments and liaison with other professionals are significant components of the module.

Learning Outcomes

On completion of this module students will be able to:

1. Critically evaluate Transactional Analysis approaches to diagnosis and treatment planning.
2. Critically assess strategies of intervention.
3. Demonstrate an ability to liaise appropriately with other professional agencies.

Indicative Content

- Notions of Cure
- Diagnosis
- Treatment Planning
- Stages of treatment and strategies of intervention
- Personality orientations
- Drug Treatment
- Referral procedures
- Ethics and Professional Practice
- Safe guarding vulnerable adults

Learning and Teaching Strategy

The strategy for this module will reflect the overall aim of providing a specialised integrated education including personal development, theory, clinical supervision and clinical practice. This module is organised to provide for:

Group feedback with regards to their Internal/External Experience
Theory (didactic and experiential)

Entries in the Personal Learning Journal are not assessed but enable students to review their personal development over the period of the module.

Assessment

2 essays (2000 words each)
Clinical Competencies

Year 2 Weekends 3, 6, 7, 8, 9 and 10

Module Title:	Approaches in TA
Taught:	6 weekends
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

In this module students will become familiar with a range of Approaches in TA applicable to the client and will relate practice to theory.

Learning Outcomes

On completion of the module students will be able to:

1. Identify the differing Approaches in Transactional Analysis
2. Critically evaluate the contribution made to TA theory by each of the approaches.

Indicative Content

Integrative Approach
Classical Approach
Redecision Approach
Integrative Approach (2 weekends)
Cathexis Approach
Relational Approach

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External experience
- Theory (didactic and experiential)

Assessment

Assessment Weighting: 100% course work.
End of year written essays (2,000 words per essay).

Year 2 Weekend 4/5

Module Title:	Clinical Competencies/ Skills Practice and Evaluation
Taught:	2 weekends
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

- The module will focus on a Student's level of personal integration of the theory of TA psychotherapy with clinical and ethical Practice which must demonstrate the level of Clinical Competence required by the Manchester Institute for Psychotherapy and for registration as a Psychotherapist with the United Kingdom Council for Psychotherapy.
- The award will be held back until successful completion of this module, all academic criteria and the parallel clinical obligations.

Indicative content:

- Practical learning and experience
- Skills practice, group and pairs
- Clinical evaluation
-

Learning Outcomes:

On completion of the module students will be able to:

Demonstrate clinical competence via their effective use of self, personal qualities, techniques and theoretical understanding in the promotion of clients' self-awareness, and effective engagement in inter-personal relationships.

Demonstrate their own practice skills via a mock clinical evaluation and final clinical evaluation programme.

Assessment

Assessment Weighting: 100% course work.

Two assignments (2000 words)

Management of the Clinical Competence Module

The Role of the Primary Course Tutor:

The Programme Course tutor has overall responsibility for the management of clinical Competency Module and will fulfil the following roles:

- i.2 Advising on a student's clinical competencies strengths and weaknesses.
- i.2 Making sure that each student practices within the training weekends their particular clinical competencies to the relevant standard.
- 5. Timing of the Completion of the Clinical Competency Module:
 - 5.1 It is expected that the Clinical Competency requirements will normally be completed by the end of the 2nd year of training.
- 6. Mechanisms by which Clinical Competency is to be assessed:
 - 6.1 Through reflective clinical endorsement
 - 6.2 A student's Tutor will assign a Pass or Fail to the Clinical Competencies Assessment. After the student has passed their clinical competency MIP will award the student the clinical endorsement to being working clinically as a beginning practitioner under clinical supervision.

Resources and Readings:

Clinical Competencies – Bob Cooke – You Tube 2014

Clinical Competencies Video MIP website 2012

Developing TA Counselling in Action – Ian Stewart – 2013 – Sage Publications

Year 2 Weekend 11.

Module Title:	Course Evaluation, Formal and Peer assessment.
Taught:	4 weekends over 4 years
Credit level:	7
Pre-requisite:	Previous Core Modules and full attendance
Co-requisite:	Parallel Clinical Obligations and full participation

Learning Outcomes:

On completion of the module students will be able to:

1. Evaluate the course modules based on
 - Teaching and learning
 - Inclusiveness of language and teaching style
 - Appropriateness of language and teaching style
 - Resources up to date, clearly written.

- Organisation and management
- 2. Evaluate their own appropriateness within the environment
 - Their own ability to learn
 - Their own organisation and management of self
- 3. Evaluate their peers' ability to work as part of a group
- 4. Evaluate their peers' ability to contribute and participate to the overall group learning experience
- 5. Share their own experience of group members.

Indicative Content:

Learning and Teaching Strategies:

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Understand Group process
- Understand Theory (didactic and experiential)

YEAR 3 MODULES

Year 3 Weekend 1

Module Title:	Contracting and Ethics; Using Supervision Effectively; assessment; placement; clinical evaluation.
Taught:	1 weekend
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

In this module students will become familiar with a range of strategic interventions applicable to contracting with the client which will relate practice to theory.

Learning Outcomes

On completion of the module students will be able to:

1. Critically analyse the concept of the contractual method in relationship to ; ethics and supervision; assessment and clinical evaluation
2. Critically evaluate the concept of the contractual method in relationship to ; ethics and supervision; assessment and clinical evaluation

Indicative Content

- Contractual method and the ethical practitioner
- Placement and contracting
- Theory in ethics, supervision; assessment and clinical evaluation
- Practice in ethics, supervision; assessment and clinical evaluation
- Philosophy in ethics, supervision; assessment and clinical evaluation
- MIP/UKCP Code of Ethics
- Effective use of supervision

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External Experience
- Theory (didactic and experiential)
- Supervised practice in large group
- Supervised peer practice in small groups

Assessment

Assessment Weighting: 100% course work.

Course Work Assignment:

1 x 3000 word written assignment

Resources

Contracts in Counselling and Psychotherapy - Charlotte Sills – 2006 – Sage Publications

Supervision in the Helping Professions – Hawkins & Shohet – 2012 – Open University Press

Transactional Analysis Counselling in Action – Ian Stewart - 2013 – Sage Publications

Integrative Supervision – Diana Shmukler 2011 – Sage

The Art of Relational Supervision: Clinical Implications of the Use of Self in Group Supervision – Helena Hargaden – 2015 – Routledge

Passionate Supervision – Robin Shohet – 2007 – Jessica Kingsley Publishers

TA Supervision – Bob Cooke, You Tube Video 2014

100 Key Points in Transactional Analysis – Mark Widdowson– 2009 – Routledge

An Introduction to Transactional Analysis – Phil Lapworth & Charlotte Sills – 2011 – Sage Publishing

Year 3 Weekend 2

Module Title: Transference and Counter-transference.

Teaching: 1 weekend

Credit Level 7

Pre-requisite: Previous Core Modules

Co-requisite: Parallel Clinical Obligations

Context

The module will focus on a most powerful dynamic in the therapeutic relationship raising important considerations for clinical and ethical practice.

Learning Outcomes

On completion of this module students will be able to:

1. Critically evaluate the main constructs of the module – transference and countertransference.
2. Critically assess the relevance of these concepts to their own experience both as therapists and as clients.

Indicative Content

- The history and development ideas about the Transference and Countertransference.
- Transactional Analysis constructs of Transference and Countertransference.
- Projective Identification.
- Parallel Process.
- Life Script, Repetition Compulsion, Fixed Gestalt.
- Uses and abuses of transference phenomena in the therapeutic relationship. Exploring the inter-subjectivity of the world between the therapist and the client.

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including personal development, theory, clinical supervision and clinical skills practice. The module is organised to provide for:

group process
 theory (didactic and experiential)
 supervised practice in the large group
 supervised practice in small groups

The module provides 28 hours contact time with the module tutor.

In order to integrate theory with clinical practice a high degree of student effort is required: appropriate clinical supervision, 40 hours personal psychotherapy, 20 hours self-directed study including course work preparation.

Students are required to complete a Self Assessment Form Peer Assessment Form for this module.

Assessment

Assessment Weighting: 100% course work.

Course Work Assignment:

Entries in the Personal Learning Journal for this module, in conjunction with previous entries in the Personal Learning Journals for Modules: Applied Research, Schools within Transactional Analysis will enable the student to complete a Personal Development Profile (of a minimum 3,000 words).

ADD IN HERE YEAR 3WEEKEND 3

Year 3 Weekend 4/5

Module Title:	Working with the Child and Parent Ego States.
Taught:	2 weekends
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

In this module students will become familiar with a range of strategic interventions applicable to the Ego state presentation of the client which will relate practice to theory.

Learning Outcomes

On completion of the module students will be able to:

1. Identify their own characteristic Child and Parent Ego State presentation.
2. Critically evaluate strategies of interventions with the Child and Parent Ego States.

Indicative Content

- Inquiry, involvement and attunement
- The Deconfusion of Child Ego States
- Rechilding
- Working with Regression.
- Spot Reparenting
- Self Reparenting
- The ethics of working with Regressive States.
- Reparenting Strategies
- The parent resolution process.
- Therapy of the Parent Ego State
- The Parent Interview
- Reparenting of the Severely Disturbed
- Working with the child ego state
- Working with the parent ego state

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External Experience
- Theory (didactic and experiential)
- Supervised practice in large group
- Supervised peer practice in small groups

Entries in the Personal Learning Journal which will accumulate in a formative way towards assessment of the Module on Personality Adaptations and Communication Styles in this stage.

Assessment

Assessment Weighting: 100% course work.

Course Work Assignment:

Assignment - end of year essay (3,000 words)

Resources

Year 3 Weekend 6

Module Title:	Personality Adaptations
Taught	1 weekend
Credit Level	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

The module will explore the significance of personality adaptation and styles of communication on interpersonal functioning.

Learning Outcomes

On completion of the module students will be able to:

1. Identify their own personality adaptations and communication styles.
2. Critically explore the link between personality adaptation and Life Script.
3. Have a critical awareness of the multiple layers of the human experience and the multi-dimensional nature of the therapeutic relationship

Indicative Content

- Personality Adaptations
- Process Communication
- Communication Channels
- Personal Characteristics
- Doors to contact
- Adaptation
- Script Process
- Diagnosis
- Treatment planning
- Ethical Considerations

Teaching and Learning Strategy

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including personal development, theory and clinical practice. The module is organised to provide for:

- Group feedback with regards to their Internal/External experience
- Theory (didactic and experiential)

Assessment

Course Work Assignment:

Entries in the Personal Learning Journal for this module, in conjunction with previous entries in the Personal Learning Journals for Modules: Research Methods, Human Development, Strategic Interventions with Child and Parent Ego States and personality Adaptations will enable the student to complete a Personal Development Profile min 3,000 words which will enable the student to meet the Learning Outcomes.

Resources

Personality Adaptations – Vann Joines and Ian Stewart – 2002 – Lifespace Publishing

Personality Adaptations, a Diagnostic Model for Psychotherapists- Bob Cooke, Video, MIP website and You Tube

DSMR 5 2015

Year 3 Weekend 7 (3 days)

Module Title:	Research Methods in Psychotherapy:
Credit Level:	7
Taught	3 days
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

There are increasing professional and ethical demands for critical appraisal of the process and outcome of psychotherapy. The module will establish the foundation upon which students can begin to develop a scientist-practitioner approach to the theory and practice of Transactional Analysis Psychotherapy. The module will familiarise students with the relevance of and basic approaches to research, research methods, tools and techniques in for example: human development, psychopathology, neurophysiology, memory, diversities, ethics and legal issues.

Learning Outcomes

On completion of the module students will be able to:

1. Critically assess the relevance of qualitative and quantitative research in the context of their thinking, theorising and practice of psychotherapy.
2. Critically explore some of the ethical issues within psychotherapy research.

Indicative Content

- An introduction to research paradigms in the human sciences in general and psychotherapy in particular.
- Methods of research.
- Research tools – interviews, questionnaires, etc.
- Basic statistical principles relevant to psychotherapy research.
- Ethics of research. Plagiarism.
- Appendix 10
- Appendix 14

Learning and Teaching Strategies

The strategy for this module will reflect the overall aim of providing a specialised integrated education including both theory and personal development. The major emphasis will be on the theoretical component of the integrated day with periods set aside for personal development through the vehicle of group feedback. The module provides 21 hours contact time with the module tutor.

Entries in the Personal Learning Journal which will accumulate in a formative way towards assessment of the Module on Human Development.

Assessment

A written project of 10,000 words, demonstrating the fulfilment of the Learning Outcomes. This is the summative assessment of this module.

Resources:

Personal tutorial time by arrangement.

Relational-centred Research for Psychotherapists: Exploring Meanings and Experience – Linda Finlay and Ken Evans – 2009 - Wiley-Blackwell

Phenomenology for Therapists: Researching the Lived World (Chapter 2, pp.43-71) – Linda Finlay – 2011 – Wiley Blackwell

Phenomenology of practice: Meaning-giving methods in phenomenological research and writing (Vol. 13) – Max van Manen – 2014- Left Coast Press

Phenomenological Research Methods – Clark Moustakas – 1994 – Sage Publications.

Interpreting Qualitative Data: Methods for Analyzing Talk, Text and Interaction – David Silverman – 2006 – Sage Publications.

Research Ethics

Lindsay, G. and Clarkson, P., (1999). Ethical dilemmas of psychotherapists. *The Psychologist*.

Module Title:	Writing the Research Project
Teaching	1 day
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

This triple module will fulfil the aim that Students develop a scientist-practitioner approach to Transactional Analysis Psychotherapy.

The Research Project is to be written within the fourth year after students have demonstrated that they are:

- Conversant with the academic discourse associated with their chosen area of investigation.
- Conversant with the conventions of modern scholarly writing, referencing, plagiarism, appendices.
- Competent in handling advanced critical, methodological and theoretical models relevant to the issues addressed in the core modules.
- Can show evidence of independence of thought capable of formulating a coherent and realisable project for their Research Project.

Learning Outcomes

On completion of the triple module students will be able to:

Produce a research Project that meets the criteria for assessment and thereby demonstrates the development of a scientist-practitioner approach to Integrative Psychotherapy or Transactional Analysis Psychotherapy as appropriate to the award being followed.

Learning and Teaching Strategies

Students will receive tutorial time throughout the period to the final submission date.

Students will be encouraged to prepare carefully for each tutorial so as to derive maximum benefit from them.

Assessment

Assessment Weighting: 100% course work.

Course Work Assignment:

A Research Project of 10,000 words in length.

Resources

Transcription

Hycner, R.H., (1985) Some guidelines for the phenomenological analysis of interview data. *Human studies*, 8(3), pp.279-303.

Bird, C.M., (2005). How I stopped dreading and learned to love transcription. *Qualitative inquiry*, 11(2), pp.226-248.

Deciding on a focus for the research

Initially, the Research Project Tutor will counsel the student on the choice of an area for study and advise on appropriate methods of inquiry. Together he/she and the student will define the topic, form and scope of the investigation. He/she will also recommend initial and preparatory reading and ensure the student has access to appropriate information and data. The student will also be helped to develop competence in identifying, recording and presenting information.

Maintaining a dialogue as the research progresses

As the work develops, students will need to discuss what they are learning from their inquiries. The Research Project Tutor acts as a 'critical friend' at this stage of the research. The Research Project Tutor will encourage an objective and critical approach to ideas, methodologies and information as the Research Project proceeds.

Reflecting on outcomes

As the investigation nears its completion, the Research Project Tutor encourage the student to reflect on outcomes, to draw together the elements of the study and to ensure that the findings are appropriately contextualised.

Advising on presentation

The Research Project Tutor will advise the student on acceptable ways of presenting the completed study, ensuring that the implications for further study are evaluated and that areas of speculation are clearly indicated.

Research Project Tutor should expect to meet with students on a regular and frequent basis. This will be particularly necessary at the planning stage. Two tutorials per term with the Research Project Tutor will normally be considered a minimum level of contact.

TIMING OF RESEARCH PROJECT COMPLETION

It is expected that the Research Project will normally be completed in a minimum of 30 weeks and a maximum of 60 weeks from the date of commencement of the first Research Project module.

It is usual to submit the Research Project by 1st March in the 4th year.

Candidates may, for good reason and on notification to the Primary Course Tutor, defer submission of their Research Projects by a period of 15 weeks (one trimester) from the expected time of submission.

APPROVAL OF INDIVIDUAL RESEARCH PROJECT

Students are required to complete a proposal form. This proposal form needs to be submitted to the Primary Course Tutor by the first week in September of their fourth year.

As a student's Research Project progresses, changes in title may become necessary or desirable. Such changes may only be made with the approval of the Primary Course Tutor.

Research proposals should be seen and commented on by the primary tutor.

PRESENTATION REQUIREMENTS

The Research Project should be:

Typed, double spaced, with 40mm margin on either side, on one side of paper only and should have:

- pages numbered;
- a title
- an abstract;
- a table of contents; chapters, sub-sections (as appropriate) and conclusion.

- a table of appendices;
- lists of illustrations, tables, figures, diagrams etc;
- Referencing of all work is a requirement. A minimum of 15 references should be included to indicate wider reading of and around the subject.
NB.Plagiarised work will be failed.
- Quotations and references must be made clear using the Harvard System.
- a list of abbreviations (where uncommon abbreviations are adopted);
-

The work should be professionally bound.

All students will be issued with detailed descriptions of the requirements, assessment criteria, and submission date for the Research Project; all Research Projects will be required to conform to the presentational requirements given. Additionally, the following binding requirements will be observed.

Copies of the thesis shall be presented in a permanent and legible form either in typescript or print. Where word processor and printing devices are used, the printer must be capable of producing text of a satisfactory quality.

A4 paper (210mm x 297mm) of good quality and sufficient opacity should be used. Only one side of paper should be used. Margins shall be as follows:

- Left (binding edge) 40mm
- Other margins 20mm
- Double or one-and-a-half spacing should be used in typescript except for intended quotations or where single spacing may be used. In footnotes or endnotes, double or one-and-a-half spacing should be used between each note.
- Pages shall be numbered at the bottom of each page consecutively through the main text including photographs and/or diagrams which are included as whole pages. Such photographs and/or diagrams shall be firmly fixed in place, and where appropriate indexed separately by reference to the facing page.

MECHANISMS BY WHICH RESEARCH-BASED PROJECT IS TO BE ASSESSED

1. The student will present a Research Project of 10,000 words in length. While recognising that length need not be an indication of quality, Research Projects are not expected to exceed 10,000 words in length.
2. The intellectual property rights of the Research-based Project rests with the student. S/he is free to enter into negotiation with Manchester Institute for Psychotherapy or other agencies as appropriate.
3. The Research Project will normally be assessed by the reading of the Research Project and exceptionally by a viva voce examination at which the ability of the student to discuss the study will be assessed.

- 4 The Research Project Tutor associated with a particular investigation will agree and assign a provisional grade to the Research Project. To ensure consistency in marking, a person not associated with the Research Project will, in addition, be asked to assign a grade as an initial moderation. Where the Tutor cannot agree a grade, the final internal grade will be recommended by the internal moderator.
- 5 Successful completion of the Research Project will not lead to the award of Diploma in Transactional Analysis with Clinical Speciality, unless the parallel clinical obligations and all other academic criteria required by the Manchester Institute for Psychotherapy are met.

CRITERIA FOR ASSESSMENT

In the assessment of Research Projects, examiners will consider in particular:

- the extent to which a student demonstrates a clear understanding of the implications of the Research Project for future practice:
- evidence that the student is likely to be able to disseminate the results of the project in an effective and informative way to colleagues and others likely to be interested.
- * the style and presentation of Research Projects should be influenced by considerations such as these as well as by models appropriate to different kinds of research report, in which students should demonstrate:
 - familiarity with the received critical, methodological and theoretical literature associated with Transactional Analysis psychotherapy;
 - the ability to augment or provide an argued alternative to the received literature associated with Transactional Analysis psychotherapy;
 - a thorough grounding in appropriate research methodologies and the academic discourse associated with psychotherapy studies;
 - where appropriate, the ability to collect data and analyse it according to accepted models of analysis;
 - the ability to examine critically available models of analysis;
 - where appropriate, the ability to propose alternative or hypothetical models of analysis.
 - the ability to evaluate the outcomes of inductive and/or deductive analysis with regard to the material under consideration.
 - an ability to sustain, from evidence submitted, a reasoned argument and to draw consistent and coherent conclusions;
 - the ability to ensure that the findings of the project are appropriately contextualised;

- the ability to be self-critical in assessing the contribution made to learning by the Research Project.

For the award of Distinction, the enquiry undertaken in the Research Project must, in addition to the criteria above, represent a significant contribution to knowledge.

RESEARCH PROJECT – GENERAL INFORMATION

A Transactional Analysis Psychotherapy theme will permeate the Research Project, as well as being a specific focus of Transactional Analysis psychotherapy Theory and Practice.

The thesis/argument/theme is the thread that holds the Research Project together as well as being a focus of exploration in all chapters.

STRUCTURE OF RESEARCH PROJECT

The Research Project will normally include the following sections. They need not all apply to a particular study but the advice of the Research Project Supervisor should be sought about this and about the relative weight given to the different sections.

1. Outline of Research: This should include a short abstract which provides a summary of the context of the Research Project i.e., the aims of the study, methods and results of research. It is not necessary to present discussions, arguments or evidence at this point. This section is probably the last to be written.
2. Introduction: This may include a range of reasons and motivations for the investigation. It may also include links to practice or a discussion (social, institutional, psychological) in which the investigation is located.
3. Review of Previous Research/Literature: The review is intended to make the most effective use of background reading and enables the study to be located alongside others. The review should critically evaluate the theoretical approaches used, and the conclusions reached in published studies. The review should particularly address similarities and differences in theoretical approaches adopted by different authors and researchers.

This is probably the first section to be written enabling the study to move forward.

4 Research Methodology:

- Discuss the choice of research methods, their strengths and limitations.
- Explain the design of the research and the relationship between the methods and the kinds of information being sought.
- Give reasons for the choice of people and other sources used to obtain information/data.

- Show how people and sources were chosen and comment on any relevant sampling issues.
- reflect on the use of the research methods and the research outcomes.

5. Findings and Discussion:

This section should include a consideration, preferably under a number of sub-headings, of the research findings in the light of the literature review, the theoretical approach and the chosen conceptual frameworks.

It might well consider in some depth the implications of the findings for Integrative Transactional Analysis psychotherapy practice, the provision of this practice and issues for further research.

Section 10.4 and 10.5 need to be considered together. Though they can be written separately, they should add up to a clear description and analytical discussion without duplication.

6. Summary and Conclusion:

This obviously refers in summary form to the main issues and implications referred to in the title and Research Project. In addition to this it may include a statement of:

- personal learning
- awareness of the implications of the findings/conclusions
- awareness of further work which may be developed from the Research Project.

REFERENCES

These should be given in accordance with the Library paper Citations, references. All work must be fully referenced using the Harvard system. Plagiarism will result in a failed paper.

STYLES OF WRITING

The purpose of the Research Project is to present the products of a serious study in a clear, dispassionate manner. Try to avoid jargon and write simply. Unfamiliar terms should be defined. Tenses should be consistent and the past tense is normal. While it is usual to avoid the first person and use the third, do not make complicated and difficult construction to achieve this. Where you are directly reporting what you did, use the first person but check out such instances with your Research Project Tutor.

BINDING

A good bookbinder will be able to bind the completed work.

Year 3 Weekend 8

Module Title:	Mental Health Module (3 days)
Taught:	1 weekend over 3 days
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context: The purpose of this module is for trainees to gain insight into the care and support provided by the NHS and private organisations, available to people diagnosed with a psychopathology.

For those students with little experience in mental health settings, then a 20 day placement must be successfully undertaken.

This module should be studied alongside the notes contained in **Appendix 8**.

Learning Outcomes:

1. To develop a basic understanding of psychiatry and the mental health system, the rights of patients and the psycho- social issues involved.
2. Understand the main principles of the mental health act and the procedures for compulsory admission and detention of patients.
3. Enhance working practices with mental health professionals.
4. To become familiar with psychiatric assessment and the planning of a range of interventions and evaluation procedures.
5. To understand a range of mental health illnesses that can lead to involvement in the mental health system.
6. To familiarise themselves with the different types of intervention used, including medication and ECT and their main side effects.

Indicative Content:

- Historical developments in Psychiatry
- Psychiatric assessment and treatments
- Neurobiology
- Pharmacology
- Psychopathology and the DSM 5R (2015)
- Psychiatry and Psychotherapy
- Appendix 8
- Supervision
- Assessment
- Placement
- Clinical observations

Teaching and Learning:

The strategy for this module will reflect the overall aim of providing a specialised integrated education including both theory and personal development. The major emphasis will be on the theoretical component of the integrated day with periods set aside for personal development through the vehicle of group feedback. The module provides 21 hours contact time with the module tutor.

Assessment

Trainees are required to successfully complete a 21 day mental health placement before the end of their training.

The Co-ordinator of the Mental Health Placement Programme is required to confirm that students have completed the Programme.

Resources

Sociopath: The Sociopath Laid Bare – Carol Franklin – 2016 – Create Space Independent Publishing Platform

Understanding Personality Disorders – Duane Dobbert – 2010 – Rowman & Littlefield Publishers

Personality Adaptations – Vann Joines and Ian Stewart, 2002

Year 3 Weekend 9

Module Title:	Formal case study and audio recording evaluation.
Taught:	1 weekend
Credit level:	7
Pre-requisite:	Previous Core Modules and full attendance
Co-requisite:	Parallel Clinical Obligations and full participation

Context: In this weekend the tutor will explain what the formal 5,000 word case study is (MIP Graduation) and also explain what the trainee/student will have to do to complete the requirement of the 10,000 word case study if they decide to go for UKCP registration after graduation.

Indicative content:

1. The teaching component will be breaking down how the student will write and clinically assess the writing of the case study as well as explaining clinical theory to practice.
2. The tutor will also go through audio recording transcripts of clinical sessions, teach how this is done and evaluate practice.
3. The tutor will also demonstrate the above process as well as taking questions and feedback throughout the weekend.

Learning Outcomes:

The student will gain a clear understanding of the pass standard requirements for the 5,000 words case study and the format for the 10,000 case study if the student decides to go for registration after MIP graduation.

Learning and teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Understand Group process
- Understand Theory (didactic and experiential)

Resources:

There are no books concerning the case evaluation and transcript process as that is more a taught critique in house.

Year 3 Weekend 10.

Module Title:	Course Evaluation, Formal and Peer assessment.
Taught:	1 weekend
Credit level:	7
Pre-requisite:	Previous Core Modules and full attendance
Co-requisite:	Parallel Clinical Obligations and full participation

Context:

Learning Outcomes:

On completion of the module students will be able to:

1. Evaluate the course modules based on
 - Teaching and learning
 - Inclusiveness of language and teaching style
 - Appropriateness of language and teaching style
 - Resources up to date, clearly written.
 - Classroom organisation and management
2. Evaluate their own appropriateness within the classroom environment
 - Their own ability to learn
 - Their own organisation and management of self
3. Evaluate their peers ability to work as part of a group
4. Evaluate their peers ability to contribute and participate to the overall group learning experience
5. Share their own experience of group members.

Indicative Content:

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External experience
- Theory (didactic and experiential)
- Supervision

Indicative content:

Learning and teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Understand Group process
- Understand Theory (didactic and experiential)

YEAR 4 MODULES

Year 4 Weekend 1

Module Title:	Research progress and feedback, How to build a social media presence
Taught:	1 weekend
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context:

Saturday will include research teaching and feedback on how the students have chosen their research topic and if they have submitted the ethical framework and practical implications of the research topic.

Sunday will include a visiting trainer who is an expert on building up social media and online presence for the students and teaching them what this means and how to implement this process themselves.

Learning Outcomes:

1. Students will have had an opportunity to discuss their research area and ethical considerations.
2. Students have an opportunity to identify and overcome practical implications regarding their research project.
3. Students will learn the intricacies of social media and advertising

Indicative Content:

- Research Ethical Framework
- Professional Code of Conduct

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External Experience
- Theory (didactic and experiential)
- Supervision

Assessment

There is no formal assessment attached to this module

Year 4 Weekend 2

Module Title:	Contracting; supervision; clinical placement; and evaluation.
Taught:	1 weekend
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

In this module students will become familiar with a range of strategic interventions applicable to contracting with the client which will relate practice to theory.

Learning Outcomes

On completion of the module students will be able to:

1. Critically analyse the concept of the contractual method in relationship to ; ethics and supervision; assessment and clinical evaluation
2. Critically evaluate the concept of the contractual method in relationship to ; ethics and supervision; assessment and clinical evaluation

Indicative Content

- Contractual method and the ethical practitioner
- Placement and contracting
- Theory in ethics, supervision; assessment and clinical evaluation
- Practice in ethics, supervision; assessment and clinical evaluation
- Philosophy in ethics, supervision; assessment and clinical evaluation
- MIP/UKCP Code of Ethics
- Effective use of supervision

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External experience
- Theory (didactic and experiential)
- Supervised practice in large group
- Supervised peer practice in small groups

Assessment

Assessment Weighting: 100% course work.

Course Work Assignment:

End of year 5000 word case study.

The Art of Relational Supervision: Clinical Implications of the Use of Self in Group

Year 4 Weekends 3 to 9

Module Title:	Diagnosis and Treatment Planning using Strategic Interventions with the Personality Disorders.
Taught:	7 modules
Credit Level:	7
Pre-requisite:	Previous Core Modules
Co-requisite:	Parallel Clinical Obligations

Context

In these modules, students will become familiar with the diagnosis of and a range of strategic interventions applicable to the Personality Disorders of the client which will relate practice to theory.

Learning Outcomes

On completion of the module students will be able to:

1. Diagnose and plan the treatment for a variety of Personality disorders
2. Critically evaluate strategies of interventions with the Personality disorders

Indicative Content

- Obsessive Compulsive personality disorder
- Schizoid personality disorder
- Narcissistic personality disorder
- Borderline personality disorder
- Histrionic personality disorder
- Paranoid personality disorder
- Passive Aggressive and Anti-social personality
-

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External experience
- Theory (didactic and experiential)
- Supervised practice in large group
- Supervised peer practice in small groups

These modules provide 112 hours contact time with the module tutor.

In order to integrate theory with clinical practice a high degree of student effort is required: appropriate clinical supervision, 40 hours personal psychotherapy, 35 hours self-directed study including course work preparation.

Entries in the Personal Learning Journal which will accumulate in a formative way towards assessment of the Module on Personality Adaptations and Communication Styles in this stage.

Assessment

Assessment Weighting: 100% course work.

Year 4 Weekend 10.

Module Title:	Course Evaluation, Formal and Peer assessment.
Taught:	1 weekend
Credit level:	7
Pre-requisite:	Previous Core Modules and full attendance
Co-requisite:	Parallel Clinical Obligations and full participation

Learning Outcomes:

On completion of the module students will be able to:

1. Evaluate the course modules based on:
 - Teaching and learning
 - Inclusiveness of language and teaching style
 - Appropriateness of language and teaching style
 - Resources up to date, clearly written.
 - Classroom organisation and management
2. Evaluate their own appropriateness within the environment:
 - Their own ability to learn
 - Their own organisation and management of self
3. Evaluate their peers ability to work as part of a group
4. Evaluate their peers ability to contribute and participate to the overall group learning experience
5. Share their own experience of group members.

Indicative Content:

Learning and Teaching Strategies

The strategy adopted for this module will reflect the overall aim of providing a specialised integrated education including person development, theory, clinical practice and clinical supervision. The module is organised to provide for:

- Group feedback with regards to their Internal/External experience
- Theory (didactic and experiential)
- Supervision

PERSONAL THERAPY

1. Personal development is fundamental to, and permeates the whole of the modular programme.

Specifically, personal therapy will facilitate students to:

- (a) Relate significant aspects of Integrative Transactional Analysis theory to their own personal development.
 - (b) Develop sufficient insight as to be able to make increasingly mature assessment of their own personal history and current level of functioning with individuals and groups.
 - (c) Be able to relate personal insights to clinical practice, especially in the understanding of transference issues.
2. Students are required to be in personal therapy for the duration of the modular programme and on a regular weekly basis. This will be no less than 40 hours each year. The financial cost of meeting the course requirements for personal therapy is **not** included in the course fees. Students will pay for therapy directly to their therapist.
 3. Primary Course Tutors will need to be informed by students as to the name and UKCP registration number of their therapist.
 4. Students will be required to complete a therapy log, as a record of their therapy hours, up to 31st August each year, to be signed by the therapist, and handed over to the Primary Course Tutor.
 5. The content and nature of a student's personal therapy is confidential. The contract for therapy remains at all times between the student and the therapist, as such MIP will not request information regarding the content or nature of therapy from the student's personal therapist.

THERAPIST'S RECORD FORM

Please ask your therapist to complete this form in discussion with you.

Please return to M.I.P. for the attention of your trainer.

Thank you.

Trainee's Name: _____

Therapist's Name: _____

Therapist's since (date): _____

This is to confirm that: _____ is in regular ongoing therapy with me.

How many hours already achieved from beginning of this Academic Year?

Total = _____

Trainee's signature: _____ Date: _____

Therapist's signature: _____ Date: _____

Please note that you have up to August 31st to complete this form and send it back to MIP. At the end of each year MIP will ask for a copy of this form indicating where you are up to in terms of hours at the present time.

SUPERVISION

1. Definition

Clinical supervision may be described as a form of meta therapy. The supervisor's client is neither the supervisee nor the supervisee's client but rather the relationship between them. Thus, a clinical supervisor helps to explore the therapeutic relationship with a view to developing the therapeutic competence of the supervisee and with regard to the well being of the client. As a result of such exploration all members of the triad – client, supervisee and supervisor – may learn and grow.

2. The Humanistic & Integrative Section (HIPS) of UKCP published a revised set of training standards in June 2000 which specify that trainees should have supervised hours in the approach to be practised.
3. Students need a minimum of 450 supervised client contact hours prior to UKCP registration. UKCP and MIP stipulate a ratio of one hours supervision to six client hours (1:6). Group supervision also reflects this ratio. Students are required to undertake 100 supervised placement hours. All supervision hours need to be with a UKCP registered Clinical Supervisor.
4. The financial cost of meeting the minimum requirements for clinical supervision are not included in the course fees. A student will make his/her own arrangements for the payment of clinical teaching supervision fees direct to his/her clinical supervisor, with the exception that MIP trainees will receive a maximum of 17 supervision hours included in the cost of the training.
5. MIP will provide students with the names of clinical supervisors who have evidenced a certain level of ability to establish a relationship between the theory of Integrative Transactional Analysis Psychotherapy and Clinical Practice.

A clinical supervisor thus recommended by MIP will have likely met the following criteria:

- 5.1 Completed a professional training in Transactional Analysis psychotherapy.
- 5.2 Registered with the United Kingdom Council for Psychotherapy.
- 5.3 Completed a minimum of 3 years post qualifying clinical practice.
- 5.4 Completed an established and/or recognised training course in Clinical Supervision.
- 5.5 Abides by a Code of Ethics and Professional Practice that is compatible with the Code of Ethics of the Manchester Institute for Psychotherapy, the United Kingdom Council for Psychotherapy and the European Association for Psychotherapy.
- 5.6 The content of all supervision sessions is confidential. It is the responsibility

of the student to explain the boundaries in confidentiality with their client in order to effect supervision. Supervisees are required to explain the same process with regards to recordings of client sessions. This is included in the written contract and should be adhered to within external placements.

6. MIP expects supervisors to complete a Mid Term report (after 50 placement hours) and an End Term report (after 100 hours). A blank copy will be given by the supervisee to the supervisor who will complete it and return it to the trainer via the supervisee.

STUDENT RECORD OF PARALLEL OBLIGATIONS

It is the responsibility of the Primary Programme Tutor to record the completion or otherwise of the parallel clinical obligations below.

Tutor's Name:

Student's Name

Year 1

Number of Training Hours Achieved

Number of Personal Therapy Hours Achieved

Essay Grades 1st 2nd

If a student has completed the year but not all the academic requirements, please state what outstanding work is required:

If a student has completed the year and all the academic requirements, but not the parallel clinical obligations, please state what is outstanding:

If a student has to complete outstanding academic requirements, or clinical obligations, please state what agreement has been made:

Student signature: **Date**

Tutor signature **Date**

NB The student will not be awarded the Diploma in Integrative Transactional Analysis in Psychotherapy with Clinical Speciality until all academic and clinical requirements of MIP are in pass status.

TRANSACTIONAL ANALYSIS PSYCHOTHERAPY TRAINING

Peer and Tutor Assessment Form

Date: **Name of person being assessed:**

Name of person writing this assessment:

- 1) What have you most appreciated about me.
- 2) How would you describe my contribution to the training group?
- 3) What have you not appreciated?
- 4) How have you experienced me relating to you and others?

Is there anything more you would have liked from me?

Anything less?

- 5) Are there any Script issues that seem figure?
- 6) In what ways have you experienced me developing/changing over the past year or more?
- 7)
 - a) How would you describe my capacity to give feedback.
 - b) How would you describe my capacity to receive feedback.
- 8) What personal work would you think I could focus on in the year ahead?
- 9) What do you consider my strengths or weaknesses in my knowledge and application of Transactional Analysis psychotherapy?
- 10) Why would you refer clients to me, if at all?

TRANSACTIONAL ANALYSIS PSYCHOTHERAPY TRAINING

Self Assessment and Goal Setting

Trainers/Supervisor's Name

Student's Name: **Date:**

Below are listed specific areas relevant to the competent practice of psychotherapy. On a scale 1 to 7, rate your present level of competence by putting a tick. Go back over each areas of competence and select those areas you would like to improve upon or develop further. Indicate these areas by drawing a circle around the appropriate number.

- | | | | | | | | |
|--|-------------------|---|---|---------------------------|---|---|-------------------|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| | areas of weakness | | | satisfactory in this area | | | areas of strength |
-
- a My ability to formulate the client's problems in terms of Transactional Analysis psychotherapy theory.

	1	2	3	4	5	6	7
--	---	---	---	---	---	---	---

 - b Clarity, precision, timing and effectiveness of my interventions.

	1	2	3	4	5	6	7
--	---	---	---	---	---	---	---

 - c Range, flexibility and creativity of my approach.

	1	2	3	4	5	6	7
--	---	---	---	---	---	---	---

 - d Quality of contact between myself and my clients, including the awareness and availability of your own process.

	1	2	3	4	5	6	7
--	---	---	---	---	---	---	---

 - e Awareness of ethical considerations and limits of competence.

	1	2	3	4	5	6	7
--	---	---	---	---	---	---	---

 - f Anticipation and predictions of Transactional Analysis psychotherapy process i.e., the ability to chart the general direction of therapy.

	1	2	3	4	5	6	7
--	---	---	---	---	---	---	---

 - g Ability to practice inquiry, attunement, involvement.

	1	2	3	4	5	6	7
--	---	---	---	---	---	---	---

 - h Understanding of developmental issues.

	1	2	3	4	5	6	7
--	---	---	---	---	---	---	---

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

Code of Ethics & Professional Practice

This code should be read in conjunction with the UKCP Code of Ethics and Professional Practice, and also the UKATA and BACP Codes of Ethics for further information/clarification if required.

Therapists are responsible for the observation of the principles inherent in the Code of Ethics and Professional Practice and are to use the Code as the basis of good practice rather than a set of minimal requirements. The Code of Ethics and Professional Practice will be revised periodically to ensure compatibility with the new Code of Ethics and Professional Practice of the United Kingdom Council for Psychotherapy (October 2019).

1. JURISDICTION

- 1.1 The Code applies to all categories of membership of MIP – Trainee, Graduate, Primary Course Tutors and visiting trainers – in the management of their professional responsibilities to clients, colleagues within MIP and the wider profession.

2. INTENTION

The Code of Ethics and Professional Practice is intended to:

- 2.1 Protect and inform members of the general public who are inquiring about, or receiving, training or clinical services of MIP members.
- 2.2 Make clear and explicit the standards of professional practice of MIP members and promote good practice.
- 2.3 In the event of a breach of ethics and professional practice the Complaints Procedure may be invoked and appropriate sanctions may include suspension or exclusion of membership.
- 2.4 MIP is required to report to the UKCP the names of members whose membership has been suspended or terminated.

3. CLIENT-THERAPIST RELATIONSHIP

- 3.1 This is a professional relationship within which the welfare of the client is the therapist's primary concern.
- 3.2 The dignity, worth and uniqueness of the client is to be respected at all times.
- 3.3 It is the therapist's aim to promote increased awareness, encourage self-support,

and facilitate the self-development and autonomy of clients with a view to increasing the range of choices available to them, together with their ability/willingness to accept responsibility for the decisions they make.

- 3.3.1 Therapists are responsible for working in ways which enhance their client's sense of empowerment, their capacity to become self-supporting, their ability to make creative choices and changes in response to their evolving needs, circumstances, values and beliefs.
- 3.3.2 Therapists should be respectful of their client's age, health, gender, sexuality, religion, ethnic group, social context and any other significant aspects of their life.
- 3.3.3 Therapists should provide regular opportunities with the client to review the terms of the therapeutic contract and the progress of therapy.
- 3.3.4 Decisions regarding the termination of therapy are the joint responsibility of client and therapist. Should a therapist's professional assessment not accord with a client's decision to terminate, a therapist should facilitate termination in a manner that is respectful of the client's autonomy. Termination of therapy or facilitation of a change of therapist should be managed with care and consideration for the client's dignity and well-being.
- 3.4 Therapists must recognise the importance of a good relationship for effective therapy and be mindful of the power and influence this responsibility gives them. The therapist must act in a manner consistent with this recognition and not exploit clients in any way, for their own personal advantage or their own needs.
 - 3.4.1 Therapists should not take money under false pretences – knowingly retaining a client, after therapy has ceased to be effective. Fees must not be changed without prior negotiation with the client.
 - 3.4.2 A physical, sexual relationship with a client is exploitative and unethical.
 - 3.4.3 Sexual harassment in the form of deliberate or repeated comments, gestures, or physical contacts of a sexual nature that are, or could be, considered offensive by the client, are unethical.
- 3.5 Therapists need to be aware when other relationships or external commitments conflict with the interests of the client. When such a conflict of interest exists it is the therapist's responsibility to declare it and be prepared to work through the issues with the client.
- 3.6 Therapists need to recognise that dual relationships – where the client is also an employee, close friend, relative, or partner – will likely impair their professional judgement and cause undue stress to clients and themselves.
- 3.7 It is the therapist's responsibility to manage any future relationship with the client, once the therapeutic relationship has ended. The therapist needs to be aware of potential exploitation and should take professional advice if they feel there is a possibility of boundaries being blurred.

4. CONFIDENTIALITY

- 4.1 Confidentiality is intrinsic to good practice. All exchanges between therapists and client must be regarded as confidential. Where a therapist has any doubts about the limits of confidentiality they should seek supervision..
- 4.2 A client should be informed at the outset of therapy (as part of the therapist-client contract) that in extreme circumstances where the client is a danger to themselves, or others, a therapist may break confidentiality and take appropriate action.
- 4.3 When a therapist wishes to use specific information gained during work with a client, e.g. in a lecture or publication, the client's permission should be obtained and anonymity preserved. Clients should be informed that they have the right to withdraw consent at any time.
- 4.4 Therapists should provide a working environment which ensures privacy.
- 4.5 Therapists should not make trivialising comments about clients.
- 4.6 Therapists must maintain confidentiality after the completion of therapy.

5. CLIENT SAFETY

- 5.1 Therapists must take all reasonable steps to protect clients from physical or psychological harm during therapy.
- 5.2 When a client develops a medical condition, therapists should encourage the client to obtain advice from their doctor or other suitably qualified person. Therapists should obtain clients` permission before contacting other professionals, unless there are overriding safety, ethical or legal considerations.
- 5.3. Therapists must make provisions for clients to be informed in the event of the therapist's serious incapacity or death. Responsibilities will include management of a clinical will, confidential files and audio/video recordings.

6. SOCIAL MEDIA

Please refer to MIP's Social Media Policy.

7. INITIAL CONTRACTING

- 7.1 Contracts with clients, whether written or verbal, should be explicit regarding fees, payment schedule, holidays, cancellation of sessions by client or therapist. The length of therapy, referring on of clients and terminations, are discussed with clients and mutual agreement sought. This should be done at the outset before any commitment is made to ongoing therapy. Subsequent changes to the contract must be negotiated and agreed with the client.
- 7.2 If requested by a client, therapists should provide information about their

qualifications and experience.

- 7.3 If requested by a client, therapists should refer clients to the MIP Codes of Ethics and Professional Practice and MIP Complaints Procedure.
- 7.4 Therapists must inform clients if they become aware of any relevant conflict of interest at the initial interview or at any subsequent stage of therapy.
- 7.5 Therapists are responsible for setting and monitoring the boundaries between a professional relationship and a social one, and for making such boundaries explicit to the client.

8. COMPETENCE

- 8.1 Therapists accept clients commensurate with their training, skill and supervision arrangements.
- 8.2 Therapists should pay attention to the limits of their competence. Where a therapist recognises they are reaching their limit, then consultation with a colleague and/or supervisor is essential. It may be appropriate to refer the client to someone else.
- 8.3 Therapists have a responsibility to maintain their own effectiveness and ability to practice. Therapists should not work with clients when their capacity is impaired for any reason.
- 8.4 Therapists should protect their own physical safety when engaged in therapy.
- 8.5 Therapists must secure professional insurance to protect themselves in the event of legal action being taken against them or against the owners of premises in which they work.
- 8.6 Therapists should have appropriate therapeutic and supervisory support to maintain ethical and professional practice.

9. SUPERVISION

- 9.1 Supervision provides a challenging and supportive context for therapists to share their work, enhance their practice and protect the client. Therapists should not practice without appropriate levels of supervision.
- 9.2 A therapist's supervisor should not be their therapist.
- 9.3 Therapists, together with their supervisors, share responsibility for maintaining a focus on supervision which is purposeful and relevant to the therapist's clinical practice.

10. CONTINUED DEVELOPMENT

- 10.1 Therapists have a particular responsibility to continue their personal and

professional development through any or all of the following: personal therapy, regular supervision, further training, research, publication.

11. RECORDS

- 11.1 Therapists should keep adequate client records which must be kept safely under secure conditions, in line with the GDPR.
- 11.2 As a minimum, records should include client's:
- name, address and telephone number
 - name and telephone number of general practitioner
 - details of any current involvement with other members of the caring professions, if applicable
 - information regarding significant medical problems
 - ongoing case notes
- 11.3 Therapists must ensure that computer based records comply with the requirements of the Data Protection Act 2018 and their electronic equipment is registered with the I.C.O.

12. ADVERTISING

- 12.1 Advertising should be confined to descriptive statements about the services available and the qualifications of the person providing them. Advertising should not include testimonials, make comparative statements, or in any way imply that the services concerned are more effective than those provided by other schools of therapy or organisations. Therapists should refrain from claiming qualifications they do not possess.
- 12.2 Trainee Therapists should not describe themselves as a psychotherapist.
- 12.3 Therapists should not describe themselves as affiliated to any organisation in such a manner that inaccurately and improperly implies or suggests authorisation or sponsorship by that organisation.

13. RESEARCH

- 13.1 Therapists are obliged to conduct any research in counselling and/or psychotherapy with ethical endeavour and to follow the UKCP and MIP guidelines for ethical practice in research.

14. LEGAL PROCEEDINGS

- 14.1 Therapists should be reasonably conversant with the legal implications of their work as psychotherapists, and have access to legal advice, and consult with their professional indemnity insurers.

14.2 A therapist of MIP who is convicted in a Court of Law for any criminal offence, or is the subject of a successful civil action by a client, should inform MIP and the UKCP.

14.3 Therapists who become aware of a specific crime in the course of their clinical practice, whether current or past, should seek supervisory and legal advice immediately.

15. RESPONSIBILITIES TO THE PSYCHOTHERAPY PROFESSION

15.1 Therapists should not accept anyone as a client if they are already the client of another counsellor/psychotherapist.

15.2 Therapists should conduct themselves personally and professionally in ways that promote the confidence of the general public in the professions of psychotherapy.

15.3 A therapist who is concerned about the professional conduct of another therapist, should discuss their concerns with this person. In the event that the matter cannot be resolved satisfactorily, it should be escalated to the Director who may then invoke the MIP Complaints procedure.

16. SAFEGUARDING

16.1 MIP strongly recommends that the needs of the individual is honoured, and promotes a pro-active safeguarding policy for children and vulnerable adults, when appropriate.

16.2 The therapist, when faced with safeguarding issues, will contact their own supervisor. When appropriate, a referral will be escalated to the local authority, the police and other professional agencies.

16.3 It is a requirement that every trainee and therapist who works with the general public has a DBS Certificate. This needs to be updated every 3 years.

16.4 When working with children, appropriate regular supervision by a child and adolescent specific supervisor must be in place.

16.5 All therapists working at MIP who have clients under 18 years of age, need to be in possession of a specific qualification or working towards qualification to work with children and young people. This qualification must be recognised by the UKCP and/or the BACP.

Please refer to MIP's Safeguarding Policy for further information.

continued over

17. PROFESSIONAL MISCONDUCT

- 17.1 Professional practice which falls short of the required standards may result in the termination of membership of MIP or termination of their services.

This policy will be reviewed regularly every 18 months and updated a minimum of every 36 months.

Last Reviewed & Revised April 2020

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

CODES OF PRACTICE FOR TRAINERS AND TRAINING ESTABLISHMENTS

This document should be read in conjunction with the UKATA Code of Ethics and Professional Practice, The Code of Ethics of the Manchester Institute for Psychotherapy and the requirements of the course programme in which a student trainee is engaged.

“UKCP” means United Kingdom Council for Psychotherapy.

1. The Code is to be read and interpreted in conjunction with other UKATA Policies.

2. OBJECTIVES

The objectives of the Code are:

2.1 To promote excellence in TA training, and to ensure that TA psychotherapy training is delivered to high professional standards.

2.2 To provide RTEs, Trainers, Principal Supervisors, Supervisors and Trainees with a code of practice within which to operate professionally and in accordance with the requirements of UKATA, EATA & UKCP (HIPS) as may be imposed upon them individually or collectively, from time to time.

Code of Practice for Psychotherapy Trainers and Training Establishments

3. INTERPRETATION

3.1 In this document (including the heading) the following words and expressions shall have the following meanings:

“BACP” means the British Association for Counselling & Psychotherapy.

“Code” means this Code of Practice for Psychotherapy Trainers & Training Establishments (as hereinafter defined) and any subsequent variations and/or amendments hereto, issued by Training Standards Committee.

“Contractual Trainee” means a Trainee who has entered into an EATA CTA training contract.

“COSCA” means Counselling & Psychotherapy in Scotland, a Company limited by guarantee and registered in Scotland.

“CPD” means Continuing Professional Development required by EATA/UKCP(HIPS)/UKATA to be undertaken by qualified members.

“CTA” means a Certified Transactional Analyst with Psychotherapy speciality and registered as such with UKATA.

“EATA” means the European Association for Transactional Analysis.

“EC” means the Ethics Committee of UKATA.

“HIPS” means the Humanistic and Integrative Psychotherapy Section of UKCP.

“UKATA” means the United Kingdom Association of Transactional Analysis.

“UKATA Administrator” means the person appointed by UKATA responsible for running the day- to- day administration of UKATA.

“Monitoring Documents” means (i) Monitoring of RTEs issued by TSC and (ii) the Monitoring Checklist used by TSC

“Principal Supervisor” means a P/TSTA with whom a Contractual Trainee enters into an EATA training contract.

“PPC” means the Professional Practice Committee of UKATA.

“PTP” means a full programme of psychotherapy training leading to qualification of CTA and registration with UKCP(HIPS).

“PTSTA(P)” means a Provisional Teaching and/or Supervising Transactional Analyst with Psychotherapy speciality registered with UKATA.

“Registered Trainee” means a Contractual Trainee who is listed in the UKATA Register of practitioners.

“Registration Policy” means the Registration Policy Document of UKATA

“RTE” means a Registered Training Establishment(s) as more fully defined in the Registration Policy.

“ITAR” means UKATA representative of the Training Establishment

“Supervisor” means an individual who provides supervision.

“TA” means Transactional Analysis.

“Trainee” means an individual undertaking TA training within an RTE.

“Trainer” means an individual qualified and endorsed by EATA to provide TA training.

“TSC” means the Training Standards Committee of UKATA.

“TSTA(P)” means a Teaching and/or Supervising Transactional Analyst with Psychotherapy speciality registered with UKATA.

3.3 To set out the respective roles and responsibilities of TSC, RTEs, ITARs, Trainers, Principal Supervisor, Supervisors and Trainees in accordance with the requirements of UKATA, EATA & UKCP (HIPS) as may be imposed upon them individually or collectively, from time to time.

3.4 To ensure that the international standards of training set out and amended, from time to time, by EATA, are maintained by all RTEs, Trainers, Principal Supervisors, Supervisors and Trainees at all times in the UK.

3.5 To ensure that the UK national standards of training set and amended from time to time by UKCP (HIPS), are maintained by all RTEs, Trainers, Principal Supervisors, Supervisors and Trainees at all times.

3.6 To ensure that members of the public seeking training in TA are as fully informed as possible of the procedures, commitment and qualifications required in order to undertake TA training as a psychotherapist.

3.7 To ensure, as far as possible, that (i) the high standards of excellence currently existing in TA training and practice are maintained, updated and improved in accordance with the requirements from time to time, imposed by UKATA, EATA & UKCP (HIPS) and (ii) Trainees are appropriately prepared to provide services with a reasonable level of professional competence.

3.8 To ensure that all necessary and relevant statutory requirements that may be imposed from time to time, on RTEs, Trainers, Principal Supervisors, Supervisors and Trainees are complied with.

3.9 To ensure that all necessary and relevant additional requirements imposed on RTEs, ITARs, Trainers, Principal Supervisors, Supervisors and Trainees involved in TA training by UKATA, EATA, UKCP (HIPS), other applicable professional bodies and academic institutions are, where appropriate, complied with.

3.10 The interpretation and monitoring of the implementation of the Code shall be the responsibility of TSC.

4. RESPONSIBILITIES OF RTEs.

The responsibilities of RTEs shall include, but are not limited to the following:

4.1 To adhere to and disseminate current UKATA Codes and Policies

4.2 To set out a clear statement of its overarching philosophy and policies pertaining to the provision of TA training.

4.3 To provide a clear statement of the nature, goals, educational aims and objectives and requirements of all TA Psychotherapy Training Programmes being delivered by the RTE.

4.4 To provide all Trainees with a clear written administrative contract including (i) details of fees for the Psychotherapy Training Programme and all ancillary costs for each stage of the training (in order to ensure the Trainee is aware of the level of financial and personal commitment involved) and (ii) a statement outlining the obligations of the RTE to use all reasonable endeavours to assist Trainees in finding suitable alternative TA training in the event of the RTE ceasing to offer and provide a training programme leading to CTA qualification

4.5 To provide a clear written statement setting out the relevant qualifications and experience of all Trainers, Principal Supervisors and Supervisors (and where appropriate, other staff) providing TA training.

4.6 To comply with any and all other requirements, recommendations and sanctions imposed on RTEs from time to time, in writing by TSC by a specific complaint and appeal process and endorsed by UKATA Council in so far as these relate to the provision of TA training.

4.7 All psychotherapy training courses that lead to the qualification of CTA and registration with UKCP (HIPS) will be provided by UKATA Registered Training Establishments and will comply with UKCP (HIPS) training requirements.

4.8 To provide a clear written statement of (i) the content (ii) objectives and (iii) methodology and assessment criteria for all Psychotherapy Training Programmes.

4.9 To provide a clear written statement of the level of confidentiality to be maintained by the RTE in order to protect Trainees' personal and professional details and material and to ensure all staff, including Trainers, adhere to the level of confidentiality imposed. This includes a statement regarding the level of communication between the Trainee's Supervisor and the relevant RTE. The handling of Trainee files and written work must be in compliance with the current Data Protection Act.

4.10 To provide a clear written statement setting out the requirement for Trainees to enter into (i) supervision with an appropriate supervisor and (ii) personal therapy with an appropriate psychotherapist in order to comply with the requirements of UKCP (HIPS) and the level of confidentiality to be maintained between the RTE, Trainer, Principal Supervisor, Supervisor and Trainee at all times.

4.11 RTEs are to make Trainees aware of the current requirements for membership of UKATA.

4.12 RTEs will annually submit at the start of the training year a list of their Trainees to the UKATA Administrator for cross-checking of the membership status of Trainees and to enable UKATA to maintain accurate records.

4.13 RTEs will comply with any sanction(s) imposed by TSC and endorsed by UKATA Council after due process.

5. RESPONSIBILITIES OF TRAINERS

The responsibilities of Trainers shall include but are not limited to the following:

5.1 To ensure that they are at all times, informed of and compliant with all requirements of UKATA, EATA and UKCP (HIPS), as may be amended from time to time for the provision

of TA training.

5.2 To ensure that all training delivered which leads to CTA with psychotherapy speciality is delivered at post graduate level in accordance with UKCP (HIPS) requirements.

5.3 To ensure that all training delivered promotes equality of opportunity in accordance with the equal opportunities policy of the UKATA and RTEs.

5.4 To undertake a programme of CPD to ensure maintenance and development of skills and knowledge in their work and to adhere to the current UKATA CPD policy.

5.5 All Trainers must have regular appropriate supervision of their training and supervision practice.

5.6 Trainers will comply with any sanction(s) imposed by TSC and endorsed by UKATA Council after due process.

5.7 Trainers will adhere to the level of confidentiality imposed by the RTE in respect of Trainee information and any other additional levels of confidentiality imposed by RTEs regarding its training courses and/or programmes.

6. RESPONSIBILITY OF SUPERVISORS

The responsibility of Supervisors shall include but are not limited to the following:

6.1 To ensure that they provide supervision which promotes the professional development of their supervisees, in accordance with EATA and UKCP (HIPS) standards.

6.2 To undertake a programme of CPD to ensure maintenance and development of skills and knowledge in their work and to adhere to the current UKATA CPD policy.

7. RESPONSIBILITIES OF THE PRINCIPAL SUPERVISORS

The responsibilities of Principal Supervisors shall include but are not limited to the following:

7.1 Ensuring candidates for CTA and UKCP registration are fully aware of and compliant with training standards and requirements of EATA and UKCP(HIPS)

7.2 Certifying that all candidates applying for CTA qualification and UKCP registration have completed all training standards and requirements of EATA and UKCP(HIPS) and are of sufficient personal readiness.

7.3 The overarching responsibility of the Principal Supervisor is to monitor, sponsor and support a Contractual Trainee through training and preparation for CTA examination and to maintain an overview of the Contractual Trainee's professional progress.

7.4 In the event of the Principal Supervisor being unable to fulfil any or all of the above foregoing requirements in respect of any or all Contractual Trainees they will ensure that suitable alternative arrangements are made for the transfer and continued support of the Contractual Trainees.

8. RESPONSIBILITIES OF TRAINEES

The responsibilities of Trainees shall include but are not limited to the following:

8.1 To comply with the requirements of the TA Psychotherapy Training Programme and all conditions pertaining thereto as advised by the RTE providing the same.

8.2 To adhere to the current membership requirements of UKATA.

8.3 Trainees undergoing training leading to CTA with Psychotherapy speciality are also required to comply with any additional requirements as determined by UKCP (HIPS). It is the responsibility of the Trainee, on receipt of all relevant information from the RTE to ensure they implement or undertake the training requirements.

9. REQUIREMENTS FOR PSYCHOTHERAPY TRAINING PROGRAMMES

9.1 All Psychotherapy Training Programmes provided by RTEs must comply with the current training requirements, as advised by TSC on behalf of UKATA and which may be amended from time to time by UKATA, EATA & UKCP (HIPS).

9.2 RTEs shall provide clear written details of the entry requirements for all Psychotherapy Training Programmes provided by them.

9.3 RTEs shall provide a clear written statement regarding routes of progression through the course and a policy regarding suspension or termination of training.

9.4 Entry to all Psychotherapy Training Programmes shall require at least one of the following (i) post-graduate level of competence i.e. prior degree; (ii) a suitable counselling qualification; (iii) a qualification in a relevant profession; (iv) suitable and relevant life experience or (v) a combination of all or any of the foregoing.

9.5 In addition to the requirements of the foregoing, all potential Trainees should have relevant experience of working in a responsible capacity, and with people.

9.6 Prior to the commencement of the Psychotherapy Training Programme, the RTE shall provide all Trainees with a training manual or handbook including, but not limited to, information on the following:

9.6.1 The assessment criteria and the process(es) for implementation thereof;

9.6.2 Any additional evaluation process(es) applicable;

9.6.3 Possible academic qualifications;

9.6.4 Possible relevant accrediting and registering bodies such as EATA, UKCP, BACP, COSCA;

9.6.5 Any subsidiary or additional qualification offered by the RTE for the Psychotherapy Training Programme, the route to certification and/or accreditation and details of the relevant accrediting body.

9.7 RTEs will comply with any sanction(s) as imposed by TSC and endorsed by UKATA Council after due process.

9.8 Accreditation and Registration

9.8.1 In addition to the above conditions in order for a Trainee to proceed to accreditation and registration with all or any of the following – UKATA, EATA & UKCP (HIPS) and in addition to meeting the necessary requirements of each of these bodies, Trainees pursuing CTA with Psychotherapy speciality shall demonstrate to the satisfaction of the Principal Supervisor that:

9.8.1.1 They have met with all specific training, supervision and personal psychotherapy requirements of UKCP (HIPS).

9.8.2 In order for Trainees to qualify as a CTA with Psychotherapy speciality and be accredited as such by EATA and registered with UKCP (HIPS) the Trainee shall meet all the UK national training requirements of both organisations.

10. THE ROLE OF TSC

The role of TSC shall include but is not limited to the following:

10.1 To provide copies of UKATA, EATA & UKCP (HIPS) training requirements in response to written requests for the same.

10.2 To oversee the register of RTEs as provided for in the Registration Policy.

10.3 To establish a monitoring and evaluation function in respect of TA training provided by RTEs, ITARs and Trainers in accordance with the provisions of the Monitoring Documents.

10.4 To decide and impose sanctions after due process on RTEs, Trainers, Principal Supervisors and Trainees where relevant in the event of their failing to implement their responsibilities in terms of the Code, the Monitoring Documents and the Registration Policy and in any other relevant situation which, in the opinion of TSC, merits sanction.

11. COMPLAINTS

11.1 Any complaints or correspondence concerning the Code should be sent to the Chair of UKATA TSC c/o UKATA Administrator.

11.2 Complaints or alleged breaches of the Code will be dealt with according to the procedures outlined in the UKATA registration Policy document.

1. JURISDICTION

- 1.1 Trainer refers to all Teaching Members, Associate Teaching Members and tutors of MIP and any other person engaged by MIP to teach theory and practice on any of the Institute's courses. Trainee refers to trainee Members of MIP who are engaged in learning on one or more of the Institute's courses and have signed an agreement to abide by the MIP Code of Ethics and Professional Practice.

2. INTENTION

- 2.1 The Manchester Institute for Psychotherapy endeavour to conduct its training in such a way as to address the needs and best interests of its trainees. Trainees are in turn required to act in the best interests of their clients and abide by the training and ethical requirements of the Manchester Institute for Psychotherapy.

3. PRE-COURSE INFORMATION

- 3.1 The Manchester Institute for Psychotherapy will inform all prospective trainees of the nature and requirements of the course/s for which they may make application. This information will include course philosophy, objectives, assessment criteria and requirements for satisfactory completion.

4. TEACHING

- 4.1 The detailed syllabus, objectives, methodology and assessment criteria for each of the Institute's validated courses will be clearly set out and given to all trainees at commencement of the course.
- 4.2 All tutors/trainers will be governed by the Code of Ethics and Professional Practice of the Manchester Institute for Psychotherapy.
- 4.3 Tutors/Trainers will respect the diversity of trainees and not discriminate on any grounds of difference such as gender, race, culture, age, disability, social background, political or religious beliefs.
- 4.4 Trainees must be aware of their own internalised oppression and pay particular attention to how this may affect their training practice.
- 4.5 Tutors/ Trainers will not exploit their students sexually or financially.
- 4.6 Dismissive or arrogant remarks or any derogation by innuendo by a Trainer about another Trainer is unprofessional. A Trainer should not collude through silence or evasion, with the abusive behaviour of a fellow Trainer.

5. CLINICAL PRACTICE

- 5.1 The Manchester Institute for Psychotherapy will consider the interests of clients and trainees in establishing the clinical requirements of the training course/s, which will

be clearly set out at the outset of the training.

- 5.2 The Manchester Institute for Psychotherapy will help and assist trainees to make client's interest paramount and to maintain appropriate confidentiality.
- 5.3 Trainees` work with clients presented for training purposes will be clinically supervised.

6. PERSONAL AND FINANCIAL INVOLVEMENT

- 6.1 All prospective trainees will be clearly informed of the financial requirements of the course.
- 6.2 The degree of confidentiality will be clear. There will be safeguards to protect the confidentiality of trainees` personal material which must include storage in a metal (locked) filing cabinet.
- 6.3 The Manchester Institute for Psychotherapy will exercise responsibility and demonstrate a reasonable respect for existing arrangements when introducing changes to its course requirements.
- 6.4 All responsibilities of cost and fees will be explicit at the outset of training.

7. SUPERVISION

- 7.1 All Supervisors approved by the Manchester Institute for Psychotherapy will have completed a creditable training course in Clinical Supervision or be recognised as competent by virtue of reputation and standing within the professional community of Counsellors and Psychotherapists.
- 7.2 All Supervisors approved by the Manchester Institute for Psychotherapy will adhere to a Code of Ethics compatible with the Code of Ethics and Professional Practice of the Manchester Institute for Psychotherapy.
- 7.3 A Primary Programme Tutor who has a responsibility for the trainee's ongoing training and clinical practice must be satisfied that supervision is established when the trainee begins work with clients. Trainees are responsible for arranging their supervision with supervisors approved by the Manchester Institute for Psychotherapy.
- 7.4 It is the responsibility of the Course Assessment Board to determine, after due consideration, the ability and suitability of a trainee to continue on one of the Institute's training courses, unless a trainee has acted in such a way as to breach the Code of Ethics and Professional Practice of MIP. In this event the complaints procedure may be initiated and may lead to suspension or termination of training.
- 7.5 Trainers and supervisors may consult each other about a trainee's professional development. Such consultation shall be in the interests of a trainee's professional development and not be trivialising or gossip.

- 7.6 General discussion of training issues among trainers and supervisors is acceptable but trainees should not be named.
- 7.7 It is the responsibility of the Primary Programme tutor to make recommendations to the Course Assessment Board about the suitability of a trainee to continue training, except in cases of unethical or unprofessional behaviour when the Quality & Equality Committee may recommend to the Board of Directors of MIP suspension or termination. The decision of the Board is final.

8. ASSESSMENT

- 8.1 The Manchester Institute for Psychotherapy will publish the criteria and process of assessment for all its validated training courses, including its examination procedures.
- 8.2 The Manchester Institute for Psychotherapy will endeavour to keep the examination processes as clear as possible. Specifically, all assessors/ examiners must complete a written evaluation of the candidate's work which will be made available to the candidate.

9. BOUNDARIES

- 9.1 Trainers are responsible for establishing and maintaining the boundaries between a professional relationship with a trainee and other relationships that may pre-date the trainee's commencement of training.
- 9.2 Trainers who are centrally involved in Institute's training programme should not assume the additional role of therapist to any trainee enrolled on that programme.
- 9.3 Trainers should not be dependant on their relationships with trainees for emotional wellbeing.
- 9.4 Any new relationship arising as a result of a workshop facilitated by a visiting, external trainer, must respect those relationships which are already in place, and should clearly be judged by the Course Leader to be helpful to the trainees' professional development.
- 9.5 Sexual relationships between members of a Training Group itself adversely affect the Training Group. Trainees are required to monitor their relationships with each other with due regard to the heightened emotional vulnerability that is likely to occur during training workshops.
- 9.6 Trainers should explain to new trainees that personal therapy and work on personal issues unrelated to the Training Group are not the primary purpose of training.

10. CONFIDENTIALITY

- 10.1 MIP Trainers will protect the confidentiality of trainees` personal material by not disclosing personal and private information without consent, and by keeping records in a locked metal filing cabinet.
- 10.2 Trainer and trainees will establish a clear contract with regard to their mutual responsibilities with regard to confidentiality. Such contract will be compatible with the UKCP/MIP Code of Ethics and Professional Practice (see UKCP Code of Ethics and Professional Practice Records and Confidentiality 18).
- 10.3 Trainers should make explicit to trainees the exceptional circumstances when confidentiality may be broken, ensuring there is a distinction between information pertaining to the training group and an individual's private and personal information.

11. COMPETENCE

- 11.1 Trainers should be committed to their own personal and professional development.
- 11.2 Trainers should monitor their work via appropriate levels of supervision and consultation.
- 11.3 Trainers should work within the limits of their knowledge, skills and health.
- 11.4 Trainers should develop their cultural education in order to encourage and appreciate a wide spectrum of differences in their trainees.
- 11.5 Trainers should be committed to developing their capacity for self awareness, especially with regard to prejudices, so that they become increasingly able to value difference and diversity.

12. COMPLAINTS

- 12.1 The Manchester Institute for Psychotherapy has an established and published Complaints Procedure, that is subject to periodic review by the Quality and Ethics Committee.

This policy will be reviewed regularly every 18 months and updated a minimum of every 36 months

Reviewed November 2019

M.I.P CODE OF ETHICS FOR TRAINERS

The aim is to establish and maintain standards for trainers working at MIP or in the service of MIP.

Also, to inform and offer protection to the public who attend training or are seeking to train at MIP.

1. Trainers should recognise the integrity, role and value of trainees, with regard to issues of race, origin, status, gender beliefs, sexual orientation and any other diversity aspect.
2. Trainers are responsible for establishing and maintaining appropriate boundaries between themselves and trainees, so that professional relationships are not confused with other relationships.
3. Trainers need to respect and adhere to the dual relationships section within the UKCP/MIP Code of Ethics and Professional Practice policy, ie not to work therapeutically with clients who they are actively involved with in a substantial training role.

For example – former trainees must not be accepted as therapeutic clients until a period of six months has passed for reflection and after consultation with a supervisor.

4. Trainers will ensure that every student has access to the course handbook, every MIP Policy and Procedure together with other relevant training manuals.
5. Trainers will not exploit their status, financially or sexually.
6. Trainers are expected to be members of MIP and to adhere to the UKCP/MIP's Code of Ethics and Professional Practice, as well as MIP's Complaints Procedure in cases of alleged ethical misconduct.

This policy will be reviewed regularly every 18 months and updated a minimum of every 36 months

Reviewed August 2019

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

SUPERVISION POLICY

Definition of Supervision:

1. Supervision may be understood as a process conducted within a formal working relationship, in which a qualified or trainee psychotherapeutic practitioner presents clinical work, for relevant reflective exploration, to a designated Supervisor, group or peers for the purpose of learning how to enhance clinical effectiveness in a supportive and reflective way.
2. The primary purpose of Supervision is to enhance the professional development of the Supervisee so as to ensure best possible psychotherapeutic practice and safety for clients.

The five main functions are:

- * **Education** - the continuing professional development of the skill, knowledge and practice of the Supervisee.
- * **Facilitation** - the co-creation of a learning environment that supports the development of reflective skills and fosters better practice.
- * **Support** - the encouragement and holding of the Supervisee through positive as well as difficult circumstances.
- * **Evaluation** - the assessment of ongoing development in terms of effective practice, the meeting of recognised standards and constructive feedback to develop learning.
- * **Gatekeeping** - the assurance for all stakeholders that Supervisees are adhering to good, fit, ethical practice, recognising where a Supervisee is working beyond safe, emotional and competency limits. In the case of trainees, this may include assessment of readiness to qualify or continuing training.

Addressing Difference and Diversity in Clinical Supervision

Equality and respect for all clients practice underpins the basic values of clinical work and Supervision.

Supervisors have a responsibility to be aware of their own issues of prejudice and stereotyping and particularly to consider ways in which this may be affecting the Supervision relationship. Indeed, discussion of this is part of the Supervision process.

Supervisors need to be alert for any prejudices and assumptions that clinicians reveal in their work with clients and to raise awareness of these so that the needs of clients may be met with more sensitivity.

One purpose of clinical Supervision is to enable Supervisees to recognise and value difference. Supervisors have a responsibility to challenge the appropriateness of the work of a Supervisee whose own belief system interferes with the acceptance of clients.

Attitudes, assumptions and prejudices can be identified by the language used, and by paying attention to the selectivity of material brought to Supervision.

Modes of Supervision

The quality and respect for all clients practice underpins the basic values of clinical work and Supervision. MIP recognises a range of different modes of Supervision. It is for the Supervisor of each situation to determine the most effective mode to be adopted in each clinical situation. It may be that a range of modes are most effective in some areas of practice. It needs to be negotiated between those with responsibility for the management of the Supervision what form is most appropriate.

1. **One to One Supervisor/Supervisee.** This involves the Supervisor providing clinical Supervision on an individual basis for an individual clinician who is usually less experienced than the Supervisor.
2. **Group Clinical Supervision.** The Supervisor acts as the leader, takes responsibility for organising the time equally among all the Supervisees, and attention is usually concentrated on the work of each individual in turn.
3. **One to One Peer Clinical Supervision.** This involves two participants providing clinical Supervision for each other by alternating the roles of Supervisor and Supervisee. Typically, the time available for clinical Supervision is divided equally between them.
4. **Peer Group Clinical Supervision.** This takes place where three or more clinicians share responsibility for providing each other's clinical Supervision within the group. Typically, they will consider themselves to be broadly of equal status, training and/or experience.
5. **Live Supervision in Teams.** This takes place via video link and one-way screen in teams or two or more clinical trainees with specially trained Supervisors. The Supervisor holds accountability for the work undertaken with families, and is responsible for the different levels of interaction between therapist/family and team/therapist/family.

MIP Register of Recognised Supervisors and Registered Training Supervisors

1. People on the register are as follows:
 - * Are qualified psychotherapists registered with UKCP, and
 - * Have completed a formal Supervision training or are being grandparented onto the UKCP list.
2. Please note MIP also has created a register of Registered Training Supervisors (RTSs) who undertake all group or individual supervision for students and trainees. RTSs would normally be those who either
 - * Are already Recognised Supervisors, and
 - * Have been qualified as a Psychotherapist for at least 5 years, and
 - * Have been practicing as a Supervisor for at least 2 years.
3. MIP will verify and keep on file the current credentials of Recognised Supervisors and Recognised Training Supervisors and will update their registers every 3 years and forward these to HIPC.
4. MIP will inform HIPC where a Recognised Supervisor and Recognised Training Supervisor needs to be withdrawn from the MIP register and/or the UKCP register.
5. MIP will ensure that all Registered Supervisors and Registered Training supervisors comply with their Diversity & Equalities policies.

Routes onto the UKCP Register

1. Nomination for the UKCP register will be done by HIPC and will consist of Registered Supervisors and Registered Training supervisors on MIP's register.
2. MIP is responsible for compiling and forwarding the registers to HIPC who will then forward registrants to UKCP for inclusion in their central register.

The purpose of this Code of Ethics is to establish and maintain standards for supervisors at MIP and to inform and protect practitioners seeking supervision.

Supervisors shall be aware that the clauses below, and in other MIP policies, are not to be taken as fully inclusive, exclusive or definitive as to what may or may not constitute professional misconduct.

CODE OF ETHICS FOR SUPERVISORS

Professionalism

1. 1.1 All supervisors are expected to conduct themselves in their supervisory activities and associated responsibilities in ways that do not bring MIP into disrepute. This applies in their role as supervisors at MIP and any other professional or academic organisations.
- 1.2 The primary purpose of supervision is to ensure that the supervisee is addressing the needs and safety of the client.
- 1.3 Supervisors are reminded that the training status of MIP trainees continues until graduation or formal withdrawal from the course.

Equality & Diversity

2. Supervisors must recognise the value and dignity of supervisees, with regards to equality and diversity. Consideration of equality and diversity should underpin the basic values of psychotherapy and supervision.

Boundaries

3. (a) Supervisors are responsible for establishing and maintaining appropriate boundaries between themselves and supervisees, so that professional relationships are not confused with other relationships. In principle, the provision of supervision should be separate from the provision of psychotherapy.
- (b) During supervision, when it seems appropriate that the supervisor engages in therapy with the supervisee, a clear contract must be negotiated for the duration of the exercise.
- (c) Supervisors must not exploit supervisees financially, sexually, emotionally or in any other way.

Professional Development

4. (a) Supervisors are expected to commit themselves to their continuing professional development as Supervisors, and to monitor and evaluate the limits of their competence.
- (b) Supervisors have a responsibility to themselves, their supervisees and MIP and to maintain their own effectiveness, resilience and ability to work with supervisees. They are expected to monitor their own performance and to seek help and/or withdraw from their role as supervisor, whether temporarily or permanently, if their personal resources are compromised.
- (c) It is mandatory for MIP Supervisors to be in supervision themselves.

Confidentiality

5.
 - (a) As a general principle, Supervisors must maintain confidentiality with regards to information about their supervisees and their supervisees' clients.
 - (b) In those instances where a Supervisor believes it necessary to break confidentiality, either in relation to the supervisee's practice or client issues, they will, wherever possible, discuss this in advance with the supervisee concerned. They will make clear their reasons for this course of action and seek the co-operation of the supervisee. Confidentiality agreements may be broken where there are serious safety, legal or ethical concerns.
 - (c) All remote working must be undertaken on an encrypted platform, e.g. Zoom. All contracts about remote working must be mutually agreed by the supervisor and supervisee.
6. Supervisors, as members of MIP, are expected to adhere to the MIP Complaints Procedure in cases of alleged ethical misconduct.
7. If Supervisors wish to undertake academic and/or clinical research at MIP involving their supervisees, supervisees' clients, staff, colleagues, trainees or placement clients, they must seek permission from the Clinical Director.

This policy will be reviewed every 18 months and updated a minimum of every 36 months.

This policy is informed by MIP/HIPC/UKCP

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

ACCREDITED PRIOR LEARNING (APL) POLICY

Accreditation of Prior Learning (APL) is a process through which an individual may be awarded credit for informal and formal learning experiences.

This includes recognition of learning from life experiences, existing strengths and previous courses, for example:

- * a person who has a child with special educational needs or disabilities gains learning from caring for that child.
- * a person who has worked as a mental health worker for ten years.

What does APL involve?

- * Identifying what someone already knows and can do.
- * Assessment of that person's existing knowledge in relation to the course requirements.

The underlining principle of APL is that all experiential learning can be quantified in terms of academic credit.

APL procedure following initial application

1. Applicant presents a portfolio of work and a 2,000 essay to the Course Director.
2. Interview with the Course Director and a second trainer to consider the presenting portfolio, to ensure it meets the requirements of the APL policy.

A portfolio of work could include:

- work experience in counselling
- formal and informal education
- independent study, e.g. evidence of ADL
- other relevant experiences
- references

The essay must be on a counselling/therapy related topic.

Criteria:

- The topic is addressed in a lucid, relevant, rigorous and coherent way.
- The essay is well structured with themes/ideas/issues developed in a logical and consistent way.

- There is evidence of personal experience with reference to relevant literature.
- Clear use is made of appropriate concepts to analyse and critique experiences and issues.
- There needs to be evidence of a level of self-awareness.
- Clear distinctions between evidence and opinion should be maintained.
- The conclusion must draw together the main arguments enabling the reader to appreciate how these points have been reached.
- Length of essay should be 2,000 words +/- 10%, not including reference list.

If the candidate satisfies the above requirements, then they may be admitted to the programme for Year 2, 3 or 4, at the discretion of the Course Director.

In the event of a candidate failing to achieve entry, the Course Director would advise them on courses of study and appropriate experience that could be undertaken prior to the next application.

Registration must be for at least one academic year. This is due to the nature of the course in which processes, relationships and content need time to develop.

This policy will be reviewed every 18 months

Last revised December 2018

Manchester Institute for Psychotherapy

CONFLICT OF INTEREST POLICY

All staff, directors and committee members of the Manchester Institute for Psychotherapy will strive to avoid any conflict of interest between the interests of MIP on the one hand, and personal, professional and business interests on the other. This entails avoiding actual conflicts of interest as well as the perception of conflicts of interest.

The purpose of this policy is to protect the integrity of MIP's decision-making process and the integrity and reputation of staff, directors, committee members, trainers, supervisees and members of the public.

Examples of conflict of interest include:

1. A committee member who sits on two committees where one committee may be making decisions which would have an impact on the work of another committee. Where possible, members of MIP should only occupy a seat on one committee of the organisation or have only one named role.
2. A committee member who is related to a member of staff and there is a decision to be taken on staff pay or conditions.
3. A committee member who has a personal relationship with another member which may influence their views of the professional standing of that member, e.g. it would not be appropriate for a Quality & Ethics Committee member to be on an investigating panel of a colleague or friend.
4. A committee member who has an active role in another organisation which may be in competition with MIP, for example in recruitment of members or funding of posts.
5. A committee member who has shares in a business that may be awarded a contract to do work or provide services for MIP.
6. Committee members may attend other committees, however if there is a conflict of interest with regards to specific proposals discussed, the member will step down for that particular proposal and area of discussion.
7. Any committee member who suspects a conflict of interest should make it known to the chair and be prepared to remove themselves from the role.

Upon appointment, each committee member will make a full and transparent disclosure of interests, such as relationships and posts held, that could potentially result in a conflict of interest. Such potential conflicts of interest should be reviewed within the committee periodically.

Committee members must be transparent about any transactions or decisions in which there may be a conflict of interest between MIP's best interests and those of the member, or any organisation the member is involved in.

In such situations, a member will then agree as follows: "After disclosure, I understand that I will be asked to leave the room for the discussion and will not be able to take part in the decision."

Any such disclosure and the subsequent actions taken will be noted in the minutes.

This policy is meant to supplement good judgement and staff, directors, management, committee members, trainers and supervisors should respect its spirit as well as its wording.

This policy is regularly reviewed every 18 months an updated a minimum of every 36 months

Revised February 2019

MENTAL HEALTH FAMILIARISATION PLACEMENT

1 Students may have little or no experience of working in a psychiatric setting are required to complete the Mental Health Placement Programme by the end of the Exam Prep Process.

2 The Mental Health Placement Programme has two components:

- Placement of Observation
- Completion of a theoretical workshop (3 days) on Aspects of Modern Psychiatry.

(i) Placement of Observation (*this can be taken forward into the Exam Prep Year*)

The placement of observation is intended only to be a brief introduction to the range of services provided by the Public Sector Mental Health Units (20 hours in total).

The placement may be completed in a short block or spread over three months, in any of the following areas :

Elderly Mentally ill
Acute Psychiatry
Rehabilitation
Community Care provision
Drug and/or Alcohol Unit
Acute Psychiatry
Community Care provision
Drug/Alcohol Unit

(ii) Completion of Theoretical Workshop

This workshop will be facilitated by one or more members of the psychiatric profession.

Areas covered in the workshop include, among others,

Historical developments in Psychiatry
Neurobiology
Pharmacology
Psychopathology and the DSM 5R 2015
Psychiatry and Psychotherapy

3. Students are required to submit a written report on the mental health placement prior to the submission of the case study and audio recording transcript in the Independent Studies Stage (*Exam Prep Group*).

4. The Co-ordinator of the Mental Health Placement Programme is required to confirm that students have completed the Programme.

5. Aims of the Mental Health Placement should be demonstrated in the reflective account, they are:

- To develop a basic understanding of psychiatry and the mental health system, the rights of patients and the psycho- social issues involved.
- Understand the main principles of the mental health act and the procedures for compulsory admission and detention of patients.
- Enhance their ability to liaise with mental health professionals.
- To become familiar with psychiatric assessment and the planning of a range of interventions and evaluation procedures.
- To understand a range of mental health illnesses that can lead to involvement in the mental health system.
- To familiarise themselves with the different types of intervention used, including medication and ECT and their main side effects.
- Spend time with people who have been diagnosed with severe depression and psychosis so that they are able to recognise these in the future.
- To be able to empathise with clients who have been patients in the system.

The reflective account will form part of the student's submission for the CTA psychotherapy oral examination (*Exam Prep Group*).

Mental Health Placement of Observation

Report by Trainee

NAME of STUDENT: _____

Dates of placement

Location and description of placement

Please indicate in what ways the placement has supported your development as a counsellor/ or psychotherapist with particular reference to the interface between psychotherapy and psychiatry. (Continue on reverse side and on additional sheet if necessary).

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY
COURSE EVALUATION

Psychotherapy education and training is evaluative and developmental. The modules are arranged in sequence so that each module builds on the preceding one/s. We would appreciate your co-operation in completing this course evaluation and trust you will find the exercise a helpful and reflective learning experience. Completing the evaluation will also help you to complete the end of year Personal Development Profile so please retain a copy for yourself. **Course evaluation will take place in February and July each year.**

Title of Course

Year of Course.....

Primary Programme Tutor

Please write brief comments in the following areas:

I. Awareness of Self in Relationships

Please assess the nature and quality of your contact with:

a: Yourself:

b: Peers:

c: Tutors:

II. Participation in the Workshops

Please describe your level of participation in each of the four components of the module:

a: Group Process

b: Theory

c: Small Group Skills Practice if applicable

d: Large Group Supervision if applicable

iii. Personal Issues

What personal issues/challenges have emerged as figure during the module

iv. Future Directions

Identify some possible future directions in your personal work that would assist your professional development:

v. Tutor

Please comment on your experience of the module tutor in the following areas:

- a. Teaching input
- b. Supervision input if applicable
- c. Style of working with particular reference to level of support and challenge

vi. Resources

Please comment on Learning Resources available (e.g. bibliography, articles/book chapters, tutor notes etc).

WRITING YOUR ASSIGNMENT

Use of Non-Sexist Language

Research suggests that gender-specific terms both reflect and reinforce sex-role stereotypes. Sexism, in this form, may be avoided by adopting the following guidelines:

1. Substitute nouns, e.g. people or human beings, for mankind.
2. Delete pronouns where appropriate, e.g. the student submitted the coursework, instead of her/his coursework.
 - (a) Make use of plurals, e.g.
 - they instead of he
 - their instead of his
 - them instead of him
 - (b) Make use of both male and female pronouns, e.g.
 - he or she, instead of he
 - (c) Avoid sex-specific references unless relevant, e.g. psychotherapist, instead of *female* psychotherapist.
 - (d) Avoid stereotypical assumptions, e.g. *parenting* method instead of *mothering*.

Essays, Learning Outcomes and Assessment Criteria

From a **marker's** point of view, the quality of response to the **essay title** will be determined by how well a student meets:

1. The Learning Outcomes associated with the relevant Module.
2. Assessment Criteria associated with the method of assessment; see assessment criteria forms 2A, 2b, 2C.
3. Be aware of the assessment criteria when planning and writing your assignment. In order to obtain a Pass grade or above, ensure you meet the criteria as described.
4. Sources that are not referenced will be deemed to be plagiarised and the assignment will automatically fail.
5. For a 2,000 word essay at least 6 sources would be appropriate.

Developing a Critical Voice

It is important that students develop their own critical voice when writing an essay, description is not enough. Students need to be able to weigh up the pros and cons. If students simply write down all they know about a theory, with no attempt to evaluate, they will not achieve a good mark. Limitations and problems must be discussed with any theory. This can be achieved by reading and referencing other writers and their theories. In this way, students will develop their ability to evaluate and critique and thereby gain higher marks.

Assignment Extension

Assignment extensions are possible but only under extenuating circumstances. Extension requests should be made at least two weeks before the hand in date. Emergency circumstances will be considered. Please see Appendix 15 for the Extension Request Form.

Late Submissions

Late submissions are deemed as a Fail. The student will need to submit another assignment before the end of the academic year in order to progress onto the next academic year and gain a mark. There will be a charge for this.

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

WRITTEN ASSIGNMENT EXTENSION REQUEST FORM

Name:

Primary Course Tutor: Year:

Essay 1 OR Essay 2

Nature of extenuating circumstances:
with supporting evidence, if applicable.
(If confidential, discuss with Primary Course Tutor)

Revised Due Date Requested:
.....

Student Signature Date

Authorisation - to be signed by Primary Course Tutor

Signature Date

Form to be sent to Course tutor and to MIP no later than 2 weeks before the deadline for handing in essays.

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

Personal Learning Journal

Please include in your Personal Learning Journal the following evaluations and reflections on the course experience in terms of the following:

- * Your thoughts, feelings and behaviours in terms of the course experience.
- * Reflect on your ability to set learning objectives and monitor the extent to which they are achieved.
- * Reflect on the development of your attitudes, values, knowledge and skills during the course.
- * Explore and reflect on the personal and professional changes that you are making whilst on the course.
- * Reflect on your willingness to share your experience spontaneously with other course members and Tutors.
- * Reflect on your commitment to personal growth and development and how this has impacted your development on the course.

Please note that your Personal Learning Journal, which you should fill in on the Sunday or Sunday evening of each weekend, is for your private consumption only. It won't be assessed or evaluated. It is simply to help you to complete the required Personal Development Profile at the end of the year.

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

Personal Development Profile Tutor Evaluation

If the student does not meet the required satisfactory criteria, please make a brief comment to support your assessment.

* Ability to set, review and evaluate personal development objectives:

Satisfactory

Non Satisfactory

* Awareness of self in relationships regarding Peers, Tutors and clients.

Satisfactory

Non-Satisfactory

* Level of participation on the course, and ability to reflect on their internal and external experience.

Satisfactory

Non-Satisfactory

* Ability to recognise relevant issues in personal work.

Satisfactory

Non-Satisfactory

* Ability to relate personal development to professional practice.

Satisfactory

Non-Satisfactory

* Written work is satisfactory, submitted and completed on time and demonstrates a high level of commitment to personal work.

Satisfactory

Non-Satisfactory

Ethical Guidelines For Research In Psychotherapy

Introduction

s

The psychotherapy training programme at the Manchester Institute for Psychotherapy promotes the notion of a psychotherapist as a 'scientific practitioner'. The Transactional Analysis Programme will include a research-driven Research Project in the final year. Thus, MIP places an increasingly important emphasis on the evaluation of the process and outcome of psychotherapy. In other words, the evaluation of the effectiveness of what we do as psychotherapists. Research in psychotherapy raises many ethical issues and dilemmas. These guidelines are an attempt to meet the need for guidance in this area and are intended to be used for guidance and direction. They are not meant to be read as mandatory. As this is a relatively new area in the field of psychotherapy then it will be necessary to develop these guidelines as a result of continuing practice and experience in research.

Guiding Principles

There is a duty to measure and assess the effectiveness of psychotherapy. This duty extends to clients, fellow professionals and the wider society. Research can help to establish the relative benefit of psychotherapy to clients and help to determine which therapy might be most effective for particular needs. Our obligation to the wider society includes a professional commitment to be engaged in an activity which can be shown to be worthwhile.

Any research activity undertaken within MIP (within a specific training programme or independent of a training programme) must be supervised from the commencement of the research to its conclusion. These supervisors should be knowledgeable of research issues and psychotherapeutic practice. Specifically, the supervisor will ensure that:

1. Ethical approvals for the programme have been secured.
2. Informed consent has been secured.
3. All reasonable steps have been taken to safeguard confidentiality.
4. Potential risks to research subjects/research participants are identified, assessed and recorded together with any specific measures taken to reduce potential risks.
5. Appropriate support systems are established.

The supervisor has a responsibility to ensure that any significant changes to a research programme have been properly approved.

Definitions

Research

Research refers to both process and outcome studies, for example which form of therapy might be most beneficial for which type of person or problem? The significance of the therapeutic relationship to outcome? Outcome studies of different therapeutic modalities. Ethical considerations may differ, to a greater or lesser extent, between different types of research activity. Generally speaking, research will refer to the detailed investigation of therapeutic practice with a particular purpose or goal.

Preliminary Considerations

1. Is the purpose of the research clearly articulated?
2. Has a hypothesis been clearly formulated or an exploratory question clearly formulated?
3. Has the data required been defined?
4. Has the methodology been identified together with its possibilities and limitations?
5. Have the methods of analysing the data been identified?
6. Has the possible impact on the client been carefully considered and potential risks identified?

Qualitative and Quantitative approaches need to be critiqued and with specific reference to the limits of their validity.

Cultural Context

Those engaged in research are encouraged to check out the draft protocol of any research investigation, the questions to be asked or other instruments, with members of relevant groups in order to ensure that they have sufficient knowledge of what may or may not be acceptable to others. Relevant groups may be considered with regard to gender, sexuality, age, race, ethnic origin, religion etc. Specifically it may be useful to check out what could be overtly or covertly judgmental of others.

Informed Consent

In order for consent to be considered informed and freely given a client should be informed of:

1. The purpose of the research.
2. How they will be involved, i.e. filling in a questionnaire, interview, audio recording /video tape.
3. What steps will be taken to protect their identity.
4. Will their identity be known to anyone other than the therapist and if so, whom?
5. Will any other person have access to personal information other than the therapist? If so, whom?
6. Arrangements to secure all records relating to the client and information as to what will happen to all records.
7. Procedures for withdrawing consent and for making complaints against the researcher.
8. Any possible negative impact upon them, for example re-living past traumas.

It is important to recognise that there is an inequality in the therapeutic relationship and that a client may feel obliged to adapt to the requests of the therapist by giving consent. The client should always be given adequate time to consider whether or not to be involved in any research investigation.

Clients should be informed clearly that if they decline to give consent to a research investigation the service they receive will not be adversely affected.

If a client is unlikely to be able to exercise consent freely then they should not be included in any investigation.

It is the responsibility of the research investigator to ensure that the client has enough understanding of the information required from an investigation before including the client in the investigation.

Where a research investigation continues for some time, then it may be appropriate to update client consent periodically.

Any research investigation involving children must consider their ability to give consent and the research investigator should familiarise themselves with any relevant legislation, for example the Children's Act.

Withdrawal of Consent

At the outset of any research investigation clients should be informed that they have an absolute right to withdraw their consent at any time and that they also have the right to require that data about them is destroyed. It is unethical to exert pressure to persuade a client to change their mind should they withdraw consent during the course of the research investigation. It is permissible to give additional information or explanation so long as this does not constitute pressure.

A client has a right to withdraw consent retrospectively and should be informed of their right to require that data regarding them is destroyed.

Ownership of Information

Whatever the legal situation, moral ownership of personal information about any person belongs with that person.

Generally speaking it should be normal practice that clients are able to have access to research records about them.

When questionnaires are used to provide scores a client has a right to have the scores, and the significance of them, explained in an appropriate way.

Confidentiality applies to all investigations into the psychotherapy process and if confidentiality cannot be guaranteed then clients need to be informed of this prior to being asked to give consent.

The Data Protection Registrar has made it clear that information stored on computers is not to be used for any purpose other than that for which they were originally obtained. If the holder of such information requires it to be used for anything else or to impart such information to a third person, they must secure the client's written consent. This is a legal requirement.

A client who has taken part in a research investigation should be provided with the opportunity to be informed of the outcome of such investigation. Case notes used for the purposes of research without the client's specific consent is unethical.

Explanations

All explanations of the nature of a research investigation (individual data, scores, results) given to clients involved in the investigation must be straight forward, be jargon free and not assume particular levels of knowledge. Simplicity of explanation must not be used to lead to a person's understanding of the significance of the information being distorted. Explanations given after the event do not justify any unethical aspects of the research investigation.

Use of Random Allocation Methods

External advice should be secured as to whether to use any research investigation involving random assignment of clients to particular types of treatment.

Colleagues

A psychotherapist who believes that a fellow research investigator is conducting investigations which are unethical should confront that person and encourage them to re-evaluate their research investigation. Such re-evaluation should involve external assessment.

Professional Collaboration

Research investigators must not claim authorship for work not undertaken by them or for ideas not originating with them. All sources must be properly acknowledged. Any help given by other professionals to a research investigation should be acknowledged.

Monitoring, Evaluation & Complaints

Occasionally data about clients may be used for the routine compilation of statistics regarding the provision of the service. Routine monitoring of this nature, while not strictly speaking 'research', nevertheless constitutes information provided by a client in connection with their therapy that is being used for purposes outside therapy. As such the client has the right to know that such statistics are being compiled. Clients have a right to know that in advance of entering into the therapeutic contract statistics may be so compiled.

As with monitoring, if a service is to be evaluated by requesting all or selected clients to complete questionnaires at the beginning or end of therapy, then a client should be aware that such questionnaires are being used for research and consent should be obtained.

Clients should be provided with an effective avenue of complaint if they believe that the research investigation has infringed their individual liberties or personal dignity. The person nominated to facilitate complaints must be independent of the research investigation.

*I wish to acknowledge the draft document prepared by the UKCP Ethics Committee 'Ethical Guidelines for Research' (1 July 1997) on which the MIP Guidelines are based.
KRE July 1999*

GUIDELINES FOR CONSTRUCTIVE FEEDBACK

- Focus on the positive – what you talk about you are reinforcing – where possible give positive first and last.
- Be descriptive rather than evaluative and judgmental.
- Refer to specific behaviour rather than general and vague behaviour giving an example where possible.
- Begin with an ‘I’ statement – own that it is your feedback.
- When feedback or criticism is negative give the person space to explore an alternative, more positive behaviour and/or where appropriate suggest an alternative giving a specific example.
- Ask yourself ‘Why am I giving this feedback?’ – check out your motives and what you would like to get out of giving feedback.
- Remember that feedback says as much about the giver as the receiver.
- It is normally only useful to give negative feedback about things which can be changed.
- Be as immediate as possible, referring to the here and now rather than the long ago.

Guidelines for Receiving Feedback

- Listen to the feedback rather than immediately rejecting or arguing with it.
- Having listened you may or may not choose to act on it – that is your right; it is useful however to have others’ perceptions of us.
- Consider checking it out with others rather than relying on one source. This is important since the way in which one person sees us may be very different from someone else’s perception.
- Be clear about what is being said.
- Avoid jumping to conclusions and becoming defensive.
- Listen and if it helps, repeat what the person has said to ensure that you have heard them clearly before responding.
- Ask for specific feedback.
- Quite often we get feedback that is restricted to particular aspects of our behaviour and it is necessary for us to initiate further feedback.
- Choose your time.
- If it isn’t the right time for you to receive the feedback say so and state a time that is convenient and you can be more receptive to it.
- Decide what you are going to do as a result of the feedback.
- Acknowledge and appreciate the person for giving you the feedback.

PSYCHOTHERAPY CONTRACT – GOOD PRACTICE GUIDELINES

Confidentiality

The content of all psychotherapy sessions is confidential and this applies to any and all records, in accordance with the Data Protection Act, except in the following instances:

- Where a client gives consent for confidence to be broken.
- Where the Psychotherapist is compelled to break confidentiality by a court of law.
- Where the Psychotherapist discloses information in Clinical Supervision.
- Where material from psychotherapy sessions is used for research and/or publication. In such instances all reasonable steps will be taken to ensure the anonymity of the client. From time to time the psychotherapy session may be recorded. Audio recordings are stored with client notes and are erased following clinical supervision. Any audio recordings retained for purposes of research and/or publication will be protected by the psychotherapist commitment to client anonymity.
- Where the client is a student on one of the MIP professional training programmes and is not meeting the requirement for personal therapy prescribed in the relevant student handbook. Such breaching of confidentiality must be confined to those areas set out in the relevant student handbook in Appendix 1.
- Where information disclosed during a psychotherapy session is of such gravity that confidentiality cannot reasonably be expected to be maintained. This will apply, for example, in cases of fraud, crime and where there are reasonable grounds to believe that there is a risk of serious harm to the client or others.
- Client records will be kept in a locked metal filing cabinet.

Duration and Cost of Sessions

A psychotherapy session will normally last for 50 minutes and the fee per session will be £40-£60 payable, according to practitioners experience, and the commencement of each session. A minimum of three months notice will normally be given in writing of any fee increase.

In the event that a client needs to cancel a session then the full fee is payable unless 24 hours notice of cancellation is given. (According to practitioners business contract the hours of notice may differ according to the different practitioners).

The duration and frequency of session will be discussed and agreed between client and psychotherapist. The client is normally required to give a minimum of four weeks termination of psychotherapy when the period of psychotherapy has exceeded twelve months. Up to twelve months a minimum of two weeks notice of termination of psychotherapy is normally required.

Code of Ethics and Professional Practice

I adhere to the Codes of Ethics and Practice of the Manchester Institute for Psychotherapy which is compatible with the codes of ethics and professional practice of UKCP and UKATC. MIP Codes of Ethics and Professional Practice, and Complaints Procedure will be made available to the client upon request.

INTELLECTUAL PROPERTY RIGHTS OF STUDENTS

- i. Students/Trainees of MIP have intellectual property rights over that which they create. The copyright for all student/trainee works (written projects, case studies, Research Projects, etc.) belongs to the students/trainees who originated the works.
- ii. Copyright signifies that the work may not be reproduced, adapted, exhibited or published without the explicit permission of the student/trainee.
- iii. It is a requirement of MIP that a copy of each Research Project which has satisfied the examiners be lodged in the MIP library for reference purposes.

OUTSTANDING DEBTS

In the event that a student/trainee has outstanding debts to MIP in the form of training fees or other debts such as charges relating to loss of, or damaged to MIP property, then MIP will normally:

- Withhold student progression or advancement onto the next stage of the course, training module until the debt is discharged or a satisfactory agreement for full payment has been made.
- withhold the results of the student's/trainee's assessments with the effect that the student/trainee will not gain the related academic and/or clinical credits and will not be deemed to have satisfactorily completed the relevant stage or be entitled to receive a staged award or the final award, pending discharge of the debts.

Students must have discharged all debts from the previous training year in order to proceed with the course.

ATTENDANCE AND PUNCTUALITY POLICY

All students must attain 100% attendance in any academic year. This is a UKCP requirement.

All students must be aware of the level of attendance and punctuality required by MIP, in order to support the student's competence in personal development, understanding of theory and the attainment of clinical competencies.

Students must attend all course modules. If they are unable to attend a module, they must attend that particular module in a subsequent year.

Students must achieve 80% attendance to progress to the next academic year. It may be necessary for students to re-take the year in which the modules were missed.

The Suspension and Exclusion Policy will be evoked for:

- (a) Persistent lateness
- (b) Inability to complete missed modules.

This policy will be reviewed every 18 months

Last revision January 2020

DUAL RELATIONSHIPS POLICY

Dual relationships are those in which the Psychotherapist is acting in at least one other role besides their professional one with a client or student. For example, being both Tutor and Therapist to a student, or a therapist having a relationship with a client or student. Such relationships raise serious questions of conflict of interest, power imbalance, harassment and issues concerning trust and confidence. For this reason, the Manchester Institute for Psychotherapy requires that with regards to all aspects of counselling and psychotherapy practice, including training contexts, dual relationships are prohibited.

In certain circumstances, e.g. Visiting Trainers running a group where their client is attending; dual relationships re. committee members and clients, these will require a level of mutual consent in terms of how this is managed.

The Humanistic and Integrative Section of the United Kingdom Council for Psychotherapy, articulate the following reasons for separating out the psychotherapeutic relationship from other relationships, these reasons are supported by MIP:

- * To prevent an undermining of the power and self-authority of the client through a disproportionate balance of power in the relationship due to the therapist also being the client's trainer/supervisor/examiner which could, in extreme circumstances lead to a potential abuse of power on the part of the therapist.
- * To provide a clear boundary around the client/therapist relationship with the purpose of protecting the possibility for in-depth relationship work, and to help provide safe conditions for working with transference and subtle energetic material within the field of the relationship.
- * To protect the therapeutic relationship from unnecessary pressure, demand and influence caused by the tension inherent in holding two or more roles which involve different tasks.
- * To protect the integrity of the discreet relationships involved.
- * To encourage authenticity and appropriate challenge in each domain of training, supervision, examination and the psychotherapeutic relationship.
- * To provide clarity when working with relationships and tasks which are intrinsically interrelated and potentially capable of becoming confused and/or enmeshed (for example, there are supervision processes implicitly present within trainer/trainee relationship).
- * To encourage commitment and integrity in trainers, supervisors, examiners and therapists by their taking responsibility for their own relationship and the power of their position.

Such relationships carry the risk of deleterious consequences for both parties, including the impairment of professional judgement for the therapist, tutor or supervisor.

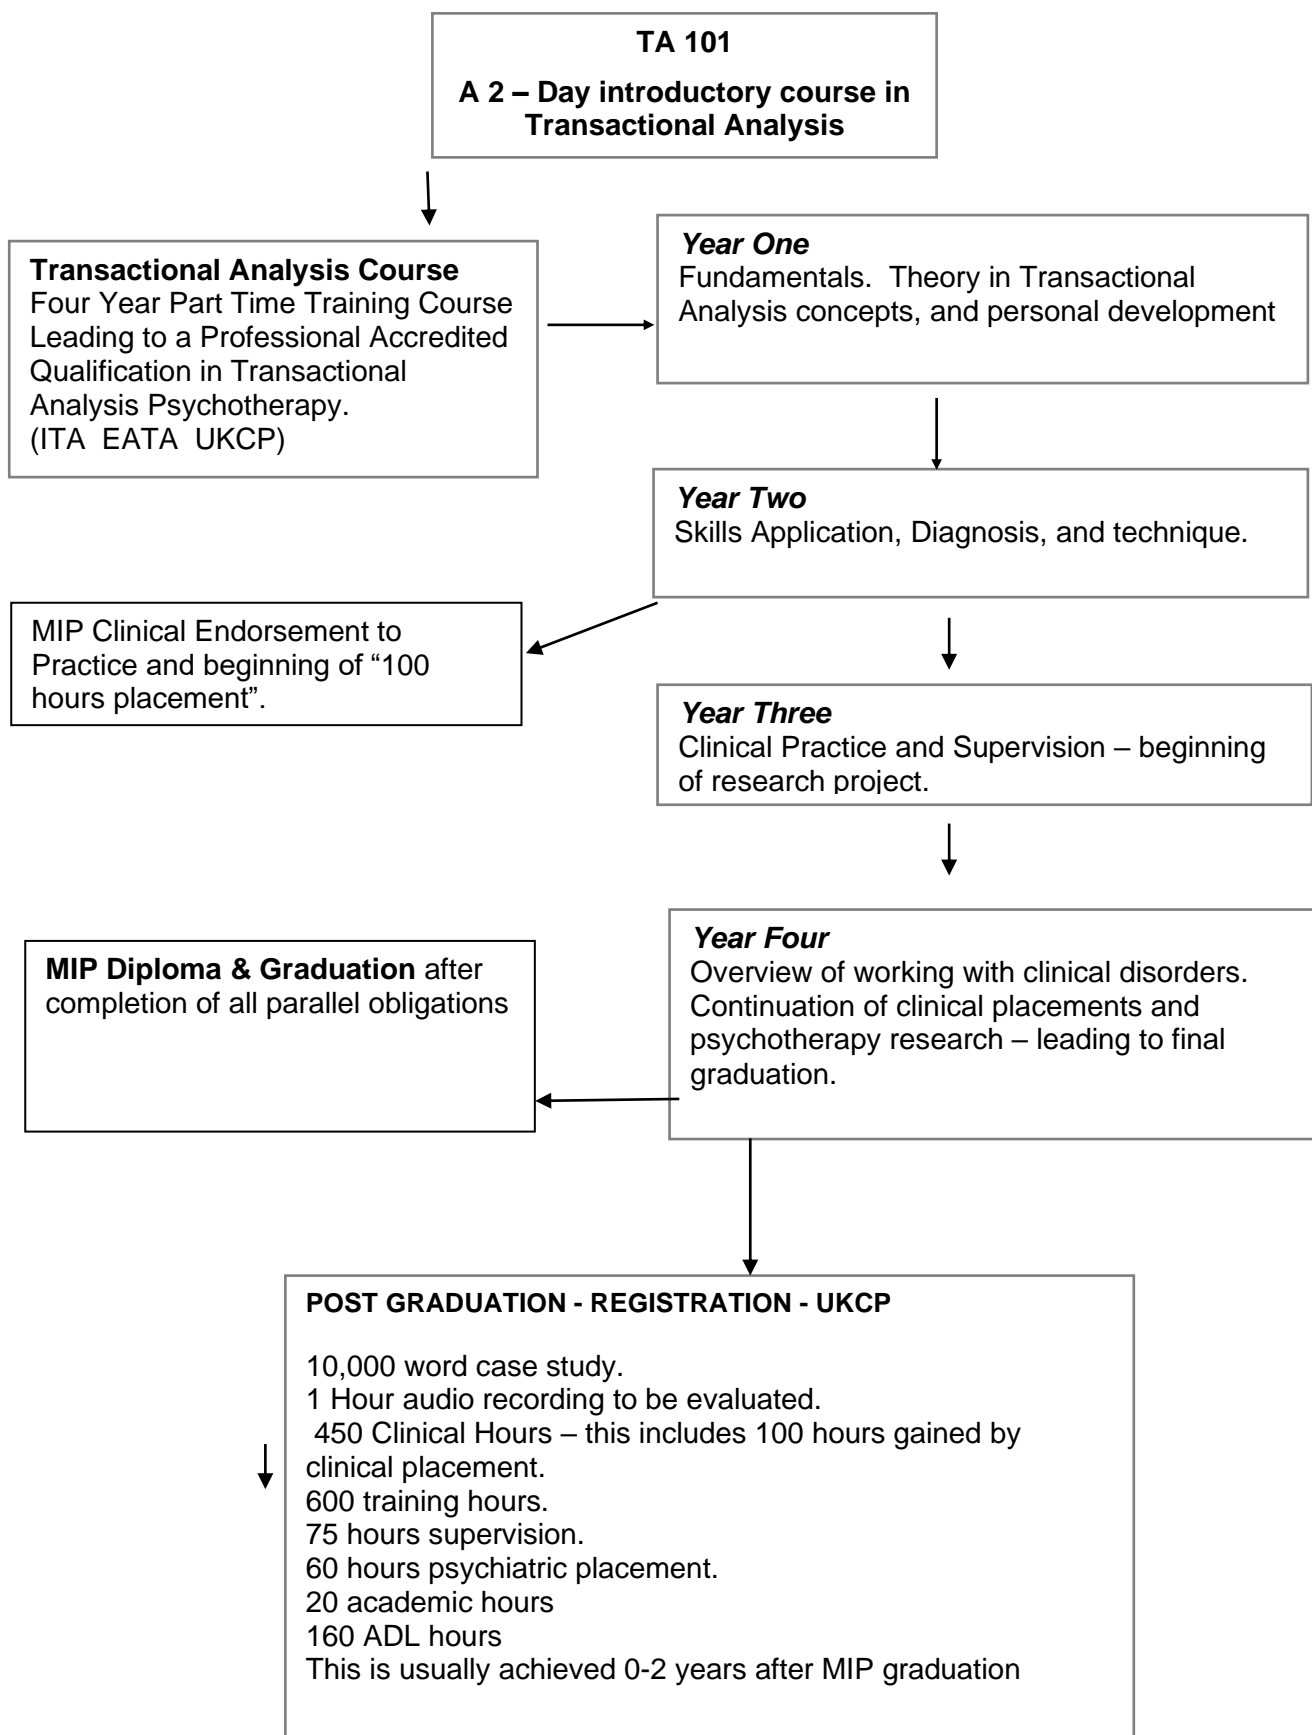

Where a therapist, tutor or supervisor at MIP is found to be conducting a dual relationship with a client or student the case will be dealt with using the complaints procedure for professional misconduct.

Where found guilty of professional misconduct the therapist/tutor/supervisor may be suspended or expelled from MIP and the UKATA or any other appropriate professional body informed.

This policy will be reviewed every 18 months

Last revised December 2018

PSYCHOTHERAPY TRAINING PATHWAYS

Once registered with United Kingdom Council of Psychotherapy (UKCP) you will be placed on their register in the Humanistic Integrative Psychotherapy College section and you will be issued with a UKCP Psychotherapy accreditation.

European Certification in Transactional Analysis (CTA)

If after graduation at MIP and UKCP registration you wish to do further study with regards to obtaining the European Certificate in Transactional Analysis, that will be possible at the Manchester Institute.

We would provide a recommended supervisor - individually/group - to prepare you for the exams that you would need to pass to achieve the CTA.

PSYCHOTHERAPY TRAINING PATHWAYS – EXPLAINED

(THE ESTABLISHMENT OF A GRADUATE BODY)

After the taught part of the Psychotherapy training at MIP, there is an establishment of a Graduate body.

In other words, trainees who have completed their four years of training, and their parallel obligations, will then form part of the Graduate body within MIP.

They will then commence for UKCP registration through the two pathways explained below.

Pathway 1

Direct UKCP Accreditation and Registration

If students take this path, they will need to complete a “**Professional Portfolio**” which will cover the following documentation:

- 10,000 word clinical case study
- 1 hour audio recording/video tape evaluation
- 600 training hours
- 160 therapy hours
- 450 clinical hours
- 100 hours clinical placement
- 75 individual supervision hours
- 130 ADL hours
- 40 hours academic studies
- 60 hours mental health familiarisation unit

If students take this route, they will need to have completed the above portfolio and applied for UKCP registration (via MIP accrediting panel) **within three years** of graduation.

MIP Graduates who do not complete these requirements within the three years will normally be expected to undertake a number of further training modules (or equivalent training hours as agreed by the training co-ordinator). These extra modules will need to be completed within one calendar year.

The complete evaluation must take place within 4 years of graduating from MIP.

Pathway 2

Certified Transactional Analysis – UKCP registered

If the student chooses to take this route they will need to take their Certificate in Transactional Analysis which is recognised by the European Association of Transactional Analysis.

Their Psychotherapy title of registration with the EATA will be “Transactional Analyst”.

Please note, the student will commence into one of MIP’s Examination Preparation Groups after their 4 years training to write their case study and prepare for the oral exams. This process usually takes three to five years – though it may take longer.

Please note that the Exam Prep Group meets one day a month throughout this time and that if you achieve the client contact hours earlier you may be in a position to do the oral exam earlier than the above timescale.

After you have achieved your CTA and EATA recognition you can then apply to UKCP for registration. This normally takes six to nine months.

MIP – GRADUATION REQUIREMENTS

In order to graduate with the MIP diploma, trainees must fulfil the following:

- * 600 training hours
- * 160 therapy hours
- * 100 clinical hours (placement)
- * 100% attendance requirement
- * 17 supervision hours = approximately 1:6 supervision to client contact hours
- * 50 ADL hours
- * 20 academic study hours
- * Completion of all assignments - 6 - 2,000 word assignments
- * Completion of research project - 8-10,000 words
- * Completion of all personality development profiles (3,000 words each) - 4
- * Completion of all placement documentation - including clinical reports
- * Completion of 5,000 word case study

ACCREDITATION OF GRADUATES ONTO THE UKCP REGISTER

After successful completion of the four year training at MIP, and subsequent achievement of the MIP Psychotherapy Diploma, the student will become part of the graduate body of the Manchester Institute for Psychotherapy.

If they wish **then** to register with the UKCP they will need first of all to achieve accreditation by MIP to obtain the UKCP registration.

To this end, the new graduate will need to create **a portfolio** of the relevant documentation for MIP accreditation (by the panel).

The documentation that makes up this overall **Portfolio** is as follows:

- * Successful completion of 4 years psychotherapy training at MIP and subsequent holding of MIP psychotherapy diploma.
- * 450 clinical hours
- * 600 MIP core training hours
- * 160 ADL hours
- * 160 psychotherapy hours
- * 75 supervision hours
- * 60 mental health placement hours (the 20 hours taught in-house are counted as training hours)
- * 10,000 word clinical case study
- * Audio recording transcript - 1 hour recording - 20 minutes needs to be evaluated.
- * 20 academic hours

In Further Detail:

Clinical Case study

A Clinical case study of 10,000 - 12,000 words

This will be taken from student's own field of clinical practice and will need to show competent translation into practice of concepts and methods.

It is particularly important for the student to show his/her role as a Psychotherapist and not focus on the client only in the course of therapy, but on the relationship between the student's process (and interventions) and the client's process.

The case study should be typed, double-spaced on one side of the paper only, and should be 10,000 words in length. Mention must be made of the authors from whom the concepts are taken, and a bibliography in alphabetical order must be included at the end of the case study. Pages should be numbered at the bottom of each page consecutively.

The following guidelines are a checklist of what needs to be included.

Introduction -

This should be a brief overview to help the examiner become familiar with the client and client's initial process. It should not be overly comprehensive and normally not exceed 20% of the case exploration. The following are some guidelines of material for inclusion.

1. Brief description of client:
 - * Sex, age, marital status, members of the family at present, social relationships at present, job status.
 - * Source of the referral.
 - * Other therapy, medical/ therapeutic history.
2. Presenting problems/ situation/ purpose of therapy: why she/he came, expectations realistic otherwise.
3. Initial contracts or agreements established.
4. First impressions:
 - * General appearance
 - * Physical stature and posture
 - * Mannerisms
 - * Voice quality
 - * Movement
 - * Self/environmental support
 - * Quality of contact
 - * Other
5. Therapist's initial reaction to client
 - * Likes/dislikes /curiosity ...
 - * Early "hunches"
 - * Who might I represent to the client?
 - * What immediate pitfalls might present in the parallel process?
6. Give historical information about your client in the following areas
 - * Family
 - * Development

- * Medical
- * Sexual relationships
- * Significant relationships
- * Education
- * Works and employment

7. Initial Diagnostic Picture

- * Give a diagnosis based on Transactional Analysis, analysing the client's present situation using two or three Transactional Analysis concepts.
- * Give a diagnosis on the basis of a non TA system that is familiar to you. For example, from the last edition of the Diagnostic and Statistical Manual of Mental Disorders.
- * Describe how you arrived at this diagnosis, and show how you made differential diagnoses to exclude other options

8. Define the presenting problem, making a clear distinction between your understanding and your client's point of view.

9. What was the final treatment contract between you and your client?

10. Treatment plan

- * Describe your overall treatment plan referring to your diagnosis of the client.
- * What did you envisage to be the stages and final goal of your treatment?

The Psychotherapy Process

Summarise the psychotherapy process, describing its separate stages and using appropriate Transactional Analysis concepts to describe what is happening. Give examples of your interaction with client, including literal transcripts, focussing in particular on your significant interventions and how the client responded.

- * Note any connections between your interaction and the problem that you defined in the beginning
- * State to what extent you consider the contract or contracts to have been completed and what criteria you used to assess this
- * Describe difficulties you experienced with transference and counter transference phenomena with your relationship with the client.
- * Include description of your use of supervision

Prognosis

- * Describe the present state of the treatment process and say whether you are still working with this client

- * What is your prognosis?

Concluding remarks

- * Describe your learning experience during your work with this client. For example, Mistakes –realisations / what I would have done there been a rewind button.
- * Particular rewards, sources of satisfactions, “what I’m proud of “, “what I did not regret “.

Assessment

From the Case Study (as with the audio recording transcript) the examiners will be looking for evidence of the student’s integration of theory, skill, self-support and ethical practice

Specifically, the students will be assessed in the following 7 areas:

1. Problem formulation (the ability to formulate the client’s problem in terms of Transactional Analysis)
2. Effectiveness (clarity, precision, timing, and effectiveness of interventions)
3. Intuition and Creativity (range, flexibility and creativity of therapist’s approach.)
4. Quality of contact between psychotherapy and client (including the awareness and availability of therapist’s own process)
5. Professionalism (Awareness of ethical considerations and limits of own competence).
6. Anticipations and Predictions of Psychotherapy Process.
(The ability to chart the direction of psychotherapy).
7. Theory (Knowledge of significant aspects of Transactional Analysis psychotherapy theory revealed in the dissertation case study).

Audio Recording and Audio Recording Transcript With Commentary

An audio recording, together with a typed transcript with commentary, of the student engaging in psychotherapy with a client, is submitted for critical analysis. It is not required, but it is recommended, that the recording be your case study client.

The recording will be approximately 50 minutes duration and should not be longer than this. The Transcript will be a maximum of 20 minutes. The student will submit the recording of the whole session and it must not have been edited.

THE TRANSCRIPT WITH COMMENTARY

The transcript will be a maximum of 20 minutes.

The transcript with commentary will be typed on A4 paper.

Presentation:

The audio recording will have a transcript typed on A4 paper and typed on the left hand 2/3rds side of each page. On the right hand 1/3 side of each page the trainee will type their commentary (eg observations, speculations, personal reactions to the client, interventions and client's reaction, relevant theoretical reflection).

This will provide simultaneously, verbal sound (and/or picture), transcript and commentary.

The transcript may include appropriate supporting material, e.g. a seating plan if a group/couple; a brief prologue and epilogue. Pages will be numbered at the bottom of each page consecutively.

The student is asked to include a Prologue – in which the client is introduced and his/her presenting difficulties outlined – and an Epilogue – which discusses how the work has helped the client move on or how the therapeutic relationship is changed in some way.

Each transaction in the transcript, by both the client and trainee, is to be numbered, eg CL1 and T1 consecutively.

Page will be numbered consecutively at the bottom of the page.

Assessment Criteria

From the audio recording transcript, the examiners will be looking for evidence of the student's integration of theory, skill, self-support and ethical practice. Specifically, the students will be assessed in the same 7 areas as with the case study:

1. Problem formulation (the ability to formulate the client's problem in terms of Transactional Analysis).
2. Effectiveness (clarity, pacing, timing of interventions).
3. Intuition and Creativity (range, flexibility and creativity of therapist's approach).
4. Quality of contact between Psychotherapy and client (including Awareness and availability of therapist's own process).
5. Professionalism (awareness of ethical considerations, boundaries, and limits of own competence).
6. Anticipation and Predictions of Psychotherapy Process (the ability to chart the direction of psychotherapy).

7. Theory (knowledge of significant aspects of Transactional Analysis theory, revealed in the case study).
8. Culture, diversity and empathy to the client's frame of reference.

Preparing the Audio Recording

Sound must be of good quality so that both trainee and client can be understood without difficulty.

There should be relatively fluent interaction, ie breaks in the recording will normally not be too long.

It is important that the recording demonstrates the trainee's work. His/her intervention/comments will need to be heard at frequent intervals throughout.

It is important to bear in mind that the recording is not meant to show a brilliant psychotherapist and "flaws" may be commented upon constructively.

The Evaluation Process to UKCP Registration

The specified Primary Course Tutor will be responsible for the following:

- * The Primary Course Tutor will enable the graduate to gain the appropriate tutorage with regards to the lead-up and completion of the evaluation process – this may include 1:1 tutorage or group tutorage.
- * To read draft copies of submitted work prior to final evaluation and submission and give feedback to the graduate.
- * To complete the first internal marking of submitted work from the graduate.
- * To organise the second marking of the completed works of the graduate with an independent marker.
- * To arrange the external assessment of a sample of the graduate's completed works.
- * To pass onto the training co-ordinator the outcome of the above processes.
- * If the graduate's evaluation is unsuccessful, the primary course tutor will support the graduate exploring the areas of concern and enabling a further submission.
- * This further submission by the graduate can be undertaken after a period of 3 months, and in the event of a second fail to arrange support for a third and final submission.

Final Evaluation Panel (Professional Competency)

The Evaluation Panel is made up of five representatives and meets twice a year in January and July. All submissions/documentation will be forwarded to the Evaluation Board at least one month before the panel actually meets.

This will give time for the panel members to peruse the submission and relevant documentation.

The graduate will meet for approximately 30 minutes where the panel will consider the relevant submission/documentation and ensure themselves that the graduate is of an ethical and professional manner in line with the professional competency for accreditation.

After the successful completion of the evaluation panel the graduate will be accredited by MIP and endorsed by the UKCP for UKCP registration.

Timeframes for MIP Graduates Going Forward for Final Evaluation and Registration

- * MIP Graduates working towards completion of their final evaluation and registration would need to complete all their requirements for the final evaluation within **3 years** of the completion of their 4 year training component at MIP.
- * MIP Graduates who do not complete these requirements within the three years will normally be expected to undertake a number of further training modules (or equivalent training hours as agreed by the training co-ordinator). These extra modules will need to be completed within one calendar year.

The complete evaluation must take place within **4 years** of graduating from MIP.

For graduates from MIP who completed prior to the UKCP registration of MIP, they must complete the extra modules and evaluation within **12 years**.

APPEALS

If your submission for accreditation was unsuccessful you have the right to appeal against our decision following the process below.

There are 2 grounds on which you can appeal:

1. If the assessment procedure has not been followed correctly, or
2. If your submission has not been fairly and properly assessed against the published criteria.

How to Appeal:

Appeals should be made in writing to the Chair of the Evaluation Panel within 14 days of receiving the decision.

An "Appeals Panel" will be formed which includes the Chair of the Evaluation Panel and at least one senior member of that panel as well as two external members. The applicant may be invited to a face-to-face meeting. This process will be completed within one month of receiving the appeal letter. The Chair of the Appeals Panel holds authority and will make the final decision on any appeal.

Where there is evidence that a member is not meeting requirements for accreditation, the person concerned will be provided with the reasons and given time to comment. Where it is appropriate, members will be offered advice intended to improve the chances of successful evaluation.

COSTS

Submission - reading of documentation - and final evaluation panel process - **£400**.

Supervision with regards to case study submission - (number of supervision hours to be negotiated with your case study supervisor - this can be your primary course tutor or a supervisor of your choice though this must be differentiated with regards to your clinical supervisor - average cost of supervision at time of writing **£50-£60**).

Supervision with regards to transcript submission - number of supervision hours to be negotiated. The supervisor may be your primary course tutor or a supervisor of your choice - this needs to be differentiated with regards to your clinical supervisor - average cost of supervision at time of writing **£50-£60**).

If the graduate is unsuccessful in their evaluation and deems to appeal against the decision, there will be a small cost with regards to that appeal process.

In terms of when money needs to be submitted with regards to the final evaluation panel and submission, the **£600** will need to be submitted at least one month ahead of the meeting of the evaluation panel, and it needs to be submitted to the Manchester Institute for Psychotherapy by the above date.

Also, please note that no graduates will be able to commence to evaluation without all debts to MIP being paid up in full.

Re-accreditation Procedure for UKCP Registered Graduates

5 Year Re-accreditation Process

The UKCP requires that all therapists who are registered with the UKCP must be re-accredited every 5 years.

Purposes of Re-accreditation:

- * To underpin and promote reflective and informal practice and continuing professional development.
- * As a result, to underpin and support best practice in a way that is beneficial to both practitioners and service users.

Re-accreditation Procedure and Requirements

MIP Minimum Requirements are:

- A) Demonstrate that they are still working in a professional capacity
- B) Supervision log - documentation to verify their supervision provision over the last five years. This should also include a statement from their present supervisor verifying the amount of contracted supervision.
- C) Copy of professional indemnity insurance cover.
- D) An outline of organizational work – teaching – training – seminars – lectures etc.
- E) Continuing professional development record. Members must provide details of their ADL over the last five years in keeping with UKCP and MIP's ADL requirements.

The minimum requirement is 50 ADL hours per year = 250 hours over the last five years. (This will include certificates of attendance and documentary evidence).

In this context, we would require a short evaluation of your future needs and indication on how those will be met.

- F) Each member needs to show that their ADL reflects the diversity and equalities policy of the UKCP.

This includes things such as an understanding of power dynamics, prejudice, importance of oppression, and the needs of the diverse group of clients that they work with on a clinical level.

- G) Each member will write a brief reflective document (1000 words) outlining the development of their clinical practice over the last five years. This should also include their future aspirations with regards to their clinical journey and enhancement of professional effectiveness.
- H) Details of any complaints made with regards to yourself in the last five years.
- I) Details of your professional world.
- J) Life - work balance - details of non-professional interests including details of any significant family or personal events over the last 5 years.

Professional Will Arrangements

The HIPC guidelines state “We recognise it as our professional responsibility to ensure that arrangements are in place for sudden long-term or permanent absence from work so that the clients’ needs can be provided for”. Therefore, in this submission please describe your present professional will documentation/arrangements.

Re-accreditation Procedure/Criteria

- A) MIP will inform MIP graduates when they are due for re-accreditation. This will be done four to six months before the due date.
- B) Members will choose a professional peer group of three to four people. (These people need to be UKCP registered psychotherapists).
- C) The peer group will meet and the individual needs to take with them the necessary requirements outlined above – where they will discuss and provide written evidence to each other, and evaluate how they met the requirements above.
- D) The chair of the group, after the necessary discussion and evaluation, collects the individual’s written evaluation, with a short report of the peer group’s process and sends it to the MIP re-accreditation committee.
- E) If there is a lack of agreement within the peer group concerning one of the members with regards to their evaluation or documentation the chair of the peer group will inform the chair of the re-accreditation committee as soon as is possible to do so.

Final Outcome of the Above Procedure

The re-accrediting committee looks at the documentation and report from the peer group and discusses whether to

- i. Re-accredit
- ii Re-accredit with conditions and time schedule
- iii Not to re-accredit

Accreditation Panel

The Accreditation Panel is made up of five representatives and meets twice a year in January and July. All documentation from the successful candidate will be forwarded to the Accreditation Committee for consideration for registration with UKCP.

The five representatives will be made up of trainers, course tutors, supervisors of MIP.

After completion of this stage the director of training will inform the UKCP of the candidate's name for formal registration.

APPEALS PROCEDURE

If your submission for re-accreditation was unsuccessful you have the right to appeal against our decision following the process below.

There are 2 grounds on which you can appeal:

1. If the assessment procedure has not been followed correctly, or
2. If your submission has not been fairly and properly assessed against the published criteria.

How to Appeal:

Appeals should be made in writing to the Chair of Re-accreditation within 14 days of receiving the decision.

An "Appeals Panel" will be formed which includes the Chair of Re-accreditation and at least two senior members of the Re-accreditation Committee. The applicant may be invited to a face-to-face meeting. This process will be completed within one month of receiving the appeal letter. The Chair of the Appeals Panel holds authority and will make the final decision on any appeal.

Members not meeting requirements:

Where there is evidence that a member is not meeting requirements for re-accreditation the person concerned will be provided with the reasons and given time to comment. Where it is appropriate, members will be offered advice intended to improve the chances of successful re-accreditation after subsequent re-accreditation.

VOLUNTEER PSYCHOTHERAPIST

JOB DESCRIPTION

This section is to let you know what is expected of you on your Student Placement at the Manchester Institute for Psychotherapy (MIP).

1. Offer sessions (2-3 per week). Sessions are 50 minutes.
2. Be available at a regular time each week to provide psychotherapy..
3. Complete all relevant paperwork promptly (assessment, ongoing and ending paperwork).
4. Attend monthly individual supervision. Only in exceptional circumstances will you be able to miss these appointments. It is the responsibility of yourself to get individual supervision.
5. Keep appropriate psychotherapy boundaries with all client work.
6. Adhere to the UKCP – MIP Ethical Framework for Good Practice in all aspects of your psychotherapy for MIP.
7. Be aware of health and safety issues and inform the office staff of any hazards.
8. Know what to do in the event of a fire or other emergency evacuation at MIP.
9. Report any incidents to the office at MIP so that it can be documented in the incident book.
10. Complete all necessary client/student paperwork as required by MIP.
11. Report any safeguarding issues to the office or to the Safeguarding Lead which is Stephanie Cooke. Please do not wait for supervision to do this.

Please indicate below which day(s) of the week you will be able to do placements and the time you are available. For logistical reasons please give as many options as possible so that we can accommodate you as far as possible. You will be able to start at 9.00 am and go up into the evening until 8.00 pm.

Please note that the time allocated to you by MIP will be the same time that we keep you to for the duration of your placement.

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY AND TRAINING

END OF YEAR ASSESSMENTS - PART ONE

The assessments are based on the 360 degree system:

The assessment system encourages a synthesis of your professional and personal development that is essential for a career in psychotherapy. The notion of myself and I represents the ability we have to witness and reflect on ourselves and the development of our 'benign internal supervisor'

Assess your interactions with yourself and others in terms of ego states, transactions, stroking, games, rackets and time structuring.

Here are some questions to get you on track for 360 degree feedback based assessment

Assessment of myself.

How would I describe my attachment behaviours to other course members, trainers, clients/professional contacts and the course material

What is happening for me on the course?

What permissions did I give myself this year?

What and how have I contributed to the training group?

Describe some of your internal dialogues while you have been on the course

Does any of my script material 'stick out'?

Strokes I gave

Strokes I wanted to give but didn't

How does my development in TA impact on the people and processes going on around me at work, at home and in the community?

Is there anything I wanted and prevented myself from getting this year?

My personal aims for the next training year

My professional aims for the next training year

Assessment of others

Describe the attachment behaviours of other course members, trainers, clients or supervisors attaching to me?

Say which permissions you received from others

Tell others the contributions they have made to the course

Tell others any internal dialogues you have had about them

Describe to others how their script material 'sticks out'

Tell others what you would like to experience more of next year

Tell others what you would like to experience less of next year

Acknowledge the strokes I received from others

Ask for the strokes I wanted to get but didn't

Were you prevented from getting something by somebody else in the group?

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY AND TRAINING

END OF YEAR ASSESSMENTS - Part Two

Trainer Assessment of Course Members

For:..... **Course/Year:**

From: to:.....**Date:**.....

Hours Completed

These headings form a basis for discussion, some questions to pose and invitations for reflection in the form of a dialogue between trainer and course member.

- Attachment behaviours to other course members, trainers, clients/professional contacts and the course material

- What is happening for you on the course?

- Ways you have changed over the year.

- Permissions you gave yourself this year

- What and how you have contributed to the training group

- Any script material that 'sticks out'?

- Strokes you were seen/heard giving

- How your development in TA impacts on the people and processes going on around you at work, at home and in the community.

- Is there anything you wanted and prevented myself from getting this year?
 - Readiness to practice with clients

- Personal aims for the next training year

- Professional aims for the next training year

END OF YEAR REVIEW

NAME (optional).....

YEAR 1, 2, 3 or 4

DATE.....

1. What were the things that you liked about this training year?				
2. What were the things that you would have liked to be different?				
Trainer Skills and Competencies				
Please complete the below for (Trainer's name)	Excellent	Good	Average	Room for development & suggestions
Ensures students feel safe and supported				
Models the philosophy of TA in interaction with students				
Presents information clearly and accurately				
Uses a variety of training methods to enhance the learning opportunities				
Sequences and paces information to suit the group and individual learners				
Provides additional and summary information on request				
Adjusts presentations in response to learners' needs				

Trainer Skills and Competencies				
Please complete the below for (Trainer's name)	Excellent	Good	Average	Room for development & suggestions
Deals sensitively and appropriately with distractions and interruptions				
Uses appropriate questioning and information seeking techniques				
Creates a climate where learners can comfortably ask questions and make comments				
Gives appropriate feedback in a positive and helpful manner				
Appropriately challenges excluding or discriminatory behaviour or language				
Welcomes and uses feedback about self from participants				
Please give your thoughts about the course structure				
Please give your thoughts about the course content				
Would you have preferred a different structure to the training year / day?				
Do you think the balance between theory, skills and professional and ethical input was appropriate. If you wanted more or less of something what would it be?				

Please rate the efficiency of MIP's administration processes at all stages of the training cycle.
Did you get timely responses to your requests for information/help?

Please give a brief evaluation of (visiting Trainer) - ONE

Please give a brief evaluation of (visiting Trainer) - TWO

Please give a brief evaluation of (visiting Trainer) - THREE

OVERVIEW OF THE MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

The Manchester Institute for Psychotherapy (MIP) evolved from the Lifestream Centre for Psychotherapy, which was founded by Bob Cooke TSTA in September 1987.

The Manchester Institute became a Training Organisation of the UKCP in October 2015 and a Training and Accrediting Member of the UKCP (HIPC) in 2017.

[Bob Cooke](#) was interested in the idea of creating a Therapy Centre in South Manchester and saw it as a place where people could come, knowing that they would be attended by skilled therapists, who treat clients with high regard and with confidence, in safety and confidentially.

We have a fundamental belief that those who are personally motivated and willing to change will do so, and in so doing inspire the growth of others. Whilst on this path of self-development those who change will enhance the development of their environment.

For those working and training at the Institute, personal therapy and supervision are a basic requirement, thus ensuring a clear and safe environment for all clients in attendance.

“We have a fundamental belief that those who are personally motivated and willing to change will do so, and in so doing inspire the growth of others.”

The Institute is committed to the values inherent in anti-oppressive practice. The aim of this policy is to provide a safe environment for all who pass through the Institute. It is expected that all people be equally respected and difference of any kind be valued and accepted, for example, in relation to race, physical or sensory disability, sexual orientation, gender, age, size, class, religion.

The Institute’s Psychotherapy Training is recognised by the Institute of Transactional Analysis (UKATA) and the European Association For Transactional Analysis (EATA), which is a member of the United Kingdom Council for Psychotherapy (UKCP).

The Institute each year enrolls a new student intake group for a four year Diploma course which in turn leads to their registration as UKCP psychotherapists. To achieve this, they have to attend: 600 hours of tutor face to face teaching throughout the course; 40 hours of personal therapy each year; attend supervision for their client work; produce academic assignments - including a research project to a high calibre - attending a mental health placement - 80 hours; 160 hours ADL, 450 client contact hours.

In the December module of the second year trainees will undertake their clinical competency evaluation where their ability to work with clients is evaluated by their tutor. This is a robust and formal evaluation, which gives the successful student the Manchester Institute’s clinical endorsement to practice as a beginning practitioner, with guidance and supervision.

CLINICAL PLACEMENTS

After the clinical competency endorsement has been awarded by MIP, this will be a endorsement that the trainee is ready to apply for a placement either with MIP or with an external Placement Provider.

The trainee needs a minimum of 100 clinical hours with a placement provider by the end of the 4th year of training at MIP. This is one of the parallel obligations for graduation at MIP.

The 100 hours can be gained with one or more placement providers and it is expected that they will see two to three clients per week in order to gain hours required.

It is expected that the trainee will write a short case study (5000 words) on one of their placement clients. This will be assessed and is part of the parallel obligations for MIP graduation, and therefore needs to be submitted to the course tutor by April of the 4th year.

Trainees are required to keep a written record of their work, as may be required to make audios of their actual practice. Material about clients is regarded as confidential and when used for assignments and/or for supervision client anonymity must be preserved.

Trainees shall at all times work in accordance with UKCP's Ethical Framework. This requires that they work to specific contracts with their clients and have adequate supervision of their work, at a ratio of 1:6 hours. Approved supervisors will report to the Institute on a student's progress.

Please note that students will be required to have a UKCP supervisor, and if the placement provider does not provide the supervision the cost will be passed on to the student, usually £40-£50 per hour per month. It is the responsibility of the student to check that the supervision you have is UKCP recognised.

The programme takes responsibility for monitoring and evaluating a student's practice. A responsible person within the Placement Provider, preferably a qualified counsellor/psychotherapist, will have oversight of a student's work, ensure appropriate referrals are made and take overall clinical responsibility for clients in the Placement Provider. Trainees are to be informed about the provision made by the Placement Provider for medical and psychiatric referral.

For employers and public liability purposes in accordance with insurance industry practice, agencies providing placements will regard a trainee as its employee while undertaking placement. Professional Liability by the Institute will cover all trainees in placement. In addition trainees will take out their own individual insurance.

Although the Placement Provider Co-ordinator and the Placement Provider representatives cannot engage in regular face-to-face meetings, it is essential that agencies maintain contact in relation to the placement when this is necessary. Bob Cooke (The Clinical Director) or the programme leader would be appropriate people to contact regarding an individual trainee.

Complaints or concerns about trainees or the programme should be made in the first instance to the Clinical Director, Bob Cooke.

Postal address:
The Manchester Institute for Psychotherapy
454 Barlow Moor Road
Chorlton-cum-Hardy,
Manchester M21 0BQ.
Telephone: 0161 862 9456
Email: bob@mcpt.co.uk

The Placement Provider shall provide trainees with confirmation of its requirements and arrangements with regard to health and safety, confidentiality, discipline codes and similar matters, and underline the student's obligation to comply with such requirements.

The Manchester Institute provides a co-ordinator for day-to-day liaison between Agencies and trainees. The co-ordinator will support the administration and the placements.

In the event that a trainee is considered by the Placement Provider to have breached any of its requirements, the Placement Provider shall provide full details of the matter to the Clinical Director, together with a recommendation as to the resolution of the matter.

In the event that a student's breach of the Placement Provider requirements or his/her attitude or performance is considered by the Placement Provider to render him/her unsuitable for work in the Placement Provider, then the Placement Provider shall have the absolute right to remove the trainee permanently from the Placement Provider. In view of the seriousness of such a decision this will be taken only at a senior level within the Placement Provider. In the event that a trainee subsequently proceeds against the Institute, by way of appeal or otherwise in respect of the removal from the Placement Provider, or its consequences for the student's registration with the Institute, the Placement Provider will provide all reasonable assistance to the Institute in dealing with the appeal or other action.

PSYCHOTHERAPY PRACTICE: GUIDANCE FOR TRAINEES

It is a requirement for UKCP Accredited Programmes that the trainee must have opportunities for substantial and regular psychotherapy work with real clients (i.e. in addition to any skills practice with fellow trainees). On these programmes trainees must complete a minimum of 100 hours of supervised psychotherapy practice in placement. Formal client work during training on this programme does not start usually until March/April of the second year. Of course, it may start later according to which placement provider you are assigned.

This is preceded by formal assessment of trainees' therapeutic skills, the clinical competency assessment. When this has been satisfactorily completed, it is expected that trainees should undertake an average of 2 or 3 hours of psychotherapy practice each week from the beginning of their placement, until they have completed the 100 hours.

Experience indicates that, in order to accommodate holidays, missed or cancelled appointments, sickness absence, etc. most trainees find it best to arrange 2-3 client appointments per week once their placement is underway.

Trainees, with support from their supervisor, are responsible for ensuring that they undertake sufficient psychotherapy placement practice, with regular supervision, both of which they record in their Professional Log, which is presented for evaluation at the end of their 4th year of training.

AUDIO-RECORDING OF CLIENT WORK

Trainees will need to ensure that they can regularly make audio-recordings of their work with clients. Time is committed in the training/supervision to discuss the best way forward with regards to recording and the best ways to deal with any issues surrounding this process.

However, it must be emphasised to trainees that it is essential that they have the agreement of their placement and their placement client to record. It is essential for this training that trainees make audio-recordings of their work which can then be used for supervision and for future evaluation within the training programme.

In order to facilitate this, it is important that trainees have a choice of recordings to present for assessment. Trainees' audio-recordings can be regularly used as part of the supervisory process.

SUPERVISION

If supervision is provided by the placement, it is necessary that the trainee is clear whether it is BACP supervision or UKCP supervision, or any other type of supervision which is offered.

As this programme is UKCP recognised, the trainee within the placement would need to have a UKCP supervisor. If this supervisor utilises any other supervision offered by the placement this will be counted as ADL hours in their supervision log, and as said previously in this handbook, they would to make sure that they have a UKCP supervisor with regards to their placement supervision.

Generally it makes sense for the frequency of supervision to be tailored to the number of clients a trainee is seeing over any period of time. Additionally, there may be cases where trainees will need supervision sessions above and beyond the minimum number required by the programme if they have seen more clients. It is expected that trainees have a ratio of one hour's supervision to every 6 practice hours.

Trainees and supervisors are jointly responsible for ensuring supervision takes place on the requisite number of occasions. While it is recognised that some trainees have difficulty initially getting clients and may not need the earlier supervision sessions, it is essential that they are compensated for these later when they are seeing more clients in order to fulfil the requisite number of hours of supervised psychotherapy placement.

There should be a clear agreement as to when and where placement supervision takes place, and a mutual understanding of how arrangements are changed or postponed in the event of such things as sickness or holidays etc. It is also expected that supervisors will be available for emergency telephone contact by trainees where there is an urgent supervision issue.

Trainees are advised that they should aim to complete at least 50 hours of practice before the end of September at the start of year four, since the need to catch up on work from year 3 puts trainees under considerable pressure in the final year.

ASSESSMENT OF CLIENT WORK (THE PROFESSIONAL LOG)

Trainees are required to keep a record of the clients they have seen during their psychotherapy placement and subsequent supervision sessions in their professional log.

This may be taken along to supervision for the supervisor to see. Supervisors vary as to how much they make use of the log. Other supervisors prefer if trainees tell them directly about their work in the supervision session.

However, it is important that the supervisor has regular access to the trainee's professional log if they wish to check how they are working and whether they are keeping it up-to-date.

The trainee's tutors evaluate the professional log. It is important that supervisors' reports are in the log at the point where it is due for review or assessment. The template for these reports is in the back of this document.

If the report is not available tutors may contact a supervisor by telephone. It is anticipated that if a supervisor feels a trainee is not competent to pass the placement this would be discussed not only with the trainee but also with the tutors at any point during the training but certainly before the final 2 months of the training.

ROLE OF SUPERVISORS/PLACEMENT

Supervisors of the placement provider are expected to have experience of the supervisory and assessment role and understand the essential elements of a psychotherapy practice. It is recognised that they will have their own way of working and this is respected. Their input and knowledge of trainees' practice is valuable and they are asked to provide written reports about their trainees on occasions during the programme.

Reports and Reviews:

- (1) Mid term review (half way through the expected term of placement - 50 hours).
- (2) A final report when the trainee has completed their psychotherapy placement hours.

A template for the mid term review and final report from the placement provider are in the back of this placement handbook.

PROCEDURE FOR THE APPROVAL OF SUPERVISORS

To provide supervision within a Placement Provider the supervisor must have:

- Membership of a counselling/psychotherapy professional body (i.e. BACP, UKCP, BPS).
- A supervisor's qualification or substantial experience of supervising counsellors/psychotherapists.
- A minimum of 5 years post-qualification experience of working as a practitioner.
- A humanistic orientation compatible with the programme's core model.

A trainee checks with the supervisor that he/she meets the above-mentioned criteria.

Please note if you are following the UKCP Pathway you must have supervision from a UKCP supervisor for your supervision hours to count.

PLACEMENT CLINICAL REPORTS

At the completion of the clinical work with each placement client, a report will need to be submitted to MIP and their respective supervisor within a **six week** timeframe.

Therefore, if the trainee over the period of 2 years has 4 different clients, 4 reports must be written. Two copies of each, one for MIP and one for their respective supervisor.

The report will include the trainee's view of the following in relation to each client the trainee has worked with.

- * The Placement - for example, were you satisfied with the placement experience in relation to this client, were you supported and encouraged to work within your personal and professional scope of practice relevant to your current stage in the programme of training.
- * Health and Safety Issues - for example, were there any safeguarding issues and how were they dealt with?
- * Were there any issues with respect to the environment that you worked within and how did you deal with this?
- * Did you identify any gaps in your learning or the support provided?
- * Communication with the Placement Provider - what was the process of referral of clients to placement trainee, did you feel that the client assessment by the placement provider was based on your learning needs and experience? Did you feel the client was matched appropriately to you with regards to meeting their needs?
- * Supervision, for example did you feel supported with regards to your Supervisor and how effective was your supervisory experience?
- * With regards to your placement client how did you progress with your clinical skills and knowledge with this client? Were there any identified learning opportunities provided by the placement/supervisor to meet any gaps/needs in clinical skills or knowledge?
- * What were the business and treatment Contracts that you first established with your placement client?
- * Were the Contracts completed? If not, why not?
- * What were the reasons given for your client's endings? Did you come to a natural end, i.e. when the contract was achieved?
- * Was it an enforced ending and if so what were your reflections regarding the enforced ending.
- * What was the placement client's prognosis with regards to future progress?

Length of Report

If the placement client only attended for up to six sessions, or less, the report needs to be maximum of **300-500 words**.

If the placement client's time duration with yourself is over six sessions then the report needs to be a maximum of **800-1000 words**.

Please note there is a **six week** rule with regards to completion of the report and providing the documentation to MIP and your relevant supervisor.

PAPERWORK

It is necessary for paperwork (forms, client notes and reports) to be completed in a professional and timely manner.

With the only exception being their reports and the recording consent form (If completed), the trainee cannot take copies of their paperwork out of the Placement Provider. This is to ensure that client confidentiality and the data protection act is complied with.

Upon acceptance of a client, a file will be made by the Placement Provider, which will be held in compliance with the data protection act.

All paperwork is to be considered confidential and all MIP and Placement Provider personnel will abide by the UKCP's Code of Professional Practice and Ethics.

Placement Provider personnel will have access to the paperwork and this does not mean that the paperwork will be scrutinised by all personnel.

If there is a need for clarification on any aspects of the paperwork, then the query should be addressed to the Clinical Director of that Placement.

If an audio recording contract is made with the client, then it must be held within the client files at the Placement Provider, the trainee may photocopy this agreement and keep it safe in their personal files.

No audio recordings of the sessions may take place before the written consent of the client has been gained.

Audio recordings are to be labelled in a non-identifying manner and they are to be stored and kept safe by the trainee. The client has the right to withdraw their consent at any time.

All forms that are relevant to the placement including Health & Safety form, reviews and reports contribute towards the trainee's final portfolio.

All forms must be included in the Portfolio, or the trainee risks their placement not being fully evidenced. Therefore, their parallel obligations would not be completed and they would need to complete further placement hours to graduate.

EXAMPLE OF CLIENT INFORMATION FORM

Full Name

Date of Birth

Address (If new information the client must inform the student)

.....

.....Postcode

Next of kin/to be notified in an emergency

.....

Tel. No.

Doctor's name and address/phone number

.....

.....Tel No.

Details of any medication

Family History (Parents/siblings/children/significant others)

Reason for attending

Outcome required/other information

AUDIO RECORDING CONTRACT

I, have been asked to give my consent for audio recordings of my sessions with to be recorded.

I understand that this is ordinary for trainees to record sessions and that this is necessary for reflective practice, supervision, research practice and examinations.

I understand that I can withdraw my consent at any time and I have been assured if this is my choice, this will not impact upon the therapy.

I have the choice to ask for all previous recordings to be erased at any time, the exception being if it is one calendar month before an examination, however the recording will be erased immediately after the completion of the examination.

The audio recordings will only be used for clinical supervision, research or examination purposes. They will not be heard by anyone who is not bound by a professional code of ethics and confidentiality.

I understand that identifying information, such as my name, names of others, places and other details will be changed to protect me.

I understand that the student will be responsible for the safety of the audio recordings, keeping them safe and secure. This includes the use of passwords if the recordings are kept on a memory stick, pc or laptop and registered with the ICO.

I understand that the recordings will be erased when the student has completed their training at the very latest.

I confirm that I have not been put under any pressure to consent to recording

I give my consent to the recording of my sessions

Student's name.....Date

Two photocopies of this contract are to be made by the student, one for the client and the second for the student's records. The original to be filed at MIP.

Three way contract between the Manchester Institute of Psychotherapy, the Placement Provider and the Student

This is a three way contract for therapy between the Placement Provider, the trainee in advanced psychotherapy training (known as the student), and the Manchester Institute of Psychotherapy (MIP).

MIP will:

- * Initially have the written confirmation of the student's tutor that the student is competent to practice.
- * Ensure the student is in regular supervision, will monitor and evaluate the student's clinical practice.
- * Advise the client if there are grounds for discontinuing the placement, e.g. if the student leaves the training.
- * Provide a suitable venue.
- * Provide a secure filing system
- * Provide a minimum of one and no more than three clients for the maximum of one year.

The Student will

- * Attend MIP training; remain in regular therapy and supervision.
- * Attend meetings that are pertinent to their placement.
- * The student will ensure that they practice and abide by the UKCP's codes of Ethics and Professional Practice.
- * The student is responsible for completing Placement Provider and MIP paperwork and filing notes on sessions.
- * Report to the Placement Provider and their supervisor any issues that may impact upon their ability to practice.
- * The student may not under any circumstances see the client after the period of twelve months or move the client to another practice without prior permission of MIP and the Placement Provider.

The Placement Provider will:

- * Inform MIP if their placement policy changes
- * Inform the student if the client is unable to attend the session.
- * At the mid-way session and at the end of the work complete a written report on the trainee's progress.
- * A minimum of one session to be held weekly over the maximum period of 50 hours.
- * The client cannot see the student at any other practice except the agreed practice and building of the Placement Provider.
- * Recordings/Questionnaires completed may be used for supervision/research purposes, identities will not be disclosed at any time
- * Keep the student "safe" and recognise their level of competence at assessments.

Course tutor on behalf of MIP
I believe that is competent to practice

UKCP CODE OF ETHICS AND PROFESSIONAL PRACTICE

*Ethical principles and Code of Professional Conduct adopted
by the Board of Trustees in 2019*

This Code contains the standards of ethics, practice and conduct which UKCP expects of all practitioners, and which must be followed whatever your modality of practice and whether you meet clients in person, online or otherwise.

The term 'practitioner' means an individual UKCP registrant who practises psychotherapy or psychotherapeutic counselling.

The term 'client' includes individuals, couples, families or groups who engage in psychotherapy or psychotherapeutic counselling.

Should a concern arise about a practitioner's practice, it is against these standards that it will be judged under the Complaints and Conduct Process.

The practitioner commits to engage with the challenge of striving for ethical practice and conduct, even when doing so involves making difficult decisions.

In the numbered points below, we set out the things we regard as key to ethical practice and have grouped them under these headings:

- Best interests of clients
- Professionalism
- Communication and consent
- Records and confidentiality
- Professional knowledge, skills and experience
- Social responsibility
- Trust and confidence

As a practitioner you must:

Best interests of clients

1. Act in your client's best interests.
2. Treat clients with respect.
3. Respect your client's autonomy.
4. Not have sexual contact or sexual relationship with clients.
5. Not exploit or abuse your relationship with clients (current or past) for any purpose including your emotional, sexual or financial gain.
6. Not harm or collude in the harming of your client or the clients of others.

Professionalism

7. Decline any gifts, favours, money or hospitality that might be interpreted as exploitative.

8. Be aware of the power imbalance between the practitioner and client, and avoid dual or multiple relationships¹ which risk confusing an existing relationship and may impact adversely on a client. If a dual or multiple relationship is unavoidable, for example in a small community, take responsibility for clarifying and managing boundaries and protecting confidentiality.
9. Exercise all reasonable care before entering into a personal or business relationship with former clients, taking into account the time that has elapsed since therapy ended. Should such a relationship prove to be detrimental to the former client, you may be called to answer an allegation of misusing your former position.
10. Recognise that your behaviour outside your professional life may have an effect on your relationship with clients and take responsibility for critically examining these potential negative or positive effects to the benefit of the client.

Communication and consent

11. Provide in your advertising, and on request, a clear and honest statement of the qualifications relevant to your field of practice and your UKCP registration, and advertise your services accurately and in a responsible and professional manner, without exaggeration.
12. Ensure that the use of title such as “Doctor/DR” and post nominal initials after a name in communications are: accurate; indicate whether it is a medical or academic qualification; and reasonably informs the public of their relevance to the practice of psychotherapy.
13. Not make any claims which you cannot demonstrate to be true or include testimonials from clients in any advertising.
14. Explain to a client, or prospective client, your terms, fees and conditions and, have information readily available to clarify other related questions such as likely length of therapy, methods of practice to be used, the extent of your own involvement, complaints processes and how to make a complaint, as well as arrangements for referral and termination of therapy.
15. Confirm each client’s consent to the specifics of the service you will offer, through a clear contract at the outset of therapy. We do not specify a written contract but in the case of any conflict a clear written contract supports both the client and yourself. Help clients to understand the nature of any proposed therapy and its implications, what to expect, the risks involved, what is and is not being offered, and relevant alternative options.
16. Not intentionally mislead a client about the type or nature of psychotherapy practised.

¹ Such relationships could be social or commercial relationships between practitioner and client, or a supervisory or training relationship running alongside the therapeutic one.

17. Only participate in research about clients with clients' verifiable and informed consent before the commencement of therapy and research, clarifying the nature, purpose and conditions of any research in which clients are involved and in accordance with relevant codes and guidance. Pay particular attention to any additional guidance or special considerations which may apply to specific groups, such as children and young people.

Records and confidentiality

18. Respect, protect and preserve clients' confidentiality. You must protect sensitive and personally identifiable information obtained in the course of your professional work.
19. Safeguard the welfare and anonymity of clients when any form of publication of clinical material is being considered and to always obtain your client's verifiable consent in any case where the welfare or anonymity of a client may be compromised. This includes situations where a client or former client might recognise themselves in case material despite the changing of names or actual circumstances.
20. Make notes appropriate to the modality of therapy being practised, and keep records which are accurate, legible and timely. Keep clients' information confidential, subject to legal and ethical requirements, and discuss it only within appropriate professional settings.
21. Notify clients, when appropriate or on request, that there are legal and ethical limits to confidentiality, and circumstances under which confidential information might be disclosed to a third party.
22. Consider obtaining legal and ethical advice in relation to providing information for judicial or administrative proceedings, and as to the potential impact that this could have on the commitment of confidentiality to the client, even when client consent is given.

Professional knowledge, skills and experience

23. Offer only the forms of therapy in which you have had adequate training or experience.
24. Understand the limits of your competence and stay within them in all your professional activity, referring clients to another professional when appropriate. This includes recognising that particular client groups, such as children and families, have needs which not all practitioners are equipped to address.
25. Ensure continuing ability to practise by securing supervision and ongoing professional education and development sufficient to meet the requirements of UKCP, its modality colleges and its organisational members.
26. Ensure that you do not work with clients if you are not able to do so for physical or mental health reasons, or when impaired by the effects of drugs, alcohol or medication.
27. Make considered and timely arrangements for the termination of a therapeutic relationship, or if you are unable to continue to practise, ensuring that clients are informed and alternative practitioners are identified where possible.
28. Have arrangements in place for informing clients and, where appropriate, providing them with support in the event of your illness or death.

Social responsibility

29. Actively consider issues of diversity and equalities as these affect all aspects of your work and acknowledge the need for a continuing process of self-enquiry and professional development.
30. Not allow prejudice about a client's sex, age, colour, race, disability, communication skills, sexuality, lifestyle, religious, cultural or political beliefs, social economic or immigration status to adversely affect the way you relate to them.
31. Avoid behaviour that can be perceived as abusive or detrimental to any client or colleague based on the above factors.

Trust and confidence

32. Act in a way which upholds the profession's reputation and promotes public confidence in the profession and its members, including outside of your professional life as a UKCP practitioner.
33. Maintain an awareness of, and comply with, all legal and professional obligations and UKCP policies which apply to your practice.
34. Ensure that any communication in which you take part, and in particular your participation in social media, is carried out in a manner consistent with this Code.
35. Safeguard children and vulnerable adults, recognising your legal responsibilities concerning their rights and taking appropriate action should you consider any such person is at risk of harm.
36. Ensure that you are familiar with and understand UKCP's published policies and guidances, in particular those on Safeguarding and on the Memorandum of Understanding on Conversion Therapy².
37. Challenge questionable practice in yourself or others, reporting to UKCP potential breaches of this Code, and activating formal complaints procedures especially where there may be ongoing harm to clients or you have significant grounds for believing clients to be at risk of harm.
38. Ensure that your professional work is adequately covered by appropriate indemnity insurance or by your employer's indemnity arrangements.
39. Co-operate with any lawful investigation or inquiry relating to your psychotherapeutic practice. Inform UKCP and any relevant organisational member if you are:
 - a. Charged with a criminal offence;
 - b. convicted of a criminal offence, receive a conditional discharge for an offence, or accept a police caution;
 - c. disciplined by any professional body or membership organisation responsible for regulating or licensing a health or social care profession;
 - or d. suspended or placed under a practice restriction by an employer or similar organisation because of concerns relating to your competence, health or practice of psychotherapy.

HEALTH & SAFETY FORM

If you take a student on clinical placement will you ensure that she/he will receive an induction on commencement of the placement?	
Do you have up-to-date professional indemnity insurance?	
Do you have up-to-date public liability insurance?	
Do you have a fire certificate on your premises?	
If you have answered "no" to the above question, have you carried out a fire risk assessment of your undertaking as required by the Fire Precautions (Workplace) Regulations 1997?	
Do you have suitable and sufficient first aid equipment and assistance readily available?	
Do you record and report all accidents, near misses, dangerous occurrences, diseases and violent incidents as required by the Report of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 1995?	
Has your placement provider ever had legal proceedings taken against it with regards to Health & Safety?	
Are any criminal legal proceedings currently being taken against you as a placement provider with regards to Health & Safety?	

I confirm that the above statements are correct:

SHORT AND LONG-TERM CLINICAL CONTRACTS

With reference to HIPC and UKCP guidelines, it is important that students experience not only working with short-term clinical contracts but also long-term clinical contracts, i.e. one to two years.

If you have only taken on short-term contracts within your clinical placement you will need to have evidence of working clinically with at least one long-term client.

You may arrange a further placement or work from your private clinical practice to achieve the necessary requirement above.

In terms of evidencing the above, this will need to have been logged and you will need to provide supervisory documentation with regards to your experience and growing edges of working with long-term clients as opposed to working with short-term clients.

Manchester Institute for Psychotherapy

MARKING CRITERIA FOR WRITTEN ASSIGNMENTS

Psychotherapy Course in Transactional Analysis from an Integrative Perspective

Student's Name _____
Marked by _____

Date _____
Grade _____

Each academic year will be marked in relation to developing knowledge and practice **A B C D U**

1. ORGANISATION & PLANNING

There should be a structured plan for the work with an introduction, development, middle and conclusion and the work should address the assignment title.

To be written in well-structured logical manner

STYLE & PRESENTATION Assignments should be presented using either Times New Roman or Arial font, size 12 and double spaced, with pages numbered and named.

To include a titled front page with the prescribed word count.

Expression is fluent with no spelling or grammatical errors

2. ARGUMENT & APPLICATION OF THEORY TO PRACTICE

Original and creative ideas should be developed and compared to other known theories, which are included and referenced, showing the application of theory to practice.

Self-awareness to be shown by demonstrating an understanding of their own process, with appropriate application of the theory in relation to themselves and others, and providing evidence of personal experience – in synthesis with theory, and recognition of the transference processes.

3. THEORY & ANALYSIS

Theory should be used to support the assignment title. In addition, there should be practical links to the theory, therefore demonstrating a critical understanding of the subject.

The work should show critical evaluation of the subject with an appreciation of key theories and their limitations. The cultural and political context of theories etc. should be accounted for taking into consideration ethics and diversity. A recognition of power and privilege, and an awareness of influences, values and belief systems, with the distinction between opinions and evidence, should be illustrated

4. RESEARCH & REFERENCING

All work should be referenced and include a Bibliography and Reference Section, using the Harvard Referencing System.

References could be to course handouts, books, articles and web items and all must be accurately referenced with the original author.

Direct and indirect quotations are distinct and referenced appropriately, in order to avoid plagiarism

Grading Scale

A. Excellent in most respects

B. Very good in most respects

C. Good in most respects

D. Satisfactory in most respects

U. Unsatisfactory - some aspects of the assignment need further work (see feedback sheet from marker)

Marked By _____ **Grade** _____

1a. ORGANISATION & PLANNING

(There should be a structured plan for the work with an introduction, development, middle and conclusion and the work should address the essay title.
 To be written in well-structured logical manner)

1b. STYLE & PRESENTATION

(Assignments should be presented using either Times New Roman or Arial font, size 12 and double spaced, with pages numbered and named.
 To include a titled front page with the prescribed word count.
 Expression is fluent with no spelling or grammatical errors)

2. ARGUMENT & APPLICATION OF THEORY TO PRACTICE

(Original and creative ideas should be developed and compared to other known theories, which are included and referenced, showing the application of theory to practice.
 Self-awareness to be shown by demonstrating an understanding of their own process, with appropriate application of the theory in relation to themselves and others, and providing evidence of personal experience – in synthesis with theory, and recognition of the transference processes)

continued over

3. THEORY & ANALYSIS

(Theory should be used to support the essay title. In addition, there should be practical links to the theory, therefore demonstrating a critical understanding of the subject.

The work should show critical evaluation of the subject with an appreciation of key theories and their limitations. The cultural and political context of theories etc. should be accounted for taking into consideration ethics and diversity. A recognition of power and privilege, and an awareness of influences, values and belief systems, with the distinction between opinions and evidence, should be illustrated)

4. RESEARCH AND REFERENCING

(Work should be referenced and include a Bibliography and Reference Section, using the Harvard Referencing System.

References could be to course handouts, books, articles and web items and all must be accurately referenced with the original author.

Direct and indirect quotations should be distinct and referenced appropriately, in order to avoid plagiarism)

9	Ability to facilitate the client, to talk openly and freely.	Yes / No
10	Demonstrates effective interventions using TA	Yes / No
11	To reflect on possible Transference issues and who they may be for the client.	Yes / No
12	Demonstrates the ability to use empathy within the relationship.	Yes / No
13	Demonstrates the ability to be able to access the child ego state	Yes/No

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

EQUALITY AND DIVERSITY POLICY

Introduction

The Manchester Institute for Psychotherapy (MIP) promotes an active engagement with difference. We seeks to provide a framework that allows for diverse ideas and perspectives on what it means to be human, to be considered, respected and valued.

MIP is committed to addressing issues of prejudice and discrimination in relation to the mental wellbeing, political belief, gender and gender identity, sexual preference or orientation, disability, marital or partnership status, maternity and pregnancy, race, nationality, ethnic origin, heritage identity, religious or spiritual identity, age or socio-economic class of individuals and groups.

MIP keeps its policies and procedures under review in order to ensure that the realities of discrimination, exclusion, oppression and alienation that may form part of the experience of its members, as well as of their clients, are addressed appropriately. MIP seeks to ensure that the practice of psychotherapy is utilised in the service of the celebration of human difference and diversity, and that at no time is psychotherapy used as a means of coercion or oppression of any group or individual.

MIP recognises and values diversity and difference and as a result, it is working actively to ensure that its services are non discriminatory in nature.

This Policy was developed with reference to all current Government legislation and guidelines to good practice and applies to the whole organisation and includes all members.

Equality And Diversity Statement

MIP is committed to promoting equality, inclusion and diversity and works to ensure that its processes are fair, transparent, objective and free from discrimination. MIP expects that these values are upheld by any person involved with MIP.

Accountability

The Institute Director is responsible for ensuring that this policy is implemented in all aspects of the Institute's operations.

The Quality & Ethics Committee is responsible for the monitoring and review of this Policy and for evaluating its effectiveness.

All staff members, trainers and therapists of the Institute have a responsibility for implementing all aspects of this Policy within the area they manage, and for ensuring that effective monitoring and review systems are maintained.

HARASSMENT AND BULLYING POLICY AND PROCEDURES

POLICY STATEMENT

It is the intention of MIP that all members, clients and visitors are treated with respect, courtesy and integrity whilst involved in any aspect of the Institute. To this end, the Institute will seek to provide a safe and supportive environment in which everyone is able to study or work to the best of their abilities, free from harassment, bullying or intimidation or fear of these. MIP will not tolerate any behaviour from members, clients or visitors which may constitute harassment. Members, clients and visitors have the right to complain about behaviour they find unacceptable and may take informal or formal action as set out in this Policy to end harassment.

RESPONSIBILITIES AND DUTIES

It is the responsibility of all individuals to ensure that their own personal conduct is in accordance with this policy, that they treat others with the dignity they deserve and that they do not harass, bully or intimidate any member client or visitor of the Institute.

The Director has the overall responsibility for creating an environment and ethos which maintains the dignity of all members of the Institute and for setting standards and taking action, including disciplinary, to ensure that this Policy is implemented.

DEFINITIONS

Harassment can take many forms and it may involve action, behaviour, comment or physical contact which is found to be objectionable or which causes offence. It can include both physical and verbal violence. Harassment is always unwanted, unreasonable and offensive and can result in the recipient feeling threatened or humiliated as well as being physically and/or mentally abused. Such conduct creates an environment which can be intimidating, hostile or humiliating for the recipient.

Anyone who is perceived as different, or who is in a minority, or who lacks organisational power, runs the risk of being harassed. Thus, health, physical characteristics, personal beliefs and numerous other factors may lead to harassment.

This policy is regularly reviewed every 18 months and updated a minimum of every 36 months as necessary.

Revised June 2019

EQUALITY AND DIVERSITY MONITORING FORM

The Manchester Institute for Psychotherapy wants to meet the aims and commitments set out in its equality policy. This includes not discriminating under the Equality Act 2010, and building an accurate picture of the make-up of the workforce in encouraging equality and diversity.

The organisation needs your help and co-operation to enable it to do this, but filling in this form is voluntary.

The information you provide will stay confidential, and be stored securely and limited to only some staff in the organisation’s Human Resources section.

Please return the completed form in the envelope marked ‘Strictly confidential’ to the Manchester Institute for Psychotherapy, 454 Barlow Moor Road, Chorlton, Manchester M21 0BQ.

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

HARASSMENT AND BULLYING, POLICY STATEMENT

It is the intention of MIP that all members, clients and visitors are treated with respect, courtesy and integrity whilst involved in any aspect of the Institute. To this end, the Institute will seek to provide a safe and supportive environment in which everyone is able to study or work to the best of their abilities, free from harassment, bullying or intimidation or fear of these. MIP will not tolerate any behaviour from members, clients or visitors which may constitute harassment. Members, clients and visitors have the right to complain about behaviour they find unacceptable and may take informal or formal action as set out in this Policy to end harassment.

Responsibilities and duties

It is the responsibility of all individuals to ensure that their own personal conduct is in accordance with this Policy, that they treat others with the dignity they deserve and that they do not harass, bully or intimidate any member client or visitor of the Institute.

The Director has the overall responsibility for creating an environment and ethos which maintains the dignity of all members of the Institute and for setting standards and taking action, including disciplinary, to ensure that this Policy is implemented.

Definitions

Harassment can take many forms and it may involve action, behaviour, comment or physical contact which is found to be objectionable or which causes offence. It can include both physical and verbal violence. Harassment is always unwanted, unreasonable and offensive and can result in the recipient feeling threatened or humiliated as well as being physically and/or mentally abused. Such conduct creates an environment which can be intimidating, hostile or humiliating for the recipient.

People can be subject to harassment on a wide variety of grounds, including their:

- disabilities, sensory impairments, learning difficulties, mental or physical ill-health
- ethnic origin, nationality or skin colour
- gender or marital status
- sexual orientation

This list is not exhaustive. Anyone who is perceived as different, or who is in a minority, or who lacks organisational power, runs the risk of being harassed. Thus, health, physical characteristics, personal beliefs and numerous other factors may lead to harassment.

Making a complaint

Any member, staff, visitor, trainee or client who has witnessed or experienced harassment or bullying on MIP premises and wishes to make a formal or informal complaint should read this policy alongside the MIP Complaints Procedure.

This policy is regularly reviewed every 18 months and updated a minimum of every 36 months as necessary

Reviewed 2015

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

COMPLAINTS PROCEDURE

We realise that sometimes things go wrong and people who use our services may want to make a complaint. This document tells you how the procedures work so that the person making the complaint gets a response within a reasonable time. It also helps us to make sure that our procedures and practices are of the highest standards possible within the resources available.

The complaints procedure is intended to:

- be publicised
- be easy to understand and use
- be speedy, with established time limits for action
- respect confidentiality as far as possible
- be impartial and objective
- be responsive, enabling redress as appropriate
- provide support and feedback
- stimulate the improvement of services

Definition of "Member"

- *Anyone who is employed by the Manchester Institute For Psychotherapy*
- *Trainees*
- *Graduates or previous trainers*
- *Practitioners renting rooms*

Process:

1. All members, students, clients and visitors have a responsibility to take informal or formal action to stop any form of harassment or bullying or any other matter of concern which is brought to their attention.
2. It is recognised that in some circumstances it may not be possible to proceed on such an informal basis. A record of such incidents and steps should be kept to assist if further formal action is required. If an informal approach is found to be inadequate, a complaint may be made to the Chair of the Quality and Ethics Committee.
3. All complaints will be investigated by the Quality and Ethics Committee. Complainants have the right to speak to someone of the same sex if this is their choice. Where an

individual is subject to investigation, care will be taken to ensure that the investigation does not cause unnecessary distress to either party.

4. The member complained about must have been a member of MIP at the time of the alleged breach of the Code of Ethics and/or the Professional Practice Guidelines.
5. All complaints will be examined against the Code of Ethics laid down by MIP. This is in line with UKCP Codes of Ethics and Professional Practice Guidelines, in order to give an opinion as to whether there has been a breach of ethics.
6. The complaint should be made as near as possible to the time of origin. Complaints concerning events that occurred more than three years prior to the first contact with MIP's Quality and Ethics Committee will not normally be heard.
7. In the event of disciplinary procedures being invoked, any person involved must be told what is happening and informed of their rights.
8. If the investigation upholds the complaint, prompt action designed to stop unwanted behaviours and to prevent their recurrence will be taken immediately.
9. All parties will be protected from intimidation, victimization or discrimination for filing a complaint or assisting in an investigation. Retaliation against a person for complaining will be treated as a disciplinary offence.
10. All parties involved will be kept fully informed of any actions taken by MIP, this includes any disciplinary action if the complaint is upheld.
11. MIP will not assume responsibility for any expenses incurred by either party involved in a complaint
12. MIP may seek legal advice concerning a complaint.
13. A copy of the Equality policy can be obtained from the MIP website.

Informal Procedure:

An informal complaint may be resolved by the parties meeting to discuss a resolution, or:

1. MIP will convene a mediation meeting between both parties.
2. All parties must agree to attend.
3. Two members of MIP's Quality and Ethics Committee will also be in attendance; one to mediate and one to observe the process.
4. The Mediation Process (see Appendix of the Complaints Procedure) will be followed.
5. This meeting will take place within one month of MIP receiving the complaint.

Formal Procedure:

1. A formal complaint will be put in writing for the attention of the Chair of the Quality and Ethics Committee.
2. Application to withdraw the complaint may be made at any point. However, the Chair may be required to follow due process; this will be dependent on the nature of the complaint.
3. If the complaint is deemed to be outside the remit of the Quality & Ethics committee, all parties will be informed in writing within two weeks.
4. The Quality and Ethics committee will decide if there is a case to answer and will respond accordingly within two weeks of receipt.

If the Complaint Is Upheld:

Upon receipt of a formal complaint, and agreement that the complaint is valid, the Quality & Ethics Committee will employ an Investigator who will:

1. Contact the parties involved.
2. Collect all relevant data.
3. Share the data with the Quality & Ethics Committee.
4. The person must agree to abide by the findings stipulated by the Quality & Ethics Committee. Evidence of compliance must be provided, in writing, within the specified time frame issued.
5. Recommendations/stipulations may be given that the complainees undertakes further supervision/therapy and training, of which the Quality and Ethics committee will be kept informed.
6. Non-compliance with the above may result in a formal warning.
7. Any formal warning given will remain on file for a minimum of 12 months and may lead to their membership of MIP being revoked, or their services terminated.

Appeals Procedure:

1. If any party is dissatisfied with the response, they should inform the Chair of the Quality and Ethics Committee.
2. Appeals will only be granted if the party making the application to appeal is able to demonstrate new evidence to support the appeal. The Quality and Ethics Committee will decide if there are adequate grounds for granting the appeal, in which case an external moderator will be appointed to make a decision.
3. All parties must abide by this decision which will be final.

APPENDIX to Complaints Policy

Mediation Process

The purpose of mediation is to facilitate a satisfactory resolution.

Present in the meeting will be the Chair who will facilitate the MIP mediation process, and a process observer.

Participants are requested to respectfully agree to the following guidelines:

1. The content of the meeting is confidential.
2. Come from “I’m Okay, You’re Ok” position.
3. Own your own experience and material.
4. Direct your responses to the chair only.
5. You may only raise the issue that is the basis of the complaint.
6. The participants are asked not to speak directly to each other until the complaint is resolved.
7. Each party will explain what their complaint is and what they want for resolution of the complaint.
8. The complainant will be asked how they will meet the request, and what they want from the process.
9. It is hoped through this process that a positive and mutual resolution can be made.

This policy will be reviewed every 18 months and updated a minimum of every 36 months.

Reviewed April 2020

GRIEVANCE POLICY AND PROCEDURE

Grievance Procedure

It is recognised that grievances can arise when a student, trainee, trainer, member of MIP or staff member is unhappy about their personal situation regarding their course, or in their dealings with students, or with staff, trainers or the organisation, and that a speedy resolution of such grievances is in the interests of all concerned.

This procedure aims to bring about the rapid resolution of grievances, without recourse to formal proceedings wherever possible. Nothing in this procedure impinges on the legal rights or obligations of staff, members of the public, trainers or students.

Grievances will be regarded as confidential but all individuals concerned will need to be interviewed if the grievance is to be resolved.

Grievances which are anonymous or based on rumour cannot be investigated.

The Institute reserves the right to take disciplinary action against any person whose grievance is found to be based on false allegations.

Decisions and actions taken in relation to a grievance are not influenced by the person's background or situation, and each case is dealt with on its own merits.

Informal procedure

If a grievance exists, before invoking the formal procedure every effort should be made to resolve the issue informally by raising your concerns with the person(s) involved or with the clinical director, or your personal tutor. If this does not lead to a satisfactory outcome, or if you feel unable to discuss the matter with the person(s) involved, you may opt to invoke the formal grievance procedure.

If the grievance has been resolved informally, no record will be kept on file unless both parties wish to have a note made of what has been agreed.

Formal Procedure

Students

If the matter has not been resolved informally to everyone's satisfaction, a member of the tutorial team will be appointed to establish the nature of the grievance and will make a written record on the Grievance Form to be signed by those concerned confirming this is an accurate representation. The form will be passed to the Quality & Ethics Committee at the Manchester Institute for Psychotherapy for action, who may convene an extraordinary meeting, and investigate the matter through the Institute's complaints procedure.

If the grievance is against another student, the Grievance Form will be submitted within two working days to an appropriate tutor. The tutor will send a letter of acknowledgement within five working days and instigate an investigation.

Following investigation, written notification of the outcome will be given as soon as possible, normally within 15 working days of the grievance having been notified. The written notification will include reasons for the outcome, any right of appeal and an explanation of the appeal procedure.

If the grievance is against a member of staff or trainer, it will be referred immediately to the Quality & Ethics Committee who will follow the Institute's complaints procedure.

If a conflict of interest exists, the complaint will be passed to an external moderator.

Trainers and Members of Staff

Trainers and members of staff are required to follow the above procedure and report the grievance to the Trainers meeting and the Quality & Ethics Committee.

Members of the Public

Members of the public can forward their grievance to the Quality & Ethics Committee and there will be an extraordinary meeting by the committee within four weeks of receiving the written grievance. They will be informed of the outcome within four weeks of the aforementioned meeting.

Appeals

If an appeal is to be made against the outcome of a grievance this should be done in writing within ten working days of the decision being notified.

The outcome of the appeal will be notified in writing within a further ten working days.

A complainant has the right to seek advice from outside the Institute at any stage of the proceedings.

Monitoring

The outcome of investigations and responses to grievances will be reported quarterly to the Director of MIP. All those involved with the grievance will also be notified.

This policy is regularly reviewed every 18 months.

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

SUSPENSION AND EXCLUSION POLICY

Policy Statement

This policy applies to all students attending MIP.

Policy Aims

MIP is committed to providing the highest standards of teaching and learning for all of its students and tutors will do everything possible to see that the individual needs of students are met. However, if a student:

- * consistently, does not meet our academic expectations,
- * displays poor behaviour for a sustained period,
- * or commits an act amounting to gross misconduct,

then it may be necessary to suspend or even exclude them from their course at MIP. Failure to meet academic expectations may include repeated unexplained or unacceptable absence, persistent poor punctuality, a poor record of work submission or a failure to respond to measures put in place by the course tutor.

Suspensions

Suspensions and exclusions are wholly at the discretion of the Director of MIP.

A meeting will be arranged with the Director and the student to discuss the matter and make arrangements for the student to return. This will involve a set of clearly stated conditions that the student will have to adhere to, in order to remain at MIP.

Exclusion

Excluding students on a permanent basis is a highly regrettable situation and MIP will do everything in its power to avoid such a serious measure. Exclusion can occur if the conditions of a suspension are not met, or may be the result of a single act.

Students should be aware that any serious act of verbal or physical aggression, gross misconduct, or anything that compromises the safety of MIP students and staff members, will result in their immediate removal from MIP.

Appeals

It is the responsibility of the student to provide evidence to appeal their expulsion.

Gross Misconduct definition:

Theft

Fraud

Dishonesty

Breach of H&S rules

Damage to property

Serious incapacity

Alcohol and Drug use

Offensive behaviour (see harassment policy).

Reviewed September 2019

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

HEALTH AND SAFETY POLICY

1. Introduction

The aim of this policy is:

- * to limit the risks of Health & Safety issues at MIP.
- * to provide and maintain safe equipment
 - * to ensure all designated individuals are competent to fulfil their roles.
- * to minimise the risks of accidents and to maintain safe and healthy working conditions

2. Responsibilities

1. Overall and final responsibility for health and safety is held by the Principal Director.
2. Day to day responsibility for ensuring that this policy is put into practice is held by the Administrator.
3. All employees, therapists, students, trainers and visitors must adhere to this policy, co-operate on all health and safety matters, and take reasonable care of their own health and safety.
4. All health and safety concerns must be reported to the Administrator.

3. Risk Assessment:

1. Risk assessments will be the responsibility of the Administrator. (see checklist)
2. The findings of the risk assessment will be reported to the Principal Director who will action or approve any required amendments.
3. The Administrator will reassess the risk.
4. Assessments will be undertaken every 12 months.

4. Induction:

Induction training will be provided for all employees by the Principal Director and the Administrator.

5. Accidents and First Aid:

A first aid box is kept in both kitchen areas.

All accidents should be reported to the Administrator and reported in the first aid book which is kept in the main office on the shelf behind Administrator's desk.

6. **Emergency Procedures and Fire Evacuation:**

The Administrator is responsible for ensuring that the fire risk assessment is undertaken and implemented.

Escape routes are checked by the Administrator regularly and fire extinguishers are checked and maintained every year.

Fire alarms are tested by the Administrator weekly.

7. **Risk Assessment for MIP**

i. **What are the hazards ?**

Electrical equipment: microwave, heaters, kettles, computers, TVs, overhead projectors, lamps, light fittings, fans, dehumidifiers.
Carpets, rugs well maintained.
Boiler and heating system.

ii. **Who might be harmed?**

Staff, therapists, clients, students, visitors, trainers.

iii. **What are we already doing?**

Maintaining records of fire alarm testing. Compliance with fire regulations.
Maintaining furnishings and fittings.

Maintaining records of maintenance /replacement of electrical equipment.

iv. **Implementation of the risk assessment**

Fire alarm testing record book kept in office
Maintenance/replacement of electrical equipment indicated on equipment.

This policy is regularly reviewed every 18 months and updated a minimum of every 36 months as necessary.

Last revised May 2019

**THE CONSTITUTION
OF THE
MANCHESTER INSTITUTE FOR PSYCHOTHERAPY**

Revised Edition – September 2020

SECTION 1

Name: Manchester Institute for Psychotherapy

- 1.1 The name of the organisation is the Manchester Institute for Psychotherapy, hereafter referred to as MIP.
- 1.2 The inauguration of MIP took place on 23 July 2004. The constitution and the Chair of that meeting was voted in.
- 1.3 The Quality & Ethics Committee review the constitution on a regular basis. Changes may be introduced to the constitution as required.

SECTION 2

Aims and Objectives of MIP

- 2.1 To train members of the public in the profession of psychotherapy and supervision to post-graduate levels.
- 2.2 Members of the public who show a genuine interest in the services that MIP offers, will be mainly professionals subject to meeting the training criteria as specified in the Diploma handbook.
- 2.3. To uphold the high standards of excellence in the areas of psychotherapy, supervision and training both in the areas of competence and professional ethics.
- 2.4 MIP will review and monitor the ethical behaviours of all their members for the public benefit in the profession of psychotherapy and supervision for the public benefit.
- 2.5 In the pursuit of excellence within all our trainings, we will be constantly reviewing, monitoring and evaluating the standards of our trainings and education within MIP.
- 2.6 MIP, through the training programmes, will promote the principles of therapeutic work, eg: awareness, motivation, communication, reflection, in the search for meaning.
- 2.7 MIP will maintain the principle for all its trainees to be in therapy and supervision throughout their training and up to accreditation.
- 2.8 MIP encourages and supports members at all levels – trainee and post-graduate to be committed to therapeutic support and supervision for the life of their professional career.

- 2.9 All members will adhere to all MIP's policies and procedures.
- 2.10 To promote professional development via conferences, meetings and workshops.

SECTION 3

To promote the development of psychotherapy and supervision

- 3.1 To provide a framework and forum for the discussion of critical issues in the areas of psychotherapy and supervision; and work in conjunction with colleagues and professional organisations towards the recognition of psychotherapy.
- 3.2 MIP will participate with and encourage it's members to become involved with the relevant professional bodies.
- 3.3 To promote the professional development of members by encouraging them to attend conferences, events and workshops.
- 3.4 To promote and encourage research in the areas of psychotherapy and supervision.
- 3.5 Specifically to monitor and support the opportunity of research with MIP at local, regional and national levels.
- 3.6 MIP will work on a non-profit basis, where all profit gained will be put back into MIP for future trainings, research and maintenance.
- 3.7 All the above, in terms of financial means, will be shown in the accounts and be available to the directors of MIP.

SECTION 4

MIP core values

- 4.1 All members acknowledge the dignity of all human beings.
- 4.2 Belief in the worth, dignity and creative potential of every person.
- 4.3 All members have the capacity to think.
- 4.4 All people have different learning styles and speeds.

- 4.5 All people have an intrinsic human value regardless of age, gender, ethnicity, faith, sexual orientation or any other diversity.
- 4.6 The client/therapist relationship is the foundation of all treatment and the welfare of the client takes priority.
- 4.7. MIP will promote a willingness in both the client and therapist to adopt an I'm OK-You're OK position. The therapist will encourage the client towards personal autonomy and responsibility.

SECTION 5

Membership Categories and Voting Rights

- 5.1 Directorship - business and professional directorship of the Institute is held by Bob Cooke, simultaneously as both Managing Director and Director of Trainings. Also, there are six other directors who complete the Board of Directors within the MIP organisational structure.
- 5.2 Qualified Member – individuals who have gone through the MIP accreditation process and are registered with UKCP.
- 5.3 Graduate Members – trainees who have successfully completed their four years training and graduated from MIP.
- 5.4 Trainee Members – trainees who are on the four year psychotherapy training course, who have passed their clinical competencies and are in supervision whilst practising.
- 5.5 Student Members - are at the beginning of their training and have not passed their clinical competency assessment.
- 5.6 All members, whether directors, qualified members, graduate members, trainee members or student members, have equal voting rights.

SECTION 6

Entry Registration and Exclusion

- 6.1 Admission of members shall be subject to approval, initially, by the Managing Director and then the Board of Directors.

- 6.2 Entry on to the various committees of MIP will be voted by all members at the AGM.
- 6.3 The Board of Directors have the right to refuse membership to MIP and onto the various committees; they will state the reasons for their refusal in writing.
- 6.4 The Quality and Ethics Committee of MIP has the power to suspend or exclude a member for an ethics offence, subsequent to the ratification of the Board. This may be brought before a General Meeting by an involved party.

SECTION 7

Entitlements and Obligations of Members

- 7.1 Motions brought forward at the AGM must be put in writing and need to reach the Board of Directors no later than one month prior to the AGM.
- 7.2 Attendance at the AGM – the member is entitled to vote and to elect.
- 7.3 Entitled to all the advantages incorporated in membership to MIP.
- 7.4 Formal appeals from applicants in respect of the non-granting of membership.
- 7.5 Voting by proxy at AGM must be through written authorisation of another member to vote on the absent member's behalf.

SECTION 8

Committees

- 8.1 All committees report to the AGM and are as follows:
 - (a) General Meeting
 - (b) Extraordinary General Meeting
 - (c) The Board of Directors
 - (d) Quality and Ethics Committee (Q&E)
 - (e) Research Sub-Committee
 - (f) Social Committee

8.2 The Quality & Ethics (Q&E) Committee must include:

- * Two members of the Board of Directors.
- * One or more representatives of the training body.
- * One or more clinical representatives.
- * All representatives of the Q&E Committee are elected by the AGM.
- * The Q&E Committee meets bi-monthly to review and update existing policies and procedures and/or new legislation.
- * The quorum for the committee is three members.
- * The Q&E Committee is responsible to the Board for ensuring acceptable standards in the delivery of training at MIP and in the provision of clinical services.
- * The Q&E Committee oversees the personal wellbeing of the trainees registered on MIP courses, in terms of ethical issues.
- * The Q&E Committee is responsible to the Board of Directors at MIP and sends a copy of the minutes of its meetings to the administrator at MIP.
- * The Q&E Committee reports on its activities to the AGM.
- * The Q&E Committee can report on any matter which requires the urgent attention of the Board of Directors, via the Managing Director.
- * The Q&E Committee Annual Report will contain the following:
 - Feedback from committee meetings.
 - Updates to new policies and new legislation
 - Feedback on any complaints or ethical issues

SECTION 9

The Board of Directors

- 9.1 The membership of the Board of Directors will be no fewer 6 members and not exceed 12 members. The members shall be drawn from individuals who are professional psychotherapists and also from lay members.

- 9.2 The Board of Directors meets annually.
- 9.3 The members of the Board of MIP will be responsible for determining the policy and direction of the Institute.
- 9.4 Evaluating and monitoring the activities and performance of MIP through the Annual Reports and the various committees within MIP.
- 9.5 Composing, evaluating and guiding the fee structure for trainees working for MIP. This includes all outside trainees/trainers full or part time.
- 9.6 Ending or terminating the services of trainers or staff.
- 9.7 Receiving the annual accounts of MIP.
- 9.8 The Board of Directors shall be formed by the Managing Director.
- 9.9 The Board of Directors may call an Extraordinary Meeting of MIP if needs arise.
- 9.10 There needs to be a quorum of three members of the Board to make a decision.

SECTION 10

Dissolution of the Manchester Institute for Psychotherapy

MIP shall be deemed dissolved if a vote of two-thirds of its membership at the AGM is in favour of dissolution upon recommendation of the Board.

MIP DIRECTORS 2020

1. Bob Cooke
2. Josie Couet (lay person)
3. Rory Lee Oakes
4. Stephanie Cooke
5. Debbie Tennant (lay person)
6. Janet Fengeros
7. Hannah Moss (lay person)
8. Karen Burke
9. Amanda Onwueneme

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

ROLE OF EXTERNAL MODERATOR

The External Moderator regulates the processes within MIP and ensures the organisation's delivery is consistent with that outlined in brochures, student handbooks and member publications. The External Moderator acts as a resource for MIP, advising, liaising, interpreting, if necessary, and helping to uphold both the HIPC and UKCP policies.

The External Moderator does not represent their own views but essentially liaises between MIP and UKCP and HIPC. They may interpret UKCP and HIPC explicit expectations for MIP.

External Moderators may advise and assist MIP in the development of their training and accrediting procedures in respect of UKCP and HIPC policies and procedures.

Functions of External Moderator

1. To act as an advisor to the main committees and offer advice on documentation such as the course handbook, ADL, ethics and disciplinary matters.
2. To act as an interpreter of UKCP and HIPC policies and be familiar with the requirements of the UKCP and HIPC section in this regard.
3. To make at least one visit in every five year period to coincide with the quinquennial review and compile a report.
4. To write reports for the HIPC and UKCP assessors in preparation for the quinquennial review.
5. To evaluate the assessment procedures and ensure that MIP is fulfilling its own criteria in its published aims and objectives.
6. To take on a pastoral role which may involve meeting with students to discuss their experience of the course.
7. To assist the Training Director, where required, to improve the processes of training.
8. To take part in the appeals procedure in cases of misconduct, discipline, grievance, and appeals against academic decisions such as the marking of papers.
9. To be available to advise and mediate in student disputes.
10. To participate in and monitor the graduation process, as well as the process in which candidates become nominated for the UKCP register of psychotherapists, ensuring that the HIPC and UKCP procedures for entry to the register are being maintained.
11. The External Moderator may participate in the graduation process as an assessor.

Criteria for External Moderators

1. External Moderators would ideally be experienced psychotherapists practising for more than ten years within a member organisation of the HIPC. If MIP chooses an external moderator who is not a psychotherapist from within HIPC, then MIP will need to demonstrate how the external moderator meets the requirements to perform the above roles. The minimum standard is that they are senior psychotherapists, familiar with all aspects of psychotherapy training and the HIPC criteria for membership. They will need to have an understanding of the specific model of psychotherapy practiced within MIP.
2. External Moderators must be external to MIP.
3. External Moderators are appointed by MIP. This is a paid position and they have no other involvement in the organisation.
4. Current officers of the HIPC are ineligible for the role of external moderator due to possible conflicts of interest.
5. The roles of External Moderator and External Examiner cannot be fulfilled by the same person.

(This appendix is based on the UKCP guidelines 2016)

MIP'S OBLIGATIONS TO THE EXTERNAL MODERATOR

1. The agenda and minutes of Board of Directors and Quality & Ethics Committee meetings will be available to the External Moderator.
2. The revised MIP management structure chart will be made available to the External Moderator upon request.
3. The revised copies of all MIP policies and procedures will be made available to the External Moderator upon request.
4. The External Moderator may be included in any appeals procedure or investigation at MIP with regards to disciplinary or grievance hearings or academic decisions.
5. The External Moderator may participate in the graduation process as an assessor.

This will be reviewed every 18 months from the time of stated reviewal.

Reviewed September 2019

EXTERNAL EXAMINER POST

FOR THE MANCHESTER INSTITUTE OF PSYCHOTHERAPY

Role of External Examiner

The responsibilities of the External Examiner are set out as per UKCP guidelines, the HIP College Learning Outcomes and against the Post Graduate marking Scale.

They include monitoring all aspects of the assessment process, documentation and the standard and consistency of marking across a number of markers in line with UKCP guidelines.

Functions of External Examiner

1. External Examiners monitor the academic level of the training which is set by UKCP at Masters level. Clear identification of what constitutes Masters level must be in place. The trainers and external examiners need to have access to information indicating the agreed standard against which the teaching, examining and trainees performance is being measured. This may involve the observation of teaching and supervision sessions.
2. External Examiners ensure the consistency of the marking of written and oral work. Their role is to assess the level of the groups and cohorts rather than that of individual students. They thus monitor the overall standards of work within the organization. They examine samples of students work and benchmark the academic standards. They evaluate whether the internal markers are awarding grades in a consistent and fair way, that they are clearly identifying the reasons for the marks awarded against the grade descriptions provided, and that there are clear distinctions between grade bands. There needs to be clear grade descriptors appropriate to Masters level (National Occupational Standards Level 7) against which the internal examiners and external examiners can set their marks.
3. The External Examiner monitors the final examination process. This may include samples of work, vivas and recordings (audio and visual) depending on the nature of the final assessment. They may also attend some oral examinations.
4. External Examiners may also review the practical assessments and comment on these in the same way as they do with the academic work.
5. The External Examiner makes a minimum of one annual visit to MIP followed by a brief report.
6. The External Examiner writes a report for the Quinquennial Review.
7. The External Examiner may become involved in the examination appeals process.

Criteria for External Examiners

In almost all circumstances the External Examiner will need to be a senior psychotherapist within a member organisation of the HIP College. If MIP were to choose an External Examiner who is not a psychotherapist from within the College, then MIP must show how the Examiner meets the requirements to perform the above roles. The minimum standard must be that they are:

- A senior psychotherapist
- Familiar with most, if not all, psychotherapy training
- Familiar with the HIPC criteria for membership
- Have an understanding of the specific model of psychotherapy practiced within the organisation
- Familiar with what constitutes MA level work which is the required standard for UKCP trainings.

The assessments of MIP which will need externally assessing are as follows:

- * Essays : Two 2,000 word essays per year – first year, second year and third year.
- * Placement reports: up to 1,000 words for each client seen.
- * Research project: 8,000 words to be completed by 1st April of the fourth year.
- * Case Study: 5,000 words study of a client seen for up to 50 client hours, to be submitted by 1st April of the fourth year.
- * Following completion of the fourth year, in order to gain UKCP accreditation the graduate will complete a 10,000 words case study and an evaluation of a 20 minutes recording of their clinical work.
- * The assessment board process requires the graduate to present the training portfolio, the 10,000 words case study and the 20 minutes recording of their clinical work. This will be presented to four Accreditation Board members who will make the assessment.

*Revised September 2019 -
(to be reviewed again at the next committee meeting)*

THE MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

**CONTINUING PROFESSIONAL DEVELOPMENT POLICY
FOR QUALIFIED PRACTITIONERS**

In line with the recommendations of the UKCP CPD guidelines (2015) with the protection of the public held as paramount, psychotherapists must now provide evidence of annual CPD activities. This is required as evidence of “Good Practice” in maintaining their ability to perform their professional duties competently, and is reviewed every 5 years.

In parallel, psychotherapists must comply and meet the minimum clinical practice as stipulated by the UKCP. This will also need to be reviewed every 5 years.

MIP requires its members, who are practising psychotherapists or trainers, to maintain a comprehensive record of their CPD activities. Whilst recognising that CPD is often dynamic and evolving, MIP provides the following guidelines and recommendations:

- (a) Wherever possible CPD activities and records should demonstrate a maintenance and improvement in standards of practice.
- (b) CPD is to demonstrate active reflection on practice that allows the individual to identify what has been learned or reconfirmed.
- (c) CPD is very broadly defined and can include any of the following: teaching, research, webinars, conferences, personal therapy, supervision, post qualification training and relevant work, placement or secondment experiences. The list is not exhaustive.
- d) Registrants should be able to evidence how their CPD informs their practice with the client groups that they work with.

Supervision

In line with the qualified psychotherapist’s regulating body, it is the psychotherapist’s responsibility to meet and provide evidence of the minimum requirements stipulated. For more information please read the MIP Supervision Guidelines document.

Evidence

MIP can request evidence of CPD activities from any psychotherapists at any time.

Currently, the minimum CPD requirements for the UKCP are 20 hours per annum, with a total of 250 hours over a five year period.

In line with UKCP policy, psychotherapists must inform MIP and the UKCP if they have a break from clinical practice of more than three months.

This policy is regularly reviewed every 18 months and updated a minimum of every 36 months as necessary.

MIP LIBRARY

The Manchester Institute for Psychotherapy Library is situated in the major Training Room and you are able to borrow books for at least a two week time period.

Procedure:

- * You will need to register that you have borrowed a library book for a two week period.
- * You will do this by signing in the “Red Library Folder” the date of when you take the book out and when you will be returning it, within a two week allocated framework.
- * When you return the book you will need to register that you have returned the book in the Red Library Folder.

The librarian administrator will regularly look at the Red Library Folder and make sure that books have been returned within the allocated framework.

If the book has not been returned by the due date there will be a fine of £5 for each week that it has not been returned. The administrator will make sure that letters are sent out to collect monies owed.

If you wish to renew the book you will need to bring it back at the allocated time and fill in the renewal section of the Red Library Folder.

It is up to the Library Administrator who is responsible for the smooth running of the Library system to make sure that up to date psychotherapy books are maintained and kept in order and if new therapy books are needed for the library she will report back to MIP with her suggestions for an up to date library process.

As some books will be more popular than others, it is most important that this two week framework for returning books is adhered to.

In line with the above students will not be able to renew books for more than a six week timeframe and it is the job of the librarian administrator to regulate this process.

The Red Library Folder will be kept in the Library and the librarian administrator will on a weekly basis inspect the folder with regards to “books in and out”.

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY/UKCP GUIDELINES
(please note this is for UKCP registration, not for MIP graduation purposes)

MENTAL HEALTH FAMILIARISATION 2019

Mental Health Familiarisation is a required component of UKCP and HIPC accredited trainings.

Psychotherapists will require awareness, knowledge and understanding that equips them to work within or alongside other mental health professionals and services, with clients who have extraordinary needs and with family members of mental health service users.

Psychotherapists will require an understanding of their role within a system of restoring balance and justice towards better treatment of people with exceptional needs and prevention of additional mental health distress caused by normative social expectation and/or exclusion.

Therefore, trainees are required to understand the wider contexts and considerations of mental health provision to develop sensitive and reflexive practice of psychotherapy appropriate to the needs of people who experience significant mental difficulties and emotional distress.

HIPC believes experiential learning supports in depth engagement, levels of understanding and reflection different from those gained through direct teaching or individual study. Students are required to undertake an element of direct experience as part of their mental health familiarisation.

1. **The Social Responsibility Framework**

Psychotherapists need opportunities to understand the historical and cultural influences on societal understanding of, and attitudes to, mental health and illness. To develop a capacity to work reflexively within a social responsibility framework. These can be gained through training input, placement experience, or a combination of the two, including relevant coverage of the following:

- a) Historical and cultural models of mental health, illness and mental health care.
- b) The impact on mental health service users and their families of diagnosis, stigma, normativity and minority experience.
- c) The influence of socio-economics, class, gender, disability, age, culture, religion, race and sexuality on the incidence, definition, diagnosis and treatment of mental illness and mental health.
- d) The intensifying impact of intersectionality (where a person belongs to more than one marginalised group).

- e) Familiarity with the role of minority community organisations and mental health advocacy organisations and how to engage with them.
- f) Practices for non-discriminatory service provision.

2. Working within a Wider System of Care

Psychotherapists require knowledge, understanding, sensitivity and awareness which equips them to work within and alongside other mental health services in the field.

- a) Recognition that clients with more complex, significant, enduring or exceptional needs, including how to differentiate between severe mental illness and the range of human responses to life challenge, such as trauma, shock, bereavement and spiritual crisis.
- b) How and when to refer on to appropriate inter-disciplinary professionals and relevant agencies.
- c) When to provide, when necessary, psychotherapy as part of an appropriate package of care including the parameters for keeping therapeutic work safe with severely disturbed people.
- d) The social and cultural context in which service is delivered to understand and empathise with the lived experience of service-users.
- e) The different personal and professional roles in care for people with complex or enduring needs including current knowledge of local services.
- f) An informed and critical awareness of the differences in paradigms between the medical model and a psychotherapeutic approach including the psychotherapist's role in collaborative care.
- g) The psychotherapist's role in the provision of non-discriminatory services.
- h) The role of medication (prescribed and non-prescribed) and its impact.
- i) Ethical and legal consideration pertaining to the above including appropriate familiarity with the Mental Health Act 2007 and the Equality Act 2010.
- j) The basic structure of the mental health services in the UK, and the role of NICE guidelines.
- k) Diagnosis and classification of mental illness within the medical model including a working knowledge of the DSM V and a capacity to reflect on and evaluate its use as a system of assessment.
- l) The types of interventions and treatments used, their rationale and side effects.
- m) Understanding and appreciation of different professional and personal roles in mental health care.

- n) How to work in a client-centred way which safeguards the wellbeing of the client (and their dependents) and ensures that the psychotherapy received forms part of an appropriate package of care.
- o) When and how to make appropriate referrals to other professional agencies.

3. Direct Experience

The developmental process of learning which integrates knowledge and experience can be gained through training input or direct experience, or a combination of the two. Some element of direct experience is required, as this is likely to be relevant to fully attaining the overall aims of mental health familiarisation process.

Training and accrediting organisations have discretion to require up to a maximum of 120 hours of direct mental health experience within the overall 900 training hours. They should include their requirements and the reasons for them within policy.

4. Experiential Learning

HIPC believes experiential learning supports levels of understanding and reflection different from those gained through direct teaching or individual study. Students are, therefore, required to undertake some element of direct experience. This may be met in a variety of ways including working, volunteering, attending events or otherwise spending time in settings such as the following:

- community mental health centres,
- psychiatric wards,
- day centres or drop in centres,
- voluntary organisations such as Mind,
- advocacy services,
- community services,
- specialist services such as those of homeless people,
- attending events held by groups such as the Schizophrenia and Bipolar Foundations, and the Recovery Learning Community.
- Adult Eating Disorder Clinic
- Addiction/Rehab Agencies
- Geriatric Mental Health Services
- Alzhiemer's Clinic/Day Centre

This list is meant to be indicative and is not comprehensive.

There may be occasions where students have gained direct experience in their personal lives, professional careers, by undertaking research or in their counselling or psychotherapy practice. This may be included in students' experiential learning, however its relevance and currency must be demonstrated within the assessment.

MIP will Provide:

- * A range of training input, such as lectures and seminars, visits by external speakers (including service user groups) to support students achieving the aims of the MHF.
- * Support personal learning by providing access to, or signposting trainees to learning resources such as written materials, documentaries, films and videos.
- * Offer support to help students access appropriate experiential learning opportunities.
- * Make clear to students their responsibilities and limitations in undertaking experience in the field.
- * Manage the minimum requirements for experiential learning which balance opportunities for in depth engagement and learning with ensuring accessibility for a diverse student body.
- * Provide ways for students to evidence their experiential learning activities.
- * Create assessment procedures whereby students can demonstrate their learning.
- * Provide a rationale and documentation for the approach taken.

Trainees are expected/required to:

1. Take responsibility for arranging placements or direct experience elements to meet the Mental Health Familiarisation requirements.
2. Take responsibility for taking up opportunities to attend appropriate training input provided by their training organisation or other bodies.
3. Take responsibility for demonstrating that they can meet the requirements of the Mental Health Familiarisation in line with the UKCP HIPC College.
4. The trainee needs to write a short report, 1500 words, of their experience within the Mental Health placement outlining:
 - the agency's mission statement
 - the service user base
 - support received by the agency
 - the student's internal reflections overall of their experience of the placement.
5. The trainee must have a minimum of three different and distinct placement experiences in mental health settings, minimum 70 hours in total. Please note maximum 120 hours in totality.

There may be occasions where trainees have gained direct experience in mental health settings in their personal and professional careers. However, if their direct experience is not within the last 5 years from MIP graduation then they would still need to evidence 70 hours of current direct mental health experience.

6. Trainees will need to evidence their attendance at the mental health placement they work within, and this will need to be evident in their portfolio, with their short reports of 1500 words per placement experience.

Additional Information:

It is important not to confuse the clinical placement that you completed in your 4 year training with the mental health placement for UKCP registration purposes. If you completed your clinical placement within one of the mental health services it cannot be counted towards the mental health familiarisation direct experience, as this would mean the student would be short of the expected 900 hours overall to complete UKCP registration.

As well as this, the focuses of the two placements are distinctly different in nature and experience.

Approved at UKCP HIC college meeting 12th July 2018. Discussed at and amended after the UKCP ETPC meeting July 20th July 2018.

(updated June 2019)

Approved by MIP February 2019.

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

SAFEGUARDING POLICY AND PROCEDURE

Safeguarding Policy Statement - Adults

The purpose of this policy statement is to protect vulnerable adults who receive MIP services. Our overarching philosophy is that we expect every therapy to have professional supervision and the appropriate qualifications, including Placement Therapists. Moreover, all practicing therapists will be expected to provide evidence of their insurance and their CBS check, and membership of a governing body.

All therapists who work from the Institute will have had to go through the above procedure and have the appropriate training background and qualifications to be competent in the services that they are offering. This is regularly monitored and reviewed by MIP in terms of overseeing their ADL and training programmes and advanced specialisms. Membership of a governing body such as UKCP, UKATA, BACP with adherence to their stipulations is a requirement for ADL.

A placement student will have discussions with their placement provider regularly on the importance of swift action in case of concerns over potential safeguarding issues with their clinical placements.

Whistle-blowing

MIP has an open culture where people feel able, positively supported, and encouraged to raise their concerns, even when they relate to the practice of their staff. This includes support for whistle-blowing and any such concern would be referred to and addressed by the Quality & Ethics Committee.

Safeguarding Policy Statement - Children

This safeguarding policy was drawn upon the basis of legislation, policy and guidance that seeks to protect children and young people in England. A summary of the key legislation and guidance is available from: [nspcc.org.uk/childprotection](https://www.nspcc.org.uk/childprotection)

The purpose of this policy statement is to protect children and young people who receive the Manchester Institute for Psychotherapy services. We will provide parents, therapists, trainees and staff the overarching principles that guide our approach to child protection.

This policy statement applies to anyone working on behalf of the Manchester Institute for Psychotherapy, including senior managers, paid staff, therapists and trainees.

We believe that:

- * children and young people should never experience abuse of any kind.

- * we have a responsibility to promote the welfare of all children and young people to keep them safe, and to practise in a way that protects them.

We recognise that:

- * the welfare of the child is paramount.
- * all children, regardless of age, disability, gender reassignment, race, religion or belief, sex, or sexual orientation, have a right to equal protection from all types of harm or abuse.
- * some children are additionally vulnerable because of the impact of previous experiences, their level of dependency, communication needs or other issues.
- * working in partnership with children, young people, their parents, carers and other agencies is essential in promoting young people's welfare.

We will seek to keep children and young people safe by:

- * valuing, listening and respecting them.
- * appointing the appropriate child protection/safeguarding lead.
- * developing child protection and safeguarding policies to reflect best practice.
- * using our safeguarding procedures to share concerns/relevant information with agencies who need to know. Involving children and young people, parents and carers, appropriately.
- * creating and maintaining an anti-bullying environment, and ensuring that we have a policy and procedure to help us deal effectively with any bullying that does arise.
- * developing and implementing an effective online safety policy and related procedures.
- * recruiting staff and volunteers safely, ensuring all necessary checks are made.
- * support, training and quality assurance measures.
- * implementing a code of conduct for staff, trainees and therapists.
- * using our procedures to manage any allegations against staff, therapists and trainees appropriately.
- * ensuring that we have effective complaints and whistleblowing measures in place.
- * ensuring that we provide a safe physical environment for our children, young people, staff, therapists and trainees, by applying health and safety measures in accordance with the law and regulatory guidance.
- * recording and storing information professionally and securely.

Appropriate MIP safeguarding lead

MIP will provide at least two safeguarding leads for both adults and children. These individuals are highly qualified clinicians, with experience to provide safeguarding support.

All placement therapists will be provided with the lead contact details and must contact the safeguarding lead with any concerns over safeguarding issues. Moreover, these safeguarding leads are available for all other therapists.

Should the safeguarding lead not be available, the admin office will signpost an alternative contact and confidentiality must be adhered to.

Contact details:

1. Senior lead for safeguarding:
Name
Phone number/email

2. Deputy lead for safeguarding
Name
Phone number/email

NSPCC Helpline 0808 800 5000

Responding to concerns and disclosures.

The procedural process with regards to MIP lead persons are publicly on the website so that therapists, placement students and clients are aware of these procedures.

Assessment

At MIP, all placement clients that are referred to the placement therapists will have undertaken a "risk assessment" where the above areas will be taken into consideration. If at the assessment the assessor thinks that there is a high risk in the area of suicide, these high risk clients will not be passed to the placement therapists. However, that does not mean that the clients' feelings of suicide or suicidal idealization may not be triggered through the placement.

THERAPISTS PROCEDURES

The therapists procedures outlines what therapists need to do in a range of situations in order to best protect the client within the therapeutic setting.

As with all these procedures, the first step at a general level is **Supervision**.

Supervision's major focus is to help the placement therapist to provide their best services for the client. It is in the supervision hour that the placement therapist brings their anxieties, worries and concerns to the supervisor.

As well as the above, the placement therapist will endeavor through supervision to develop their skills in the area of therapy and therapeutic discourse. This will include learnings in how to work with clients, techniques and treatment planning towards resolution.

If the client discloses that they are being abused, harming themselves or have been abused in the past:

- * The first port of call is to gently enquire and check out what you have heard to make sure you are understanding correctly - this is not interrogation - though you have to be specific to make sure of the facts this needs to be done in a relational manner.
- * Remember that the information you will be hearing in this context will be very difficult for them to talk about and it will have taken a lot of courage for them to disclose at this level, so it is imperative that you treat the person in an empathic manner with a great sense of integrity, authenticity and respect.
- * It is imperative that you do not lead the client to the conclusion that they were being, or were, abused. For example, do not put thoughts into the client's head.
- * If there is a risk to the person, or you are not sure if there is a risk to the person, it is imperative you speak to your personal supervisor as soon as possible to discuss the situation fully. (In specific situations you may decide to contact the safeguarding lead at MIP) - certainly this needs to be recorded in your own notes.
- * If there is a risk you may need to disclose - dependent on level of risk, ie if you think they are of harm to themselves or other people, you will need to disclose this immediately. If there is no immediate risk, then discuss it at your next scheduled personal supervision.
- * In your personal notes, vis a vis your client, this must be recorded as said above, even if you choose not to take this to your supervisor. However, it is highly recommended that you do take all considerations to your supervisor.
- * All actions that you have taken have to be noted in your client records and you need to tell your supervisor of these actions, with dates and times against each of the actions.

If the client discloses they are abusing:

- * Check out gently what you have heard to make sure you have understood them correctly and remind them of the contracting about confidentiality and its limits.
- * Try to get them to take the appropriate action, for example with your support contacting the police.
- * You will need to disclose the information that is being given to you and you must make this clear to your client.

- * If the risk is significant and imminent you will need to disclose it straightaway to the MIP safeguarding lead and/or social services or the police.
- * Offer to continue to support the client through the ongoing therapy if appropriate and safe to do so.
- * If you no longer feel safe to work with the client seek advice from the MIP safeguarding lead and your supervisor.
- * Make sure that you made notes of all your appropriate actions and discussions with your client, supervisor and safeguarding lead.

If the client discloses that a Third Party is Abusing:

- * First of all check out gently what you have heard to make sure you have understood correctly.
- * Try to get them to take appropriate action.
- * Whether or not they are prepared to take appropriate action speak to your supervisor and the safeguarding lead at MIP as soon as possible.
- * In your client notes you need to record all discussions with the client, supervisor and the safeguarding lead.

SUICIDE AND SELF HARM FRAMEWORK

This document has been informed by the BACP Information Sheet P7 Working With Suicidal Clients, and the Suicide Risk Document produced by Newcastle, North Tyneside and Northumberland NHS as well as the information produced by Beacon Counselling.

When working with Placement clients who present with a wide variety of issues, such as depression, anxiety, stress, repression of feelings, hopelessness, and a feeling of helplessness in the world and indeed in their levels of functioning, you may well find as the therapeutic sessions evolve that sitting underneath these presenting issues the placement client may report feelings/thoughts of suicide/suicidal idealisation.

Suicidal Idealisation

This is when clients may have fantasies, dreams or even imaginations of the ideas of what it's like to take their own life and indeed may have whole thought processes on how their suicide may impact other people around them.

More often than not when people report suicidal idealization it does not mean that they are then going to go and take their life. However, their reporting of this to yourself is important and must be taken extremely seriously by yourself. This is where supervision is imperative.

The Threshold Model

The threshold model shows how different types of risk and protective factors interact to produce a threshold for suicidal behaviour for the individual. The different types of factors are:

1. **Long term predisposing risk factors** that can be present at birth or soon after birth - these identify people who are in risk groups.

Genetic or Biological Influences:

- (a) Family history of suicide or attempted suicide
- (b) Family history of depression
- (c) Family history of alcohol or other substance misuse

2. **Personality Traits**

Rigid thinking characterized by patterns of thought that are difficult to change.

Black and white thinking or “nothing thinking”

Excessive perfectionism, where high standards are causing distress to the person or others.

Hopelessness with bleak and pessimistic views of the future

Impulsivity, tending to do things on the spur of the moment

Low self esteem with feelings of worthlessness

3. **Short Term Risk Factors**

Environmental Factors:

- (a) Divorced, separated or widowed
- (b) Being older and/or retired
- (c) Having few social supports
- (d) Being unemployed

Psychiatric Diagnosis

The three psychiatric disorders most strongly correlated with suicide are:

- * depression
- * Substance misuse (including alcohol)
- * Schizophrenia

4. **Precipitating Factors**

These are events that may tip the balance when a person is at risk. They include:

- * High stress/life crises
- * Divorce

- * Imprisonment or threat of imprisonment
- * Recent job loss
- * Recent house move
- * Recent loss or separation
- * Unwanted pregnancy
- * Interpersonal problems

Depression

Depression is the most common of mental illnesses. People may often report low mood and lack of energy as criteria for depression.

Depression comes in many forms. Often it is defined as “anger turned inwardness”, repression of feelings, an incapacitation or/and a general sense of worthlessness and lack of purpose.

In a continuum of health you may get mild depression where a person may report the above and will be able to move from this state with relative ease.

If a person reports “at the other end of the health continuum” which we might call “high intensity” depression the person will report “stuck” or “fixed” in that particular state and an inability to move from one ego state to another.

Symptoms:

What follows is a check list of the most common symptoms of depression. If at least three-five of the symptoms below have been present for at least 2 weeks the person is likely to be suffering from clinical depression (high intensity).

1. Depressed mood
2. Loss of interest and enjoyment
3. Increased fatigue or loss of energy
4. Appetite or weight disturbances
5. Disturbed sleep
6. Ideas of self-harm or suicide
7. Reduced concentration and attention
8. Problems with sleep or indeed incapacitation
9. Reduced self-esteem and self confidence
10. Lack of pro-activity
11. Lack of purpose or structure in life

Process of Assessment (taken from Suicide Risk Document- Northumberland NHS)

Key stages in applying the threshold model to suicide risk and assessment are:

1. To establish a working relationship with the placement client. This means developing rapport and a trusting relationship with your client.

This working relationship will provide a container and a secure safe space for the placement client to feel more able to disclose important information with regards to what they are presenting.

The use of empathy, active listening, and genuineness is imperative in this, not only throughout therapy but also particularly important at this first stage of meeting.

2. Phenomenological Inquiry about the person's presenting issues and narrative is vitally important within the therapeutic sessions.

You will also need to be aware of inquiring about their current mental health, physical health and any substance problems.

3. When listening to their historical and presenting issues you will also be able to assess their previous methods of coping with similar problems within what we call in Transactional Analysis their "Script".
4. It is imperative to seek information on their support system which would include availability and help provided by families and friends, for example do they live by themselves, with other people, within the family or do they in fact access any other type of service help.
5. Ask about current circumstances, life events and worries. Through this inquiry you will be able to assess any precipitating factors which/could be triggering any suicidal thoughts, feelings or indeed potential actions.
6. Finally, through the above you will have been throughout assessing the potential existence and specificity for any plans for suicide, including any nearby dates that have special significance for the person. Investigating the availability of means to commit suicide is crucial at this stage. This information will help to assess any suicidal intent.
7. After evaluating the placement client's narrative and information that you will have gleaned throughout the stages above, will help you to judge how close the person is to his or her threshold for suicidal behaviour. This then is your assessment of risk.
8. Having stated the above stages of risk assessment, it is important that you have this framework and information with regards to working in the area of mental health. Please note, as said above, that the MIP initial assessor will also have done their own risk assessment and will have made clinical judgements in terms of the clients that they will be referring to you in terms of the placement.

Managing Suicide Risk

Managing suicide risk in many ways comes with the territory of risk assessment and management techniques will differ depending on the assessed level of risk. For example, if your risk assessment is low then the management techniques will differ from working with a high assessment risk.

Low risk

High Risk

1. If a risk is low, maintain usual contact/sessional arrangements.
2. A therapeutic approach is useful in promoting contact and encouraging the client to take a shared responsibility for their future care and safety. (The FRAMES approach to brief therapy is summarized below).
3. If you are concerned or anxious **talk to your colleagues at the placement service and/or contact your Placement Supervisor (do not wait necessarily for your next booked supervision session).**
4. Use the person's **existing support system** by encouraging them to engage with their contact/friends/family.
5. As said earlier, if you believe the risk is more urgent **contact your Placement Supervisor** and also talking with your colleagues may well be useful at this junction.
6. If they are the high end of suicide risk **Supervisor immediately to work out an action plan** with regards to future sessions.
7. The same as above - **immediate contact with your Supervisor** and immediate plans may need to be implemented, such as an urgent mental health assessment or even a 999 call.
8. Please note with regards to point (7) and (8) you will need to notify the Safeguarding Lead person at MIP.

Conclusion

- (a) Always be aware of suicide risk.
- (b) It is vital to keep good and accurate records.
- (c) Use the **FRAMES approach** as a therapeutic style to promote contact and change.

Feedback to the client
Responsibility for change lies with the client
Advice to change
Menu of strategies for bringing about change
Empathy as a therapeutic style
Self-efficacy or optimism

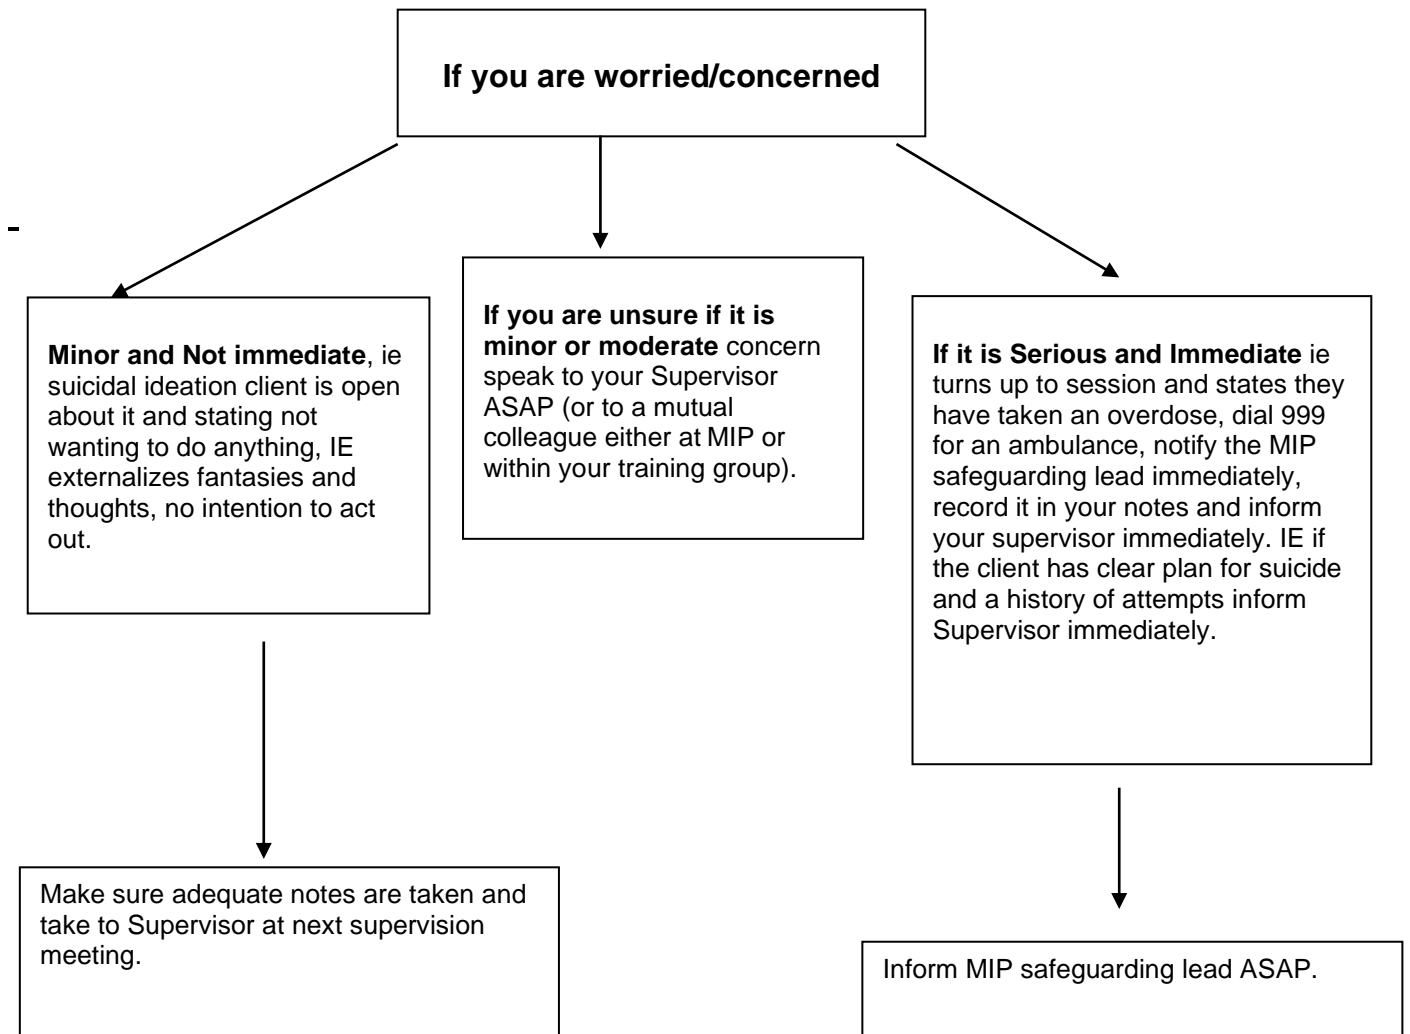

This mnemonic is a useful technique for memory recall and may be useful in this context.

Adult/Student/Placement

Suicide and Self Harm

MIP's procedure for assessment suicide risk has been taken from Suicide Risk Document - Northumberland NHS - covering key stages.

FLOWCHART OVERVIEW - SAFEGUARDING CONCERNS

We are committed to reviewing our policy and good practice annually.

This policy was last reviewed in November 2018

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

SOCIAL MEDIA POLICY

Introduction

The aim of this document is to clarify MIP's position in regard to the use of social media and offer guidance for using social media responsibly. It aims to provide a guide for trainees, staff and members and is written in line with UKATA's Code of Ethics & Requirements and Recommendations for Professional Practice. Many more practitioners are using the internet, social networking sites and blogs to communicate - both personally and professionally. Members should be aware that these internet/social networking sites are public and permanent. Once something has been uploaded or posted, it is still possible to trace it or be saved by others, even if it is subsequently deleted.

Keeping Boundaries

The nature of an online presence has the potential to blur personal and professional boundaries. MIP requires that practitioners make a clear distinction between their online personal and professional presence, with regard to emails, websites and social media accounts i.e. Facebook. We require members to have a separate email address for personal and professional use and that all possible steps are taken to ensure confidentiality of professional emails. In particular, members are required not to use any joint email address with partner/other family member for professional purposes. It is important that if one email programme is used to collect emails from a variety of different accounts, e.g. Outlook, that it is not jointly used by a partner/other family member and is password protected. Where confidential documents are sent electronically they must have password or other forms of protection against being opened or tampered with by a third party. Smartphones and tablets that are synchronised with a main computer need to be protected from being accessed by a partner/other family member. If computers are used by people other than the practitioner then all confidential, professional material needs to be password protected. Practitioners will have up to date antivirus and antiphishing protection and be registered under the Data Protection Act.

Privacy

Members are strongly advised to protect their own privacy. This means regularly checking your privacy settings as well as choosing carefully the information you make available online. Be aware that comments or images posted by friends or family may be accessible as their privacy settings may not be set as rigorously as your own. Pictures of you taken by other people may be tagged and it is recommended that you monitor this as much as possible and request people untag any inappropriate images. Members need to be aware that most search engines will guide members of the public to any sites that could have personal information posted about them. Members are also reminded that when social media sites update their services, sometimes the privacy settings are automatically reset to a default setting. It is incumbent upon members to be vigilant about this.

Professional Conduct

However you identify yourself on your professional account (e.g. student/contractual trainee/UKCP etc.) you are required to act professionally at all times and be guided by the MIP

Code of Ethics and Requirements and Recommendations of Professional Practice. When members are involved in social networking sites they may inadvertently become involved in ethically questionable conversations. If this occurs members are required to act according to our ethical guidelines (e.g. withdraw, seek supervision or confront).

In particular, MEMBERS MUST NOT:

- * Establish online relationships which in any way compromise their professional relationship with clients and service users.
- * Accept friend requests from clients or service users, and to decline this request using formal means of communication.
- * Discuss clinical work or work-related issues online in any non-secure medium.
- * Publish pictures of clients, trainees, supervisees or other service users online without their permission.
- * Post defamatory comments about individuals or institutions. This applies to all comments made on personal or professional accounts. Defamation law applies to any comments posted on the internet.
- * Use social-networking sites/internet/blogs for raising professional and/or ethical concerns or whistle-blowing. See next section for more details.

Professional Misconduct

The MIP Code of Ethics outlines our guiding principles, one of which is open communication with colleagues as well as clients. Members are required to confront any misconduct of other members on social networking sites either directly and formally with their colleagues, or as guided under the "Reporting Possible Violations" section of the Code.

December 2018

This policy is regularly reviewed every 18 months and updated a minimum of every 36 months as necessary.

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY

POLICY FOR ONLINE/REMOTE THERAPEUTIC PRACTICE

At this unprecedented time of the covid-19 outbreak, the Manchester Institute for Psychotherapy is committed to help our trainees to continue to service their clients and to support them through these challenging times.

In order to help our trainees be the most competent they can be at this particular time of new challenges and uncertainties, we have put together MIP policies with regards to trainees at MIP throughout the covid-19 challenges.

The UKCP, of which we are an accredited training organisation, have asked us to ensure that trainees have reviewed guidance in relation to remote working :

<https://www.psychotherapy.org.uk/wp-content/uploads/2020/03/Psychotherapeutic-practice-and-working-in-isolation.pdf>

They have not said that trainees may not work remotely, or stipulated any training guidelines other than to emphasise that the Code of Ethics & Professional Practice must be adhered to, irrespective of whether clients are seen in person, online or otherwise.

The parts of the Code which apply most here are those which relate to changes in the contract and competence of trainees.

- * Confirm each client's consent with the specifics of the service you will offer through a clear contracting process at the outset of therapy.
- * Ensure that your professional work is adequately covered by appropriate indemnity insurance or by your employer's indemnity arrangements.
- * Respect, protect and preserve client confidentiality.
- * Understand the limits of your competence and stay within them in all your professional activity.

Training Requirements

The Manchester Institute for Psychotherapy has required all trainees who are working online or remotely to have some training with regards to working online therapeutically.

In order that we can see that people have had training in online work, we have implemented MIP training in this particular sector. We have emailed all trainees who work in this area to attend our ADL training in this above area. This is not a recommendation, it is mandatory. We also recognise that there have appeared online in direct response to the covid-19 crisis free webinars that have been delivered by the BACP and other regulating bodies. We have emailed trainees with this information.

Manchester Institute's approach is as follows:

- * As said above, MIP trainees working with clients, whether through placements or privately, will be required to attend the one day's ADL training that we have implemented on working therapeutically online.
- * Throughout the training at MIP, we will be asking our trainers to include information and teaching on ethics and safeguarding, as well as practice, with regards to online therapeutic work.
- * It is imperative that trainees working online take this to their supervisor and arrange at least one extra hour on online supervision if it has not already been included in supervision and MIP training.
- * MIP will be sending a form for supervisors to fill in which confirms the competency for their trainees in online work. This will mean that the supervisors will have a part to play in assessing trainees' competency for remote therapy.
- * The UKCP has recommended that you do not take on new clients online. After discussions with other training centres, we have decided to take "a softer approach" with this because we trust you, with support from your supervisors and MIP, to work within your competency. To this end, MIP will be in regular touch with your supervisors to evidence and support this approach.

FRAMEWORK FOR REMOTE AND ONLINE THERAPEUTIC WORK RE. COVID-19

This framework/information below is intended to support you if you need to work online/remotely for the period of the covid-19 emergency where there is the possibility that therapists or clients need to self-isolate because of covid-19 measures. The information has been put forward assuming that you may need to work with existing clients for an online duration where face to face contact is not possible, and that you are not experienced, or have little experience, in online therapeutic work. The Manchester Institute for Psychotherapy is putting on extensive ADL training in working online - see email re Susie Hewitt's training day. Also, you should be having some training from your supervisor with regards to remote and online context.

With regards to placements, and I understand that a number of you will be having your placements at MIP, that the mandatory training by Susie Hewitt and the recommendations from your supervisor will help and support you in the transition from face to face work to online work.

Before agreeing to online or telephone work:

- * Discuss your plans with your supervisor
- * Check what options you are realistically able to offer
- * Check what options are practically possible for the client
- * Assure the client that they can choose to discontinue until face to face can be resumed. They do not need to agree to work online or by telephone.

- * Clients should not be charged for missing sessions if they decline alternative arrangements that you offer.
- * Make sure that you and your client's internet are up to scratch, and that your client has downloaded the medium that you are going to work therapeutically on.
- * Check that your insurance will cover you for remote working.
- * Talk through any anxieties that your client may have in moving from face to face to remote/online working.
- * Clients need to be assured and reassured that confidentiality will be maintained and is the highest priority throughout the work with this new medium.
- * It is important that the medium you both use is safe and encrypted.

Refocussing/Recontracting

In the transition from face to face work to online work, you may need to refocus on what you have already done therapeutically in the face to face sessions and whether this is going to continue whilst you are on the new medium or perhaps establish a new contract for the present period of online working.

In the first session in the first medium, whether on the telephone or online, the contract and frame will be renegotiated. As said above, not just therapeutically but certainly practically.

- * Will you have a trial period to try different mediums, ie telephone versus video/zoom?
- * What happens if the technology fails?
- * Does your practical contract that you will have established on the face to face relationship still "hold water" for the new way of working?
- * Do arrangements for payments for absences need to be renegotiated.
- * Who will set up the meetings.
- * As said above, you will need to have an initial discussion around client/therapist anxieties using this new medium.

Confidentiality and Boundaries

This needs to be talked about at the onset of the telephone or online therapy as there may be some differences with regards to specifically boundaries. For example, you will need to talk through with your clients that they have a safe place to work from, and that they are not going to be disturbed within the "therapeutic hour". This is vitally important as the client may have other distractions such as children and other considerations to be taken into account.

With reference to confidentiality, the space needs to be an acquired private space that they can use where they can't be heard or interrupted.

Telephone Technique

If you are going to have telephone counselling/therapy you will need to use reflection and verbal encouragements more than in a face to face session to maintain a sense of connection, and to convey that they client is being heard given there will be no visual clues like nodding your head etc. If this medium is new to you, please talk about technique and communication style with your supervisor or indeed take some time in training for this to be discussed.

Risk

It is always a good idea when working with this new medium to review your risk assessment and consider if there are any risk factors that would be increased and to take this to supervision. Please remember the usual protocols still apply in this context, ie your safeguarding policies.

If you do plan to be working remotely, be clear about the limits on what you can provide. Review the information required for you to ensure appropriate support if a crisis occurs. Make sure you have their current GP details/postal address and telephone number. As said above, the usual protocols on safeguarding are the same whether it's face to face or working remotely. You will still need to have, for example, access to information about sources of emergency support in their area etc.

Similar to working face to face, if you have any doubts about your client's safety, for example they may disclose they feel suicidal, then it is important to contact your supervisor immediately and to discuss the safeguarding management of your client.

Acknowledgements

This information/guidance draws on documents drawn up by Adrienne Lee of the Berne Institute, Tree Staunton of BCPC, and Lizzie Wright of the Minster Centre. If you wish to have more information with regards to remote and online working please go to the UKCP and/or BACP websites.

This policy will be reviewed and updated regularly as necessary

MANCHESTER INSTITUTE FOR PSYCHOTHERAPY
CO-RESEARCH CONSENT FORM

I agree to be interviewed about my personal experience of:

I consent to this interview being audio-taped. (*see below for conditions*)

Audio Recording and Transcript Conditions:

- * 90 minutes audio recording carried out by researchers to be destroyed after analysis.
- * Researcher will write a research project based on this 90 minutes audio recording.
- * All written documents will be anonymised.
- * Content of research project may be shared with fellow co-researchers from MIP.
- * Copies of the research project will be kept in the MIP Library, subject to the permission of the co-researcher.

The interview will be transcribed and this will form the basis of data which will be analysed as part of a research project for the researcher's training as a psychotherapist. The final research project will be read by the Research Co-ordinator and all details will remain strictly confidential.

I understand that this interview will be conducted in accordance with ethical standards laid down by the Manchester Institute for Psychotherapy (in line the United Kingdom Council for Psychotherapy Ethical Committee Report *Ethical Guidelines for Research, July 1997*).

I understand this to mean that:

1. I have the right to withdraw from the interview at any point and I can refuse to answer any questions which might make me feel uncomfortable.
2. The interviewer will do all he/she can to treat me with respect, care and sensitivity.
3. I can make a choice about confidentiality. If I so choose, the contents of this interview will be kept entirely confidential. this will be no record of my name anywhere (a pseudonym will be used). Everything I say will remain anonymous.

4. I will have access to the transcript of the interview and I have the right to ask that any data (recording and transcript) be destroyed after it has been analysed.
5. I have the right to ask for particular quotes not to be used in any published work.

Other conditions agreed:

- * This interview will be conducted in accordance with ethical standards as laid down by MIP and UKCP (*ethical guidelines for research 2019*).
- * The co-researcher will remain anonymous.

**MARKING CRITERIA FOR 10,000 WORD CASE STUDY
PSYCHOTHERAPY COURSE IN TRANSACTIONAL ANALYSIS
WITH AN INTEGRATIVE APPROACH**

Student's name _____ Date _____

Marked by _____ Grade _____

	A	B	C	D	U
1. ORGANISATION AND PLANNING (Shows a clear structure, the use of diagrams, is grammatically correct with few errors, does not plagiarise and keeps to the word limit. Referencing is accurate)					
2. PROBLEM FORUMULATION (Diagnosis and assessment, contracting and differential diagnosis)					
3. INTUITION AND CREATIVITY (Pacing, use of techniques, concepts and Schools of TA)					
4. APPLICATION OF THEORY TO PRACTICE (Able to demonstrate a clear understanding of the client's process through applying theory to practice)					
5. QUALITY OF CONTACT (Reflections, use of transference and intersubjectivity).					
6. PROFESSIONALISM (Shows awareness of ethical issues according to the UKCP Code of Ethics and Professional Practice, of diversity and culture, and of limits of own competence. Evidences the effective use of supervision)					
7. CONTRACT RESOLUTION (Retrospective considerations and future prognosis, if applicable)					
Grading Scale A. Excellent in most respects B. Very good in most respects C. Good in most respects D. Satisfactory in most respects F. Unsatisfactory - some aspects of the case study need further work (see feedback sheet from marker)

Grade _____

1. ORGANISATION & PLANNING

(Shows a clear structure, the use of diagrams, is grammatically correct, and keeps to word count)

2. PROBLEM FORMULATION

(Diagnosis and assessment, contracting and differential diagnosis)

3. INTUITION & CREATIVITY

(Pacing, use of techniques, concepts and Schools of TA)

4. APPLICATION OF THEORY TO PRACTICE

(Able to demonstrate a clear understanding of the client's process through application of practice to theory)

5. QUALITY OF CONTACT

(Reflections, use of transference and intersubjectivity)

6. PROFESSIONALISM

(Shows awareness of ethical issues according to the UKCP Code of Ethics and Professional Practice, of diversity and culture, and of limits of own competence. Evidences the effective use of supervision.)

7. CONTRACT RESOLUTION

(Retrospective considerations and future prognosis, if applicable)

GRADING SCALE FOR 10,000 WORD CASE STUDY

Grade Descriptor	Criterion Grade	Numerical Grade	Cut off points between grades
Excellent in most respects	A	22	17.5
Very good in most respects	B	16	14.5
Good in most respects	C	13	12.5
Satisfactory in most respects	D	11	9.5
Unsatisfactory, needs further work	U	8	-

How to mark using grading scale:

1. Assign a relevant grade (A-D, and U) to each criterion on the Marking Criteria Sheet.
2. Using the above table, convert each alphabetical grade to a corresponding numerical grade.
3. Add them up and divide by 7 to get the average number.
4. Change the number back to a letter. This is the overall grade.
5. The last vertical column gives you the cut-off points between grades.

AUDIO RECORDING TRANSCRIPT - GUIDELINES

1. AUDIO RECORDING TRANSCRIPT WITH COMMENTARY

It is not required, but it is recommended, that the audio recording be your case study client. The transcript will be a maximum of 20 minutes. The student will submit to the marker the recording of the whole session and it must not have been edited.

The Audio Recording - appropriate quality

The audio recording will be of approximately 50 minutes duration and should be no longer than this. Sound must be of a good quality so that both student and client can be understood without difficulty (low background noise/interference).

There should be relatively fluent interaction, i.e. breaks in the recording will not normally be too long.

It is particularly important that the recording demonstrates the student's work. His/her interventions/comments will need to be heard at frequent intervals throughout.

It is important to bear in mind that the recording is not meant to show a brilliant psychotherapist, and "flaws" may be commented upon constructively.

2. THE TRANSCRIPT WITH COMMENTARY

The transcript will be a maximum of 20 minutes.

The transcript with commentary will be typed on A4 paper.

On each page:

- * The transcript will be typed on the left-hand side, across two-thirds the width of the page. Next to it, on the right-hand third of the page the student will type their commentary.
- * This commentary will include, for example, observations, speculations, personal reactions to the client, interventions and client's reaction, relevant theoretical reflection ...
- * The transcript may include appropriate supporting material. e.g. if it's of particular relevance to the client's process.
- * The student is asked to include a **Prologue** - in which the client is introduced and his/her presenting difficulties outlined - and an **Epilogue** - which discusses how the work has helped the client move on or how the therapeutic relationship is changed in some way.
- * Pages will be numbered consecutively at the bottom of the page.

**MARKING CRITERIA FOR THE AUDIO RECORDING
PSYCHOTHERAPY COURSE IN TRANSACTIONAL ANALYSIS
WITH AN INTEGRATIVE APPROACH**

Student's name _____ **Date** _____

Marked by _____ **Grade** _____

	A	B	C	D	U
1. PROBLEM FORMULATION (the ability to formulate the client's problem in terms of Transactional Analysis psychotherapy from an Integrative approach as demonstrated in the prologue.					
2. EFFECTIVENESS (clarity, precision, timing and effectiveness of interventions)					
3. INTUITION AND CREATIVITY (range, flexibility and creativity of therapist's approach)					
4. QUALITY OF CONTACT BETWEEN PSYCHOTHERAPIST AND CLIENT (including the awareness and availability of therapist's own process, transference and counter-transference).					
5. PROFESSIONALISM (therapist demonstrates an awareness of diversity, ethical, cultural issues and the limits of their own competence)					
6. ANTICIPATION AND PREDICTIONS OF PSYCHOTHERAPY PROCESS (ability to chart the direction of the psychotherapy which will be reflected in the prologue)					
7. THEORY (knowledge of significant aspects of Integrative Transactional Analysis psychotherapy theory)					
Grading Scale A. Excellent in most respects B. Very good in most respects C. Good in most respects D. Satisfactory in most respects U. Unsatisfactory - some aspects of the case study need further work (see feedback sheet from marker)
